## Section 1: Dealer Sales and Service Agreement Standard Provisions Excerpted

The policies and procedures included in this Warranty Manual are a further explanation of the obligations and responsibilities you agreed to upon signing the Hyundai Motor America Dealer Sales and Service Agreement, including the Standard Provisions (the "Agreement"). The following statements are summaries from the Agreement's Standard Provisions.

### 1.0 Sale of Hyundai Products

### 10.A: Dealer's Agreement to Purchase Hyundai Products

**1: Quantities**

DEALER agrees to purchase Hyundai Products in such quantities and varieties as may be necessary to fulfill its obligations under this Agreement. HMA will distribute such products pursuant to such procedures as HMA may deem appropriate from time to time. HMA's agreement to sell may only be established by written confirmation by HMA that the product will be shipped. HMA will use its best efforts to provide Hyundai Products to DEALER subject to available supply from FACTORY, HMA's marketing requirements, and any change or discontinuance with respect to any Hyundai Product.

HMA and DEALER recognize that certain Hyundai Products may be in short supply from time to time because of factors which are beyond the control of HMA or FACTORY. Where such a shortage is determined by HMA to exist, HMA will endeavor to allocate the affected Hyundai Product(s) among its Dealers in a fair and equitable manner, as it may determine in its sole discretion.

HMA agrees to provide DEALER with an explanation of the method used to distribute such products and, upon written request, will advise DEALER of total sales by model to all Dealers collectively in the Region and to DEALER individually.

DEALER acknowledges that certain products manufactured by or for FACTORY may be distributed in the United States by distributors other than HMA. Entering into this Agreement, therefore, confers no rights or benefits upon DEALER with respect to the sale or servicing of such products.

**2: Prices and Other Terms of Sale**

HMA reserves the right, without prior notice to DEALER, to establish and revise prices and other terms of sale for all Hyundai Products sold to DEALER under this Agreement. HMA, however, will provide notice to DEALER of any revision in prices and other terms of sale before shipping any Hyundai Product subject to such revision.

**3: Payment for Hyundai Products**

DEALER agrees to pay for Hyundai Products pursuant to such procedures as HMA may designate from time to time. Such procedures may include electronic funds transfer and

other automatic collection systems. Automatic collections will be against DEALER's then applicable wholesale credit line. HMA will advise DEALER in writing of the implementation of such systems. DEALER will make arrangements with its designated financial institution to accommodate the use of such systems.

**4: Delivery of Hyundai Products**

*a: Mode and Place of Delivery*
HMA will select the distribution points, carriers and mode of transportation and will be responsible for all charges in effecting delivery of Hyundai Products to DEALER. DEALER agrees to reimburse HMA for all delivery, freight and other related charges as they appear on HMA's invoice to DEALER.

*b: Title and Risk of Loss*
Subject to the terms of sale which HMA may establish from time to time, title and risk of loss to Hyundai Products will pass to DEALER upon tender of the Hyundai Products to DEALER or its authorized agent. HMA will retain, and DEALER hereby grants to HMA, a security interest in, and the right to retain or repossess all Hyundai Products sold to DEALER by HMA until HMA is paid in full therefor.

*c: Failure or Delay of Delivery*
DEALER will not be liable for any delay or failure to accept delivery and HMA will not be liable for delay or failure to deliver Hyundai Products, where such delay or failure to deliver is due, in whole or in part, to any event of Force Majeure, or any delay or failure of the FACTORY or other supplier of HMA or any carrier to deliver Hyundai Products.

*d: Damage Claims*
As between HMA and DEALER, HMA assumes responsibility for damage to Hyundai Products occurring prior to delivery to DEALER or its authorized agent. DEALER agrees, however, to submit such claims in the manner required in the Hyundai Warranty Policies and Procedures Manual.

*e: Option to Repurchase Damaged Motor Vehicles*
DEALER agrees to notify HMA promptly if any new motor vehicle(s) in DEALER's inventory, other than those used as demonstrators, should for any reason be substantially damaged. To preserve the quality and value of new Hyundai Motor Vehicles offered to the public, HMA will have the option to repurchase any or all such vehicles at a price equal to the net purchase price paid by DEALER to HMA. HMA will make appropriate payment for repurchased vehicles directly to any lien holder. DEALER agrees to assign its rights under any insurance contract relating to the repurchased vehicle(s) to HMA.

**5: Warranties on Hyundai Products**

DEALER understands and agrees that the only warranties that will be applicable to each new Hyundai Product sold to DEALER by HMA will be the written limited warranty or warranties expressly furnished by FACTORY or HMA or as stated in the Hyundai Warranty Policy and Procedures Manual, as it may be revised from time to time. With respect to DEALER, such limited warranties are in lieu of all other warranties, express or implied, including any implied warranty of merchantability or fitness for a particular purpose or any liability for commercial losses based on negligence or strict liability. Except for its limited liability under such written warranty or warranties, neither FACTORY nor HMA assumes any other warranty obligation or liability. DEALER is not authorized to assume any additional warranty obligations or liabilities on behalf of HMA or FACTORY. Any such additional obligations or liabilities assumed by DEALER will be solely the responsibility of DEALER.

**6: Effect of Change of Design, Specification, or Options**

HMA reserves the right at any time in its sole discretion and without notice to change the design or specification of any Hyundai Product or the availability of options in any Hyundai Product. HMA is under no obligation to make any similar change upon any product previously purchased by or shipped to DEALER. No change will be considered a model year change unless so specified by HMA.

## 10.B: Dealer's Agreement to Promote and Sell Hyundai Products

**1: Adequate Vehicle Inventory**

As a duly authorized Hyundai Dealer, DEALER recognizes that its Customers will expect DEALER to stock a reasonable quantity and variety of current model Hyundai Motor Vehicles. Accordingly, DEALER agrees to stock and sell, subject to available supply, all models and types of Hyundai Motor Vehicles in the Hyundai Product Addendum and that it will, at all times, maintain at least the minimum inventory of Hyundai Motor Vehicles requested by HMA. DEALER will maintain all Hyundai Motor Vehicles for display and demonstration purposes in showroom ready condition.

## 10.C: Dealer's Sales Operations

**1: Disclosure As To Prices Of Hyundai Products**

DEALER agrees to explain to purchasers of Hyundai Products the items which make up the purchase price and to give such purchasers itemized invoices and any other information required by law. DEALER further agrees that it will not make any misleading statements as to the items which make up the total selling price of any Hyundai Motor Vehicle, or as to the prices related to such items including destination or other charges paid to HMA. DEALER also agrees not to charge Customers for any services for which DEALER is reimbursed by HMA, including pre-delivery inspection and adjustment services, without disclosing the fact of such reimbursement to the Customer.

**2: Disclosure As To Parts or Accessories**

DEALER recognizes that its Customers have a right to expect that any product that they purchase from DEALER meets the high quality standards associated with HMA, FACTORY, the Hyundai Marks and Hyundai Products in general. Accordingly, DEALER agrees that, if it sells or installs any part or accessory that is not a Hyundai Genuine Part or Accessory, it will disclose such fact to the Customer and will advise the Customer that the item is not included in warranties furnished by HMA or FACTORY. In all cases, the purchaser's contract of purchase and sale will include written notice of such disclosure. In addition, DEALER will clearly explain to the Customer the extent of any warranty covering the equipment, part or accessory involved and will deliver a copy of such warranty to the Customer at the time of sale.

DEALER agrees that it will not represent or offer to sell as new Hyundai Genuine Parts or Accessories, any parts or accessories used by it in the repair or servicing of Hyundai Motor Vehicles which are not in fact Hyundai Genuine Parts or Accessories. Hyundai-branded products that are not supplied by HMA and intended for use outside the U.S. are known as "gray market" and are not considered Hyundai Genuine Parts or Accessories and do not come with any warranty from HMA.

## 1.1 Service and Parts

### 11.A: Dealer Responsibilities

DEALER recognizes that its Customers are entitled to prompt, courteous, and professional service and that Customer satisfaction is vital to the mutual success of DEALER and HMA. DEALER agrees, therefore, to take all reasonable steps to provide service and parts for all Hyundai Motor Vehicles, regardless of where purchased and whether or not under warranty; to ensure that necessary repairs on Customer vehicles are accurately diagnosed and performed in accordance with the highest professional standards; to advise the Customer and obtain his or her consent prior to the initiation of any repairs; and to treat the Customer courteously and fairly at all times. The following statements are summaries from the Agreement's Standard Provisions which state, in part, in relation to warranty service and parts:

**1: New Motor Vehicle Pre-Delivery Inspection**

DEALER will perform Pre-Delivery Inspection on each new Hyundai Motor Vehicle prior to delivery to the retail Customer according to HMA's instructions. Any required campaign or policy service will also be completed at the time of Pre-Delivery Inspection.

**2: Warranty and Policy Service**

DEALER will perform warranty service on each Hyundai Motor Vehicle at the time of Pre-Delivery Inspection and when requested by the owner according to the requirements of the Hyundai Warranty Policy and Procedures Manual. DEALER will perform policy service as HMA may require from time to time. DEALER will provide each owner for whom warranty or policy service is performed with a copy of the repair order stating all services performed.

**3: Campaign Inspections**

HMA may, from time to time, require DEALER to inspect and correct conditions in Hyundai Motor Vehicles. DEALER agrees to perform such campaign inspections regardless of where or from whom the subject Hyundai Motor Vehicles were purchased. Because of the importance of campaign inspections to the overall reputation of Hyundai Motor Vehicles for their high quality standards, HMA may ship parts and other materials to DEALER without DEALER's authorization. DEALER will accept such shipments and upon completion of the campaign, HMA will credit DEALER for any extra parts and materials so shipped provided DEALER returns or otherwise disposes of such parts and materials according to HMA's instructions.

**4: Reimbursement Rates**

HMA agrees to compensate DEALER for all warranty, policy and campaign inspection work, including labor and diagnosis, in accordance with procedures and at rates to be announced from time to time by HMA and in accordance with applicable law. DEALER agrees that such rates will constitute full and complete payment to DEALER for such work. Both parties agree that warranty and policy service is provided for the benefit of

Customers and DEALER agrees that the Customer will not be obligated to pay any charges for warranty or policy work, except as required by law.

HMA will reimburse DEALER for Pre-Delivery Inspection at an authorized labor and/or diagnosis rate and according to the Pre-Delivery Inspection time allowances as established by HMA, or as required by law.

If DEALER wishes to adjust the established reimbursement rate for labor and diagnosis in connection with warranty, policy or Pre-Delivery Inspection performed on Customer's vehicles, DEALER agrees to make the appropriate written application to HMA and to comply with such applicable procedures or policies as may be set forth in the Hyundai Warranty Policy and Procedures Manual.

**5: Independent Warranty or Service Contract**

DEALER recognizes that HMA's limited warranties are provided to Customer at no additional expense. HMA recognizes that DEALER is free to sell warranty or service contract protection for Hyundai Motor Vehicles which is different from and independent of HMA's warranties. In order to avoid any misconception among its Customers, DEALER agrees that if it elects to sell such independent warranties or service contracts to Customers:

*a: DEALER will conspicuously disclose in writing upon the Customer's purchase order the extent to which the independent warranty or service contract protection purchased by the Customer overlaps that provided by HMA or FACTORY; and*

*b: Whenever a Customer purchases such independent warranty or service contract protection and seeks service on a Hyundai Product during the period of time that such Product is also covered by the limited warranty provided by HMA or FACTORY, DEALER will not apply for, and agrees that it will not be entitled to, reimbursement under such limited warranty unless DEALER has advised the Customer in writing, on all copies of the repair order, that the service was provided pursuant to HMA's limited warranty and not the independent warranty or service contract protection that the Customer purchased.*

**6: Installation and Use of Non-Genuine Parts or Accessories**

DEALER understands that it has the right to sell, install or use products which are not Hyundai Genuine Parts or Accessories.

DEALER agrees, however, that its Customers may reasonably expect that any part or accessory which DEALER sells, installs or uses in the repair or servicing of Hyundai Motor Vehicles meets the high quality standards of Hyundai Genuine Parts or Accessories. Therefore, in cases where DEALER does not sell, install or use a Hyundai Genuine Part or Accessory, DEALER will only utilize such other parts or accessories as:

*a: Will not adversely affect the mechanical operation of the Hyundai Motor Vehicle being serviced or repaired; or*

*b: Are equivalent in quality and design to Hyundai Genuine Parts or Accessories.*

In the event any disagreement arises between HMA and DEALER regarding the use by DEALER of parts other than Hyundai Genuine Parts or Accessories, or parts expressly approved by HMA, DEALER agrees that it will have the burden of proving either:

*a: That the parts replaced will not adversely affect the mechanical operation of the Hyundai Motor Vehicle being serviced or repaired; or*
*b: That parts used by it are equivalent in quality and design to Hyundai Genuine Parts or Accessories, or parts expressly approved by HMA.*

If DEALER uses parts or accessories which are not Hyundai Genuine Parts or Accessories or are not approved in writing by HMA for use in Hyundai Motor Vehicles, DEALER does so at its own risk and neither HMA nor FACTORY will be responsible to DEALER or to any third party for any products liability, warranty or other claim which may arise as a consequence of the installation and/or use of such parts.

**7: Safety and Emission Control Laws**
DEALER agrees to comply and operate consistently with all applicable provisions of federal, state and local motor vehicle safety and emission control laws, rules and regulations.

In addition, HMA and DEALER will each provide the other with such information and assistance as may reasonably be requested by the other in connection with the performance of obligations imposed on either party by any applicable federal, state and local motor vehicle safety and emission control requirements.

In the event that the laws of the state in which DEALER is located require motor vehicle dealers or distributors to install in new or used motor vehicles, prior to the retail sale thereof, any safety devices or other equipment not installed or supplied as standard equipment by FACTORY or HMA, then DEALER, prior to its sale of any Hyundai Motor Vehicles on which such installations are so required, will properly install such devices or equipment on such Hyundai Motor Vehicles. DEALER will comply with state and local laws pertaining to installation of such equipment, including without limitation, the reporting thereof.

**11.B: Service and Parts Operations**

**1: Service and Parts Personnel**
DEALER agrees to establish and maintain a complete service and parts organization, including a Service Manager, a Parts Manager and a sufficient number of customer relations, service, and parts personnel who meet such educational, management, technical training, and competency standards as HMA may establish or approve.

**2: Handling of Service Complaints**

DEALER understands that the development and maintenance of Customer confidence and satisfaction in Hyundai Products requires DEALER's full support. DEALER, therefore, agrees to investigate and handle all complaints from Customers according to procedures prescribed by HMA and in a manner calculated to secure and maintain the Customer's goodwill towards DEALER, HMA, and Hyundai Products. Moreover, DEALER agrees to cooperate with HMA and to provide such information as HMA may in its judgment require to comply with any federal or state consumer protection law, rule or regulation, including without limitation, warranty and repair or replace laws or to avoid any liability thereunder. Furthermore, DEALER agrees to participate in and cooperate with such customer complaint resolution procedures as HMA may designate from time to time.

**3: Service Equipment and Special Tools**
DEALER agrees to procure such service equipment and special tools as HMA may require from time to time, and to maintain the same in good repair and in proper calibration to enable DEALER to fulfill its service responsibilities under this Agreement.

**4: Parts Inventory**
DEALER will stock a sufficient quantity and variety of parts and accessories to meet Customer demand and to perform warranty repairs and special policy work. DEALER recognizes, however, that its Customers may reasonably expect that DEALER will have Hyundai Genuine Parts or Accessories immediately available for purchase or installation. DEALER, therefore, agrees to carry in stock at all times during the term of this Agreement a reasonable inventory of Hyundai Genuine Parts or Accessories, to enable DEALER to meet its Customers' expectations and needs and to fulfill its service responsibilities under this Agreement. HMA reserves the right to audit DEALER's inventory from time to time and may require DEALER to supplement its inventory to meet its obligations hereunder.

DEALER will install and/or maintain a parts inventory control system approved by HMA to track availability and sales of parts.

**11.D: Evaluation of Dealer's Service and Parts Performance**
DEALER's service and parts performance is extremely important to the effective representation of Hyundai Products. Therefore, under this Agreement, HMA will periodically evaluate DEALER's performance of its service and parts responsibilities, including without limitation: warranty service, customer relations, service and parts merchandising, management and operations, new vehicle pre-delivery service, parts inventory, tools and equipment, competency of service and parts personnel, participation of DEALER's personnel in various training programs, and the adequacy of service and parts facilities. HMA agrees to review such evaluations with DEALER so that DEALER may take prompt action, if necessary, to improve its service and parts performance to satisfactory levels as HMA may reasonably require. HMA will provide DEALER with a copy of the evaluation upon request.

## 1.2 Dealer Location

**12.A: Responsibilities of Dealer**
HMA has entered into this Agreement in reliance upon DEALER's representation that it will establish and maintain dealership facilities and operations only at the location(s) approved by HMA. DEALER agrees, therefore, that it will not, under any circumstances, conduct DEALER operations at any other location, whether as a satellite operation, sub-dealership, through an associate DEALER or otherwise, without the prior written consent of HMA.

Moreover, it is the mutual desire of DEALER and HMA that DEALER's facilities reflect a distinctive first-class appearance in common with all other duly authorized Hyundai Dealers. Accordingly, DEALER agrees to procure from approved sources and install all items necessary to ensure that DEALER's retail environment complies in all respects with such distinctive first-class appearance. In addition, DEALER agrees that all of its facilities will be satisfactory as to space, appearance, amenities, layout, equipment, and signage and will at all times be in accordance with HMA's minimum facilities standards, as amended from time to time.

**12.B: Operating Hours**
DEALER agrees that the transportation, service and maintenance needs of its Customers can be met properly only if DEALER keeps its dealership premises open for business during hours which are reasonable and convenient for such Customers. Accordingly, DEALER will maintain its respective dealership operations open for business during days and hours which are customary and lawful for such operations in the community or locality in which DEALER is located and in accordance with industry standards.

**12.C: Signs**
Subject to applicable law, DEALER agrees to purchase from sources designated by HMA and to erect and maintain at the dealership location(s), entirely at DEALER's expense, standard product and service signs of types authorized by HMA, as well as such other authorized signs as are necessary to identify the dealership operations effectively and as recommended by HMA. DEALER shall in no way alter or modify such authorized signs without obtaining prior written approval from HMA.

**12.D: Data Processing Systems**
To facilitate the accurate and prompt reporting of relevant DEALER operational and financial data including, without limitation, sales reports, warranty claims and parts purchasing and to ensure rapid communication with authorized Hyundai Dealers, HMA requires DEALER, and DEALER agrees, to acquire, install, maintain and upgrade at DEALER's sole expense, electronic data processing systems, compatible with HMA's data systems, from a source designated by HMA. The computer terminals for such system will be installed and maintained at the DEALER location(s) identified herein. Furthermore, DEALER agrees to utilize said system in accordance with HMA's instructions.

**12.E: Evaluation of Dealership Facilities**

HMA will periodically evaluate the adequacy of DEALER's facilities pursuant to its responsibilities under this Agreement. In making such evaluations, HMA will consider: the actual building and land space provided by DEALER for the performance of its responsibilities under this Agreement, compliance with HMA's then current requirements for dealership operations; the appearance, condition, layout and signage of the dealership facilities; and such other factors, if any, which in HMA's judgment may directly relate to DEALER's performance of its responsibilities under this Agreement. HMA will discuss such evaluations with DEALER so that DEALER may take prompt action, if necessary, to comply with HMA's minimum facility standards. HMA will provide DEALER with a copy of the evaluation upon request.

## 1.3 Accounts, Records, and Reports

**14.A: Uniform Accounting System**
HMA uses the operating information provided by its Dealers to develop composite operating statistics which are useful to Dealers and to HMA in business management. In order for such information to be useful, however, Hyundai Dealers must submit data which is accurate and based on uniform accounting procedures. Accordingly, DEALER agrees to maintain a uniform accounting system designated by HMA, and in accordance with the Hyundai Accounting Manual, as amended from time to time. In addition, DEALER will furnish to HMA, by the tenth (10) of each month, in a format prescribed by HMA, a complete and accurate financial and operating statement covering the preceding month and calendar year-to-date operations. DEALER will also promptly furnish to HMA a copy of any adjusted financial or operating statement prepared by or for DEALER.

**14.B: Sales Reporting**
HMA requires timely sales information to correctly evaluate current market trends and to maintain a fair and equitable vehicle distribution system. In addition, such data is necessary for HMA to evaluate DEALER's sales performance and to provide meaningful advice and recommendations to DEALER.

Accordingly, DEALER agrees to:

1: Accurately report to HMA, with such relevant information as HMA may reasonably require, the delivery of each new motor vehicle to a purchaser by the end of the day in which the vehicle is delivered to the purchaser thereof; and

2: Furnish HMA with such other reports as HMA may reasonably require from time to time.

**14.C: Sales and Service Records**
DEALER agrees to keep complete and up-to-date records regarding the sale and servicing of Hyundai products for a minimum of five (5) years, exclusive of any retention period required by any governmental entity. In order that the policies and procedures relating to the application for reimbursement for warranty, policy work, and Pre-Delivery Inspection may be applied uniformly to all Dealers, DEALER agrees to prepare, keep current, and retain records in support of requests for reimbursement for warranty and policy work performed by DEALER in accordance with the policies and procedures prescribed in the Hyundai Warranty Policies and Procedures Manual and standards established by HMA consistent with said manual.

**14.D: Audit of Dealer Records**
DEALER agrees that HMA will have the right, at all reasonable times and during DEALER's regular business hours, to examine, audit and reproduce all records, accounts, and all other data relating to the sale and service of Hyundai Products by DEALER. HMA will provide a copy of the report of the examination or audit to DEALER upon request.

## 1.4 Termination of Agreement

### 16.A: Termination for Cause

#### 1: Immediate Termination

HMA will have the right to terminate this Agreement in any of the following situation(s):
*a: Submission by DEALER to HMA of: (i) false claims for reimbursement, sales incentives, refunds, rebates or credits; (ii) false financial information, sales reports or other data required by HMA or (iii) false statements relating to pre-delivery preparation, testing, warranties, servicing, repairing, or maintenance required by HMA.*

#### 2: Termination Upon Sixty Days Notice

If HMA learns that any of the following events have occurred and determines, in its sole discretion, that the matter may require termination of this Agreement, HMA will so advise DEALER in writing. If DEALER does not correct the condition or explain the matter to HMA's satisfaction within thirty (30) days of such notice, then HMA will have the right to terminate this Agreement upon sixty (60) days notice. Events which may result in such termination include:

*a: The conduct, directly or indirectly, of any dealership operation at any location other than those specifically approved herein, without the prior written consent of HMA;*
*b: Any refusal to permit HMA to examine or audit DEALER's accounts and records as provided herein upon receipt by DEALER of written notice from HMA requesting such permission or information;*
*c: Failure of DEALER to comply with the provisions of any laws or regulations relating to the sale or service of Hyundai Products;*
*d: Repeated failure of DEALER's sales, service or parts personnel, including but not limited to management, to fully participate in any training program offered by HMA to DEALER;*
*e: Failure of DEALER to properly obtain, erect, maintain, repair, and illuminate signs and other displays in a manner approved by HMA;*
*f: Failure to maintain an adequate supply of general and special tools and equipment designated by HMA;*
*g: Failure to maintain an adequate parts inventory;*
*h: Repeated failure to use proper parts and accessories in the repair and servicing of Hyundai Motor Vehicles; or*
*i: Breach or violation by DEALER of any other term or provision of this Agreement.*

## 1.5 Miscellaneous Provisions

**20.A: Release of Claims**

Upon execution of this Agreement by DEALER, and in consideration of HMA entering into this Agreement, DEALER hereby releases HMA from any and all claims, demands, contracts and liabilities (including, but not limited to, statutory liabilities) known or unknown, of any kind whatsoever, arising out of or in connection with any prior agreements, business transactions, course of dealing, discussions, or negotiations between the parties prior to the effective date hereof and regardless of whether DEALER knows or suspects the claim to exist in its favor at the time of executing the release and whether or not if known to it, would have materially affected its release hereunder. Notwithstanding any other provisions herein, however, this release does not extend to any accounts payable by one party to the other as a result of the purchase of any Hyundai Products, audit adjustments, or reimbursement for any services.

**20.B: Severability**

If any term or provision of this Agreement, or the application thereof to any person or circumstance, will be contrary to any law or will be adjudged by any court or government agency to be invalid, void or unenforceable, such term or provision will be deemed deleted from this Agreement and the remaining provisions and any application thereof will continue in full force and effect without being impaired or invalidated in any way.

**20.C: Notices**

Unless otherwise specifically provided herein, any notice required to be given by either party to the other under or in connection with this Agreement will be in writing and delivered personally or by certified mail, return receipt requested and will be effective from the date of receipt. Notices to DEALER will be directed to DEALER or its representative at DEALER's place of business identified herein. Notices to HMA will be directed to the President of HMA at its national headquarters. In the event that any party refuses to accept delivery of notice hereunder, such notice will be effective on the date delivery is refused.

**20.D: Waiver of Trial by Jury**

HMA and DEALER hereby waive, to the extent permitted by law, the right to trial by jury for all disputes, controversies or claims which may arise between DEALER and HMA out of or in connection with this Agreement, or its construction, interpretation, effect, performance or non-performance, termination or the consequences thereof, or in connection with any transaction contemplated between the parties.

## Section 2: Receipt, Inspection and Storage of New Vehicles

### 2.0 Statement of General Policy

Hyundai Motor America will reimburse Hyundai Dealers the reasonable costs of repairing transportation damage to new vehicles as long as the damage is properly documented, and the procedures (as detailed herein) are correctly followed at the time of vehicle receipt.

Glovis America, Inc. ("Glovis America") is HMA's Logistic Partner. They are responsible for auditing and paying all approved transportation claims. Regularly check report RPT-4305 in WebDCS reports tab for approved transportation claims. HMA has the final decision on all claims.

#### 2.0.1 Summary of Procedures

- Inspect the vehicles immediately after they are off-loaded from the delivery carrier's truck before the driver leaves the dealership's premises.
- Document all vehicle damage or shortages on the carrier's delivery receipt; specifically have the Dealer and carrier representatives sign, date, and record the time of inspection on both copies of the delivery receipt or electronic proof of delivery. Validate and confirm what the delivery carrier driver notated for accuracy prior to signing off. Use the transportation damage codes listed in Section 2.2.1.
- Failure to record all damages on the carrier's delivery receipt at time of delivery will likely result in a denial of the transportation claim. For delayed inspections, see below and Section 2.1.6.
- File a warranty claim for some damages found upon removal of any protective plastic sheeting (Refer to Section 2.1.2, Inspection Procedures.)
- Send a concealed damage letter to the delivery carrier within 2 business days after vehicle delivery, if applicable. (Refer to Section 2.1.5, Concealed Damage.)
- Send a delayed inspection letter to the carrier within 2 business days after vehicle delivery, if applicable. (Refer to Section 2.1.6, Delayed Inspection.)
- Failure to send a concealed or delayed section letter to the carrier within 2 business days after delivery will likely result in a denial of the transportation claim.
- Obtain authorization from Glovis America before repairing any critical damage. The total repair costs must not exceed the third-party survey estimate of $1,200. If the repair cost is expected to exceed this amount, contact Glovis America for further approval. (Refer to Section 2.1.7, Critical Damage Procedures.)
- Tag and retain all parts for a period of 20 days from the date that the transportation claim is indicated as paid per the Warranty Answerback.
- File a transportation claim via the DCS terminal. No other method of submitting a transportation claim will be accepted.
- File the following original documents and photos at your dealership for record retention purposes for a period of five years from the HMA claim acceptance date:
  - Delivery receipt indicating delivery of the claimed vehicle

- Itemized repair order indicating the repair of the claimed vehicle
- Itemized sublet repair order indicating the sublet repair of the claimed vehicle

If applicable:

- Copy of the delayed inspection letter or via email.
- Copy of the concealed damage letter or via email.

Proper inspection and documentation of receipt of new vehicles provides the following:

• Full recovery of the cost incurred for the repair of in-transit damages with a minimal administrative burden.

• Information to HMA on repetitive damage-causing situations so that these problems can be corrected.

• Assurance that the specific vehicle and accessories were received.

## 2.1 Vehicle Receipt and Inspection Procedures

### 2.1.1 Vehicle Receipt Procedures

The Dealer should provide a designated area where vehicles being delivered can be unloaded and inspected. A specific individual(s) should be assigned the responsibility for supervising and/or performing the inspection of the delivered vehicles at the time they are off-loaded from the Carrier's truck prior to the departure of the Carrier's driver.

Damaged vehicles cannot be refused and must be accepted for delivery. For those accepted with major damage, please see Section 2.1.7 for Critical Damage Procedures.

### 2.1.2 Inspection Procedures

When receiving a new vehicle, the vehicle is to be inspected immediately for damage and obvious missing parts and/or options as listed. This inspection is to be completed before the Carrier's delivery receipt is signed. Failure to record all damages on the carrier's delivery receipt at time of delivery will likely result in a denial of the transportation claim. For delayed inspections, see Section 2.1.6.

The inspection should be performed as quickly and as accurately as possible. The Carrier's delivery receipt must be clearly signed and dated (noting time of delivery) by both the Dealer's and Carrier's representatives for all vehicles. All damage notations should be agreed to by the Carrier's driver. If the Carrier's driver refuses to sign the delivery receipt, the Dealer's inspector should write "Driver Refused to Sign" and include the Carrier's driver's name, if known, on the delivery receipt.
Refer to Section 2.1.7 for Critical Damage Procedures.

- Survey the vehicle's exterior. Check for scratches, dents, and other damage to visible body panels. Look for scratches and pitting of glass. Check all trim.
- Exterior damage may indicate related hidden damage (to the undercarriage, for example). Please check for it.
- For vehicles covered with paint protective film:

  – Transportation Damage Claims: Limited to damages found under film that correspond to tears or dents in the film. Take photos or video if the film is disturbed, before and after removing the film. The damaged film must be removed in the driver's presence and the damage noted on the delivery receipt.

  – Warranty Damage Claims: All minor damages found under the film with no corresponding film damage (see Section 2.1.7, Critical Damage). Major/critical damage includes but isn't limited to total repair hours which are over 10 hours of combined paint and bodywork labor time (excluding R&I) and/or over $1,200 of repairs (excluding replacement of tires or glass).

**Note:** Major damage should be visible, noted at time of delivery (after removal of film) and submitted as a transportation claim. Protective film does not conceal major

damage. Such damage does not fall under the concealed damage category (see Section 2.1.5, Concealed Damage).

For any vehicle in question, contact Glovis America.
• Compare the accessory list on the Monroney label to the equipment actually installed on the vehicle.
• Look for damage to the interior of the vehicle–especially around the driver's area.
• Look for any obvious misbuilds.
• Verify that the trunk contains the equipment or accessories that it should.

The Carrier may charge the Dealer for driver waiting time if this inspection exceeds 6 minutes per vehicle.

HMA reserves the right to appoint an arbitrator in cases of dispute between the Dealer and the Carrier.

**Note:** Transportation Claims may not be reimbursed to dealerships if they are not supported by accurate and complete delivery receipt or inspection record notation. It is important, therefore, that all parties properly annotate damage along the vehicle transit route.

### 2.1.3 Documentation Requirements

Once the vehicle has been inspected, note all damages completely and accurately on the Carrier's delivery receipt. Use the damage area, type and severity codes noted in Section 2.2.1, 2.2.2, and 2.2.3. Make sure that each damage notation is identifiable with a particular VIN. In the remarks section, give any information which will help identify the cause of damage (if known or suspected), such as "quarter panel bent, tie-down bracket also bent". Be sure that both the driver and dealer representative sign, date, and record the time of inspection on the delivery receipt before the driver leaves.

Remember that the claim will be judged based on the accuracy and completeness of your documentation.

### 2.1.4 Normal Inspection Hours

Hyundai normal delivery hours are between 7:00 AM to 7:00 PM, Monday through Saturday. Any units delivered during this time must be inspected at time of delivery for reimbursement of claims. Any issues with these hours should be addressed to your Regional Distribution Manager.

### 2.1.5 Concealed Damage

Concealed damage is damage that can be identified only after:

**A. An on-hoist check of the vehicle.**
Once the vehicle is on the hoist, examine the under-carriage for damage, giving particular attention to:

- Exhaust system
- Suspension system
- Frame
- Gas tank
- Brake lines
- Inner side wall and tread areas of tires
- Engine and drivetrain components
- Underbody sheet metal
- Tie-downs

**B. By test driving the vehicle.**
Report any problems that are transportation related via the concealed damage letter. Send a concealed damage letter via mail, email or fax to the delivering Carrier within 2 business
days of delivery. Receipt required when filing claim. Failure to do this will result in denial of claim.

**Other Conditions**
**• Paint Protective Film Covered Vehicles**
Send a concealed damage letter via mail, email or fax to the delivering Carrier within 2 business days of delivery. Receipt required when filing claim. Failure to do this will result in denial of claim.

Minor damages found under the film with no corresponding film damage should be submitted as a warranty claim (see Section 2.1.2 Inspection Procedures). Major damage should be visible and noted at time of delivery (after removal of film). Protective film does not conceal major damage.

**• Snow or Ice Covered Vehicles**
Damage or shortage to the vehicle surface discovered after the removal of snow and/or ice is ONLY considered concealed damage if it affects a horizontal panel (i.e. the hood, roof, windshield/rear glass, or trunk). In addition, the driver must verify in writing on the delivery receipt that one or more of these areas cannot be inspected.

**• Dirt Covered Vehicles**
Damage or shortage to the vehicle surface discovered after removal of dirt is NOT considered concealed damage; therefore, the dealership may want to wash each vehicle prior to beginning the inspection.

### 2.1.6 Delayed Inspections
When vehicles are delivered outside normal business hours, inspect and receive the vehicles during the next working day as described in the “Concealed Damage” section, but, additionally send the documented delivery receipt via mail, email or fax to the delivering Carrier within 2

business days of vehicle delivery. Be sure to note on the delivery receipt the reason that the inspection was delayed.

Failure to send a concealed or delayed section letter to the carrier within 2 business days after delivery will likely result in a denial of the transportation claim.

### 2.1.7 Critical Damage Procedures

Critical damage is defined as damage that is so severe or of such a nature as to make it questionable whether the vehicle can be repaired, and/or items replaced, and restore the vehicle to "like new" condition in appearance, safety, function and structural integrity. In addition, any repair or replacement must not violate any federal, state or local laws. When a vehicle is delivered to the Dealer with suspected critical damage, the Dealer shall:

- Accept delivery of the unit.
- Note all damages on the delivery receipt. The driver is to co-sign.
- *Contact Glovis America (prefer email: claims@glovisusa.com or 1-866-445-6847) for further details.*

When appropriate, Glovis America will arrange for an independent damage and repair appraisal of the vehicle and will then instruct the Dealer on the vehicle's disposition.

Damage circumstances which fall into the category of possible critical damage include:

- Repair or replacement will not restore the vehicle to a "like new" condition in appearance, safety, function and structural integrity; OR
- The vehicle requires ten or more hours combined paint and metal repair time (remove and replacement time not included); OR
- The vehicle requires over $1,200 of repairs (excluding replacement of tires or glass); OR
- The vehicle requires a welding or cutting operation; OR
- The vehicle requires a frame/unibody straightening/pulling operation; OR
- The vehicle has experienced significant damage from water, environmental fallout, "acid rain", hail or windstorm effects, etc.

Repair costs must not exceed the amount of the independent repair appraisal. If costs do exceed this amount or a copy was not provided to the Dealer, contact Glovis America for disposition.

***All critically damaged vehicles require disposition from Glovis America before repairs begin or the vehicle is sold. Failure to secure such disposition could result in a denied transportation claim.***

### 2.1.8 Items Which Are Not Carrier Responsibility

The following items are ***not*** the responsibility of the Carrier:

- Production shortages

A production shortage is an item which is not available at the time a vehicle is built, but which does not prevent scheduled shipment of a vehicle to the Dealer. Such a shortage should be noted on the vehicle invoice by HMA. The Dealer should contact the regional office for reimbursement procedures.

• Missing parts or production errors
A missing part is a part or accessory which was omitted in production of the car. A side mirror, for example, shown on the invoice but with no holes drilled for it, would be a missing item, rather than a production shortage or a transportation loss. A warranty claim should be submitted for this repair.

• Incorrect specifications
Because of production scheduling or some other reason, vehicles occasionally may have different specifications from that which the Dealer indicated as their preference. Adjustments and changes will not normally be allowed. Examples might include: 5 speed manual transmission received whereas an automatic transmission was preferred or an incorrect interior trim. In such a case, the Regional Distribution Department should be contacted for resolution of the issue.

• Warranty repairs
Warrantable repairs must be made in accordance with HMA's policy. Warranty repairs apply to "original defect of material and workmanship". See Section 2.1.2, Inspection Procedures, regarding damage noted upon removal of any exterior plastic protective sheeting.

• Paint or Fluid Spillage
Contact Glovis America, as soon as possible, for any paint or fluid spillage noted during delivery.

**2.1.9 Repair Policy and Repair Record Requirements**
HMA will only pay for completed repaired damages; consequently, it is beneficial to complete the repairs as soon as possible after obtaining any necessary authorizations.

The following are repair record retention requirements:

Dealer Repair Order
The repair order issued to perform the repair must:
• State the vehicle identification number (VIN). This also applies to repairs that are to be sublet.
• State the damage to be repaired which corresponds exactly to the damage noted on the delivery receipt.
• State the hourly labor rate and show the breakdown of the metal, paint, and R&R (remove and replacement) time (each separately).

Sublet Work
If the repair is sublet to an outside repair facility, a sublet final invoice must be obtained. The final invoice must state:
• The Vehicle Identification Number (VIN).
• The name and location of the sublet shop.
• The sublet shop labor rate.
• The date of the repair.
• A detailed breakdown of exact work performed.
• A complete, itemized breakdown of metal, paint and R&R time for each operation separately.

****Note:** Always attach Sublet final invoices to the WebDCS claim.

***File the above original documents at your dealership for record retention purposes for a period of five years from the HMA claim acceptance date.***

**Parts Salvage Availability**
Any time a Dealer replaces a part when repairing transportation damage, that part must be made available to HMA for inspection and/or salvage.

The transportation claim itself serves as the salvage notification. The Dealer must retain and make available for inspection or collection any part that has been replaced because of transportation-related damage and must be held for 20 days from the date of Warranty Answerback receipt.

HMA requires tagging each part with the repair order number, the vehicle identification number, the delivery receipt number, the transportation claim number, repair order date, and any other information which will help identify the part.

If the salvage part is not tendered at the time it is claimed within 20 days after claim payment notification per the Warranty Answerback, the Dealer will forfeit the recovery right on the repair damage and payment of the transportation claim will be denied or charged back.

## 2.2 Transportation Claim Filing Procedure

**Damage Code Listings**

An accurate inspection must be made on each vehicle and properly coded on both the carrier and dealer copy of the delivery receipt. The damage area, type and severity codes must be noted on the original delivery receipt at the time of delivery and inspection of the vehicle. The transportation carrier will electronically communicate the damage code information to Glovis. The dealer claim will be matched against the transmitted carrier damage codes. To prevent claim rejection, please ensure your claim matches the damage codes seen on the vehicle's delivery receipt and repair according to policy.

**Filing a Claim**

File the claim for transportation damage by submitting all claims via the WebDCS. To ensure prompt payment, the claim must be submitted completely and accurately.

Claims must be submitted into the HMA WebDCS system within 60 days of vehicle receipt at the Dealer. Failure to do so may result in denial of claim. For assistance on how to navigate to claim submission in WebDCS, review the claims processing manual or contact the please contact the Warranty Call Center at warranty@hmausa.com or by phone at 1-877-446-2922 or review the claims processing manual.

For further assistance with claim specific questions related to Transportation, please contact Glovis by email at claims@glovisusa.com (email preferred) or 1-866-4GLOVIS (1-866-445-6847). Phone calls go into a voice mail and are picked up several times a day during Glovis business hours (Monday - Friday from 8:00 a.m. - 5:30 p.m. PST).

**Note:** The repair must therefore be completed within 60 days of vehicle receipt.

### 2.2.1 Transportation Damage Area Codes (DAC)

### 2.2.2 Transportation Damage Type Codes (DTC)

01 Bent
02 Broken (except glass)
03 Cut
04 Dented
05 Chipped (except glass & panel edge)
06 Cracked (except glass)
07 Gouged
08 Missing (except molding & emblem)
09 Scuffed

10 Stained or soiled
11 Punctured
12 Scratched (except glass)
13 Torn
14 Dented-Paint not damaged
18 Moulding/emblem, weatherstrip damaged
19 Moulding/emblem, weatherstrip loose
20 Glass cracked
21 Glass broken
22 Glass chipped
23 Glass scratched
24 Marker light/additional turn light damage
25 Decal/paint stripe damaged
29 Contamination, exterior
30 Fluid/Fuel spillage, exterior
34 Chipped panel edge
36 Incorrect part or option not as invoiced
37 Hardware-damaged
38 Hardware-loose, missing

### 2.2.3 Transportation Damage Severity Codes (DSC)

01 Damage up to and including 1 inch in length/diameter-less than 3cm
02 Damage over 1 inch up to and including 3 inches in length/diameter-3cm up to 8cm
03 Damage over 3 inches up to and including 6 inches in length/diameter-over 8cm up to 15cm
04 Damage over 6 inches up to and including 12 inches in length/diameter-over 15cm to 30cm
05 Damage over 12 inches in length/diameter-over 30cm
06 Missing

### 2.2.4 How to File a Transportation Claim

Only one claim allowed per VIN.

Concealed Damage/Deliveries Subject to Inspection (see Section 2.1.5)

A letter, email or fax with copy of carrier delivery receipt showing damage notations must be sent to the carrier within 2 business days of vehicle delivery (see Section 2.1.5 and 2.1.6) for units with concealed damage or received outside of the normal delivery hours.

For a vehicle with any Exterior Protective Sheeting, see Section 2.1.2.

**Critical Damage (see Section 2.1.7)**

• Accept delivery of the unit.

• Make damage notations on the carrier and dealer copy of the delivery sheet. Driver is to co-sign.
• Contact Glovis America for further details. (Email preferred: claims@glovisusa.com or 1-866-4GLOVIS)

**Inputting Your Claim**
• You can enter up to five separate damage repairs on the DCS Transportation Claim Screen. For units with over five repairs, use the five most severe damage repairs.

Claims must be input and accepted by HMA within 60 days of the delivery date. Claims may not be accepted outside of this time period.

**Claim Input Fields**

• **Claim #**
This is the same claim format current.

• **Repair Date**
Select from calendar icon, field is grayed.

• **RO#-**
Input your Repair Order number.

• **Carrier**
Refer to carriers listed in WebDCS

• **Delivery Date**
Select from calendar icon, field is grayed.

• **Time**
Input the time of delivery 00:00 AM or PM. Please note that normal delivery hours are 7 a.m. to 7 p.m., Monday through Saturday. Inspections must be completed during that time frame. (Contact your Regional Distribution Manager with any delivery hour problems.)

• **Damage Area, Type, Severity Codes**
Please refer to Section 2.2.1, 2.2.2 and 2.2.3 for the appropriate codes:
  - Transportation Damage Area Codes (3 Digits)
  - Transportation Damage Type Codes (2 Digits)
  - Transportation Damage Severity Codes (2 Digits)

• **Labor/Parts/Other Amount(s)**
  - **Labor:** Enter total dollar amount for labor costs.

– **Parts:** Genuine Hyundai parts will be paid at Dealer net price plus applicable parts handling allowance. Unlike the warranty system, mark-up on Genuine Hyundai parts is not automatically calculated and must be included with claim.
– **Other:** This column should reflect expenses such as cost of paint material, sublet, etc. If there is a dollar amount in this column, it will need to be explained in the "Explain" column.

• **Critical Damage Survey (Y/N)**
If Glovis America has authorized a Critical Damage Survey, input "Y" for yes.

• **Concealed Damage/Delayed Inspection Letter (Y/N)**
If letter sent to Carrier within 2 business days regarding concealed damage or delayed inspection, input "Y" for yes.

• **Critical Damage Survey**
Contact Glovis America to have a professional survey conducted on a unit. This surveyor is trained in Vehicle Repair Estimating and in determining if the vehicle meets safety standards. This is not an HMA employee.

• **HMA Transportation Claim Helpline**
If a submitted claim has been rejected or if there is a problem that cannot be solved over the WebDCS system, contact Glovis America's Transportation Helpline at claims@glovisusa.com (email preferred) or 1-866-4GLOVIS. When calling this number, there will be a recorded message asking for the following information:

- Dealer Code
- Your Full Name
- Phone Number
- Claim Number
- Description of Problem

A transportation claim representative will respond to your inquiry within two business days. When a Dealer believes that a claim was denied in error, HMA's Logistic Department should be contacted stating the reasons why the claim should be accepted.

### 2.2.5 Required Supporting Documentation

The following documents should be filed for record retention purposes for five years from the HMA claim acceptance date:

• **Original Delivery Receipt or Electronic Proof of Delivery**
The damage exceptions or shortages must be coded and countersigned on the delivery receipt, with the date and time, by representatives of both the carrier and the dealership.

• **Original Repair Order**

Detailing all work performed. The hourly rate used must be shown, as well as a complete itemized breakdown of metal, paint, and R&R time (refer to Section 2.1.9 Repair Policy & Repair Record Requirements for additional requirements).

• **Original Sublet Repair Invoice**
Not an estimate. Detailing of the sublet final invoice must state all of the services performed by the outside repair facility. The sublet shop labor rate must be shown, as well as a detailed breakdown of the exact work performed, complete itemized breakdown of paint, metal, and R&R time for each operation (refer to Section 2.1.9 Repair Policy & Repair Record Requirements for additional requirements).

A sublet shop "Estimate of Repairs" form will not be acceptable unless it is substantiated by either an final invoice from the sublet shop marked paid in full, a copy of the Dealer's cancelled check covering payment for the repairs, or a P.O. (purchase order) number issued by the Dealer for the repairs.

Also include, if applicable via email, or fax with receipt.
- Copy of the notification to carrier of Delayed Inspection Letter.
- Copy of the notification to carrier of Concealed Damage Letter.

### 2.2.6 Claim Denial and Appeal

When transportation claims are submitted to and accepted by HMA, Dealer is paid via the Warranty Settlement Statement. The month following receipt of claims, HMA sends Carrier the list of claims submitted by Dealers. At that time, Carrier reviews and may decline claims. Carrier, Glovis, and/or HMA may request copies of claim support documentation. If documentation provided to HMA proves Dealer should not have submitted claim(s), Dealer will be charged back for the amount previously paid on a following Warranty Statement.

• **Audit**
HMA maintains the right to conduct a complete audit of all transportation claim related records. Claims can be charged back against the dealership for incomplete records.

# APPENDIX B

## Vehicle Delivery Quick Reference Guide

| | |
|---|---|
| During Normal Business Hours | ❑ A dealership representative must inspect each new vehicle immediately upon delivery.<br>❑ The inspection is to be completed before the carrier's delivery receipt is signed by a dealership representative.<br>❑ Damage and missing loose items must be noted on the delivery receipt prior to signing. If the dealership representative and driver do not agree on damage or missing items, note the discrepancy on the delivery receipt and take photos whenever possible.<br>❑ The delivery receipt must be signed and dated, with the time of delivery noted, by both the driver and dealership representative even if there is disagreement. |
| After Hours or Unattended Delivery | ❑ Vehicles must be delivered to the dealership's designated after-hours parking area.<br>❑ Vehicle keys and a delivery receipt must be placed in the dealership's designated location.<br>❑ The driver must sign and date the delivery receipt identifying each VIN as delivered and subject to inspection (STI).<br>❑ **The dealership has two business days after the day of delivery to notify the carrier in writing of any damage to vehicles delivered after hours.** |
| Hidden Damage | ❑ Vehicles with Paint Protective Film (PPF) may hide damage. During the dealership's inspection and prior to signing the delivery receipt, PPF must be examined closely for any disturbances such as tears, dents, previous removal and reapplication, or any other indication that damage may exist underneath. Should any irregularity be observed, PPF should immediately be removed in the presence of the driver and prior to signing the delivery receipt.<br>- For after hours deliveries, any PPF irregularity should be photographed prior to removal of PPF, in addition to photographing any corresponding damage which may exist.<br>- Damage found underneath PPF with no corresponding disturbance to PPF cannot, in most cases, be assessed as transportation damage.<br>❑ The dealership should inspect undercarriage components by raising the vehicle on a hydraulic lift.<br>❑ Should vehicle surfaces be covered with dirt, snow, grease, or other debris which could conceal minor damage, the dealership may elect to clean the vehicle to the degree necessary to adequately inspect the vehicle.<br>- Should the dealer decide to clean any portion of a vehicle, such cleaning must occur without delay. Should the driver be willing to accept the conditions of STI delivery in order to expedite his departure, it must be noted on the delivery receipt and STI rules shall apply.<br>- More severe damage which could have been identified despite dirt, snow, etc. cannot, in most cases, be assessed as transportation damage.<br>❑ **All hidden damage must be discovered and the carrier sent notification in writing within 2 business days of delivery, regardless of whether the vehicle was delivered during normal business hours or after hours STI.** |
| Vehicles Delivered with Damage | ❑ Damaged vehicles must be accepted by the dealer regardless of damage severity. Vehicle condition may be inspected and assessed by GLOVIS and/or the Distributor. The Distributor has full discretion in classifying a vehicle as repairable to new or used condition, or non-repairable/total loss. The Distributor also has full discretion regarding the removal of any vehicle from dealership inventory.<br>❑ GLOVIS must provide repair authorization to the dealer. |
| IMPORTANT | ❑ All writing on delivery receipts must be legible. If a signature is illegible it must also be printed in a legible manner.<br>❑ GLOVIS cannot advise a dealership with regard to warranty claims. Please contact your Distributor representative with any questions regarding warranty claims. |

# APPENDIX B

## Vehicle Delivery Quick Reference Guide

| Delivery Inspection [Typical inspection time is 3 - 6 minutes per vehicle] | | |
|---|---|---|
| HOW TO INSPECT: Perform a complete walk-around inspection of all exterior vehicle components, including exhaust pipes, rocker panels, wheels/tires, and front and rear fascias. For most effective results, bending and touching lower vehicle surfaces is recommended. | | |
| **Area** | **Description** | **What to look for** |
| VIN | ✓ Check all VINs. The dashboard VIN plate, Monroney label, and delivery receipt must all match. | ❑ All VINs match |
| Accessories | ✓ Ensure all loose items, including those listed on the Monroney label, are present. | ❑ 2 sets of keys, keyless entry remotes, and/or keyless start remotes<br>❑ Loose accessories, such as iPod cables, wheel locks, and floor mats, NAV DVD or SD card as listed on the Monroney label<br>❑ Owners manual packet (unopened, if sealed) |
| Hidden Damage | ✓ There is no need to remove PPF during inspection unless there is an indication of possible damage as described on the previous page. Remove disturbed PPF immediately to verify condition. | ❑ Disturbed PPF |
| Exterior Condition | ✓ Check all body panels, trim and paint finishes for scratches, dents or corrosive fluid damage. | ❑ Dents<br>❑ Dings<br>❑ Gouges<br>❑ Scratches<br>❑ Punctures<br>❑ Chips<br>❑ Cracks<br>❑ Scrapes<br>❑ Missing<br>❑ Broken |
| | ✓ Check the bodyline of the vehicle, paying careful attention to the fit of the hood with the fenders and the front bumper. | |
| | ✓ Check all glass for cracks, scratches or chips. | |
| | ✓ Check all tires, including the spare, for cuts or punctures. | |
| | ✓ Check under the hood, in the truck and glove box for any missing items | |
| Interior Condition | ✓ Inspect all trim panels, upholstery, carpets, dashboard surfaces, sun visors, headliner and door trim. | ❑ Same as above<br>❑ Grease, stains, especially on the driver's side |
| Final | ✓ Upon completion of inspection, ensure all discrepancies are noted on the delivery receipt. Driver and dealership representative must sign and date the delivery receipt. All writing must be legible. Print names if signatures are illegible. | ❑ Delivery receipt with correct VINs, notations, and signatures with date and time |

# APPENDIX B
## Vehicle Delivery Quick Reference Guide

### Electronic Proof of Delivery (EPOD)

BACKGROUND: Most of us are familiar with handheld Electronic Proof of Delivery systems (EPOD) used by delivery services such as UPS and FedEx. GLOVIS has embraced the use of EPOD in order to capture vehicle shipment and delivery information in real time and provide our customers with more accurate and timely information. Many carriers have implemented or are in the processes of implementing EPOD systems.

- ❑ EPOD systems vary from carrier to carrier. Dealerships should contact their carrier representative for instructions on the specific system being utilized.
- ❑ Whether receiving vehicles using EPOD or a standard paper delivery receipt, the delivery/inspection/damage notification process remains the same.
- ❑ During normal delivery hours: dealership personnel must inspect and take delivery of vehicles.
  - ✓ If no damage is found, a dealership representative will sign the EPOD device. Typical EPOD equipment uses a stylus or a finger for signatures. The driver may ask for name spelling.
  - ✓ Any discrepancies (damage, missing items, etc.) must be noted on the EPOD device. Ensure the proper VIN has been selected prior to entering damage details.
    - In some cases, delivery drivers will be equipped with printers and can provide a paper delivery receipt with damages noted.
    - In cases where the driver is not equipped with a printer, the dealership may access printable delivery and damage confirmations on the carrier's web-based EPOD system. These system documents are designed to update in real time, so delivery receipts and damage notations should be available immediately after the driver enters information into the handheld device.
- ❑ For deliveries after hours and subject to inspection (STI): the dealership will access the delivery confirmation page on the carrier's web-based EPOD system.
  - ✓ If no damage is found, dealer will confirm delivery.
  - ✓ If damage is discovered, note the issues on the appropriate web page. Ensure the proper VIN has been selected prior to entering damage details.
- ❑ Dealerships are encouraged to adopt the use of EPOD systems. However, dealership personnel may provide the driver with their own paper delivery receipt noting VINs and any discrepancy. This "duplicate" delivery receipt must have the delivery driver's signature and date to be valid.
- ❑ Drivers should be capable of providing the dealership with complete EPOD instructions. However, it is recommended that the dealership contact a carrier supervisor for further assistance.
- ❑ Please contact GLOVIS if you experience any difficulties with EPOD that the carrier is unable to address.

Please consult the electronic version at http://america.glovis.net for the most current information available.

## 2.3 New Vehicle Storage Procedures

The protection and maintenance of new vehicles awaiting delivery to the retail customer is the exclusive responsibility of the Dealer. Any claims arising from deterioration, damages, or shortages that occur during or resulting from storage of new vehicles will not be considered for reimbursement.

### 2.3.1 General Storage Conditions

Vehicles should be stored in a dry, well ventilated, drained place, preferably on a hard or paved surface. If vehicles are stored outside, they should not be parked under trees, power lines, or street lights since fallout damage may occur. Regular maintenance is necessary to prevent rust formation or environmental damage.

### 2.3.2 Dealer Stock Inspections every 30 days (monthly) – Not Covered by Warranty

To improve new owner satisfaction, dealers must ensure every new car is delivered in clean and undamaged condition. As an aid to dealers for new car inventory maintenance, HMA has initiated a 30-day inventory inspection process. This process allows Dealer Sales Managers the opportunity to protect investment in new car inventory and keep inventory fresh and ready for immediate sales delivery.

Every 30 calendar days (monthly) of storage, the responsible dealer will:

- ICE Vehicles: Start the engine (Engine Running) and idle with headlights ON OR use a Hyundai approved battery charger; charge time will be dependent upon battery condition and vehicle model (**see TSB# 24-EE-014H or latest version**).
- Hybrid Electric Vehicles: Enter Ready Mode and idle with headlights ON and follow the specific instructions below depending on the type of the 12V battery:
  - 12V flood/AGM lead-acid batteries: Use of a Hyundai approved battery charger is acceptable (see TSB# 24-EE-014H or latest version).
  - 12V Lithium Polymer batteries: The only acceptable method of charging is idling vehicle in Ready Mode (see TSB# 25-EE-007H, section D or latest version).
- Electric Vehicle (EV) including Plug-in Hybrid (PHEV) vehicles: Ensure the high voltage battery State of Charge (HV BSOC) is above 30% by charging the vehicle using level 1, 2 or 3 charging methods.
  - Maintaining HV BSOC above 30% allows the 12V battery saver feature to function as designed to maintain the 12V BSOC at optimal levels.
- Inspect Vehicle Battery (see Section 2.3.3)
  - This inpsection does not apply to models equipped with integrated 12V Lithium Polymer batteries.
- Move vehicle a minimum of one car length (12 inches if there are capacity issues)
- Conduct interior inspection:
  - Carpets: no dirt, stains or damage
  - Door Panels: no dirt, stains or damage
  - Other Trim: fit, finish, no dirt, stains or damage
  - No Missing Items

- Conduct exterior inspection:
  - Paint: clean, no fallout (bird droppings), or discoloration
  - Exterior Panels: no dings, dents, scratches, scuffs or scrapes
  - Trim: clean, undamaged
  - Wheels and Tires: properly inflated, clean, undamaged and match
  - Sticker or chalk mark on uppermost part of left front wheel every 30 days
- Conduct operation inspections:
  - Clock: set to current time
  - AM/FM/XM/Bluelink operational
  - Windows fully operational
  - Horn, windshield wiper/washer operational
  - HVAC operational
  - Door locks operational (using remote if equipped)
  - Perform the Pre-Delivery Inspection using the PDI App - Pre-Delivery Inspection (PDI)
  - Recurring 30 day (monthly) aged maintenance should be completed using the PDI App - Aged Maintenance

Every 30 days of vehicle storage, the responsible dealer will:

- Complete a battery diagnostic inspection using the Dealer PDI Application-Aged Maintenance inspection module.

These steps will increase the likelihood that vehicles do not return to service within the first few years of ownership for battery replacement.

**2.3.3 12V Lead-acid/AGM Battery Inspection and Maintenance**

Hybrid Electric Vehicles equipped with 12V Lithium batteries should refer to TSB 25-EE-007H for inspection and inventory maintenance information relevant to those models.

The 12V battery in a stored vehicle is subject to conditions that can reduce its performance and life. Regular monthly battery maintenance must be performed by the dealer to ensure proper operation and optimal battery life for the customer. A 12V battery that is not adequately maintained during dealer storage can result in reduced battery life and customer dissatisfaction.

As a matter of warranty policy (2.3.5), Hyundai does not provide warranty coverage for discharged and/or failed batteries due to lack of dealer maintenance. Dealers should inspect batteries within 7 days of arrival from Hyundai. Warranty claims can only be submitted for repairs performed within 7 days of unit delivery at dealers. Claims can only be submitted using the approved testing methods outlined in 25-EE-003H.

It is the dealer's responsibility to maintain the 12V battery in good condition while the vehicle is in dealer stock. Maintaining the battery in good condition will minimize the dealer's battery replacement cost since dealer stock is not covered by Hyundai warranty. The regular upkeep of the battery will also ensure optimal battery performance for the customer.

**The following TSBs contain battery tester information and warranty related procedures.**

- 24-EE-009H – 12V BATTERY HOLD WTC REQUIREMENT
- 24-EE-014H – 12V BATTERY MAINTENANCE FOR INVENTORY & PDI
- 24-EE-013H – WEBDCS BLUELINK SOC ALERTS
- 25-EE-003H – GUIDE TO BATTERY DIAGNOSTICS TSBS

**Note:** The TSBs listed above are subject to change; for the most up-to-date version(s) please visit www.HyundaiDealer.com under the Service tab/Service Programs/Hyundai Tech Info/TSB.

**Dealer Battery Maintenance Schedule** (per TSB 24-EE-014H)

**Note**: Hyundai highly recommends storing dealer stock vehicles in "Shipping Mode" to help reduce battery current draw and conserve Battery State of Charge (SOC%) while vehicles are in dealer lot or storage location.

For more information on Shipping Mode, please review TSB 24-EE-012H-1.

Dealer Option - Covered by Warranty:

**Within 7 days of vehicle delivery to dealer:**
Inspect the battery condition using Battery Test/Claim App on GDS Smart, referencing TSB 25-EE-003H. Warranty claim submission must use the approved process described in the TSB. Take the appropriate action based on the test results:

| Battery Condition | Action |
|---|---|
| D00 or Good Battery (Cadex) | No action required (covered under PDI) |
| D01: Parasitic Draw Detected (non-sleep communications modules)<br>D02: Parasitic Draw Detected (Vehicle Device Short)<br>D03: Vehicle in ACC mode depleting battery<br>D04: Vehicle not operated often<br>or<br>Charge & Retest (Cadex)<br><br>Notes:<br>• D02 tests for inventory units may be submitted to PCR as this is an edge case condition. This code is normally not warrantable for retailed units.<br>• D03/D04 is not warrantable. | Diagnose, repair the specified Battery Condition and utilize either of the following methods to charge the battery:<br>- Run at engine idle with the headlights ON or use battery charger; charge time will be dependent upon battery condition and vehicle model<br><br>Note: Turning the headlights ON induces maximum charging rate of the battery.<br><br>- Charging can be conducted by automatic regulated battery charger. Hyundai recommends DCA8000, Associated Intellimatic or Schumacher DSR124 chargers.<br>- Check the battery again after charging. Battery test result must yield, "Good Battery".<br><br>**Warranty claim submission notes:**<br>- Save the GDS Battery Diagnosis test result for your records. The results should be uploaded to the server automatically. |

| | |
|---|---|
| | - For QX Venue, the Cadex tool per TSB 25-EE-005H, two warranty codes from the battery test result printout below must be submitted with the claim using GDS Smart:<br>o Initial "Charge & Retest" result before charging. This test is sent to servers automatically<br>o "Good Battery" or "Replace Battery" result printout from DCA-8000 after charging must be scanned and submitted to HMA using Battery Test/Claim App. |
| R01/R02/R03/R04 or Replace Battery (Cadex) | Replace Battery<br>- Save the GDS Battery Diagnosis test result for your records. The results should be uploaded to the server automatically.<br>- Retain the battery for WTC collections per 24-EE-009H |

Aged Inventory Maintenance Alerts:

Units requiring Aged Inventory Maintenance can be viewed within WebDCS – Aged Inventory – BlueLink Alerts.

The 12V batteries in dealer inventory must be maintained in reference to TSB 24-EE-013H WEB DCS BLUELINK SOC ALERTS. All battery warranty claims will be reviewed against Aged Maintenance history for approval.

Vehicle delivery to the customer:

Set the vehicle to "Customer Mode". See TSB 24-EE-012H-1 – VEHICLE SHIPPING MODE for more details.

Note: Certain functions will be inoperative if the vehicle is driven while in Shipping Mode.

**Dealer Required - Not Covered by Warranty:**
Dealer stock unit battery maintenance for every 30 days (monthly), every 90 days (3 months), and in conjunction with **WEBDCS Aged inventory - Bluelink SOC Alerts (TSB 24-EE-013H).**
– Check the battery condition with Hyundai's required tools:

| Battery Condition | Action |
|---|---|
| Good Battery | No action required. |

| | |
|---|---|
| Charge & Retest | Use either **option "A" or "B"** below to charge the battery.<br>A. Engine Idle with Headlights ON<br>B. Automatic Regulated Battery Charger<br><br>Charging time will depend on the battery state of charge (SOC) and vehicle model. After charging, check the battery again with a Hyundai approved battery tester and utilize the Battery SOC information on **TSB 24-EE-013H**.<br><br>Battery test results must yield, "Good Battery"<br>Refer to **TSB 24-EE-014H** and **TSB 24-EE-013H** for more details. |
| Replace Battery | Replace Battery at Dealer's expense |

**Please note:** The TSBs listed above are subject to change; for the most updated version(s), please visit www.HyundaiDealer.com under the Service Tab/Service Programs/Hyundai Tech Info/TSB.

**Vehicle delivery to the customer:**
1. Turn ON the power fuse switch in the fuse panel if it was turned off.
If vehicle is equipped with the Quiescent/Dark Current Control system, switch it to minimize "Customer Mode". See TSB 24-EE-012H-1 – VEHICLE SHIPPING MODE for more details.

**Note:** There will be a warning on the instrument cluster if the vehicle is driven with the Power Fuse Switch turned off.

### 2.3.4 Interior Trim and Equipment Protection

Windows, ventilators and heaters should be in a closed position. Should moisture condense in the vehicle, moisture absorbing agents can be installed. This procedure should be especially adhered to in extremely hot or humid locations.

### 2.3.5 Engine Protection and Periodic Maintenance

To help ensure engine protection, the vehicle should be started and run at engine idled with the headlights ON for 20 minutes (or directed by the latest Aged Inventory Maintenance TSB), until either normal operating temperature is reached or required 12V battery maintenance time is achieved to preserve battery life. This procedure should be performed once a month at minimum. While performing this procedure, the Dealer should check fluid levels and potential leakage, unusual noises and/or erratic engine operation, operation of the gear shift lever, the brake pedal, the clutch pedal, the parking brake lever, and also briefly activate the A/C system in fresh air mode to confirm normal operation. The vehicle should be moved a minimum of one car length (12 inches if there are capacity issues) to allow lubrication of parts and to prevent tire flat spots. In cold weather climates, the cooling system should be checked for proper anti-freeze protection.

## Section 3: New Vehicle Preparation and Delivery

### 3.0 Pre-Delivery Inspection

A proper and complete Pre-Delivery Inspection (PDI) is a central element in developing owner confidence in both the Dealer and HMA. A proper PDI minimizes shop comebacks for adjustments and builds owner loyalty while having a direct impact on customer satisfaction experienced during the vital first days of ownership. This inspection is required for each new vehicle as provisioned in the Dealer Service and Sales Agreement (Section 11).

#### 3.0.1 Dealer Requirements for Performance of PDI

The following are the dealer's responsibilities relative to performance of the Pre-Delivery Inspection (PDI):

- The responsibility for performing PDI work must be assigned to qualified Dealership personnel with a valid Hyundai Service ID and password. Every step on the Hyundai Dealer PDI App - Pre-Delivery Inspection (PDI) is to be performed.
- New car preparation should be scheduled far enough ahead of customer delivery in order to avoid any delay caused by required repairs. Coordinate delivery time promises with other shop work being scheduled.
- The Hyundai Dealer PDI App is to be used during the course of performing PDI on each new vehicle. The App lists the inspections and other work which must be performed during PDI.
- Any warrantable repair performed during the Pre-Inspection must be submitted as a separate warranty repair via a warranty claim.
- Each new vehicle is to be road-tested at the proper point during the pre-delivery sequence.
- The Shop Foreman, Lead Tech, or Service Manager is required to carefully review each new vehicle PDI inspection and certify that the services performed are satisfactory by digitally signing the Pre-Delivery Inspection form at the end of each inspection on the PDI App.
- The retail selling dealer must perform the Pre-Delivery Inspection for the first retail purchaser. In the case of a transferred unit, the retail selling dealer may not be the one that performed the PDI. The new owner's lasting impression may well be determined from the first few miles of driving.
- The PDI must be performed prior to vehicle delivery to the first retail owner or placed as a demo. Claims with PDI performed after Retail Delivery Date (RDR) or Demo date will not be accepted by HMA.
- The PDI must be performed prior to vehicle accumulating 250 miles.
- The PDI for IONIQ branded vehicles (e.g. IONIQ 5, IONIQ 6), must be performed by IONIQ certified dealers. Non-IONIQ certified dealers are not authorized to perform PDIs on IONIQ branded vehicles.

### 3.0.2 Pre-Delivery Inspection Form

The Hyundai Dealer PDI Application (the 'HMA PDI App') is to be utilized in all Pre-Delivery Inspections. The Hyundai Dealer PDI App automatically uses the latest PDI model-specific checklist.

It is critical for all inspectors to properly perform the PDI inspection and record any vehicle quality issues directly on the app with supporting documentation. Failure to properly document these items may result in additional claim review and/or disapproval of claim submission.

All PDI submissions must be completed through the HMA PDI Application on the tablet. The PDI 'paper' form is not acceptable method for PDI submission. If a technical issue occurs on the PDI Application, contact GITA Technical Support Center for resolution.

In addition, check for updated PDI related communications:

- Within the PDI Application
- Hyundai Tech Info (HTI) Service Communication
- TechNet Times Publications (HTI)

### 3.0.3 Pre-Delivery Allowance Reimbursement Procedure

Reimbursement for the Pre-Delivery Inspection of the vehicle will be at a labor time in effect as of the date the PDI claim is submitted via WebDCS. Credit will be calculated in the amount of the pre-delivery allowances as specified for each model and year multiplied by your current Dealer approved Warranty Labor Rate.

| Model/Model Years | Model Years From | Model Years To | PDI Times |
|---|---|---|---|
| ELANTRA (CN7) | 2021 | - | 0.8 |
| ELANTRA HEV (CN7) | 2021 | - | 0.8 |
| ELANTRA N (CN7N) | 2022 | - | 0.8 |
| IONIQ 5 (NE1) | 2022 | - | 0.8 |
| IONIQ 5 N (NEN) | 2025 | - | 0.8 |
| IONIQ 6 (CE1) | 2024 | - | 0.8 |
| IONIQ 9 (ME1) | 2026 | - | 0.8 |
| KONA (SX2) | 2024 | - | 0.8 |
| KONA EV (SX2) | 2024 | - | 0.8 |
| NEXO FUEL CELL (FE) | 2019 | - | 0.8 |
| PALISADE (LX3) | 2026 | - | 0.8 |
| SANTA CRUZ(NXT) | 2022 | - | 0.8 |

**Claims**

PDI claim information is entered by the dealer PDI inspector directly in the PDI application. These PDI claims are automatically generated once a user submits the inspection. Failure to complete all sections of the PDI inspection will result in the claim not being automatically generated.

PDI claims should not be manually inputted into WebDCS. If a PDI claim does not automatically generate, there is likely an issue with the inspection and it must be rechecked to ensure all sections are complete and all items are green. If the claim continues to not automatically generate, contact the Warranty Call Center (WCC) for assistance.

For any issues relating to PDI claims, please contact the WCC by using the Warranty Support Portal in WebDCS or by phone at 1-877-446-2922.

## 3.1 Vehicle Delivery Presentation

Proper delivery presentation of a vehicle to the customer has a profound impact on the owner's perception of both the Dealer and the product. A proper delivery presentation will improve customer satisfaction and minimize customer complaints and/or unnecessary inquiries.

### 3.1.1 Dealer Responsibilities

The following are Dealer's responsibilities related to the delivery of the vehicle:

- The customer must be given an Owner's Manual, Owner's Handbook and Owner's Handbook Supplement at the delivery presentation, as well as any other applicable documents.
- A road test should be conducted to demonstrate the operation of the vehicle, as well as to familiarize the customer with the instrumentation and "Key Delivery Features" identified in the Customer Delivery Checklist.
- If a road test is not possible, special emphasis needs to be placed during the delivery presentation on at least these "Key Delivery Features". These features need to be demonstrated to the customer and also shown where within the Quick Reference Guide they can find further information related to these key items.
- The Customer should be given an explanation of HMA's recommended maintenance intervals, as well as the required preventive maintenance with the aid of the maintenance schedule printed on the back cover of the Quick Reference Guide or "QRG".
- Introduce the owner to Service Management and familiarize them with the service procedures and operating hours.

### 3.1.2 Vehicle Registration Procedure – Retail Sale and Dealer Demonstrators

Immediately upon delivery of a vehicle to a retail customer or the vehicle being put into Dealer demonstrator service, a record of the retail delivery or demonstrator service must be transmitted to HMA via the Dealer Communications System, so as to properly register the Warranty start date of the vehicle. The retail delivery date is the date the vehicle was delivered to the customer and the demo service date is the date the vehicle was put into demo service, if applicable.

Vehicles must be registered as a retail sale or demonstrator before accumulating 500 miles.

Any vehicle that has accumulated 500 miles or more is considered to have been placed in service, and therefore the date that the vehicle was placed in service must be accurately reported.

A vehicle's retail delivery date (or if a Dealer Demonstrator, the demo service date) is considered the Warranty start date (i.e. the date recorded as the warranty coverage start date).

In order to automatically change or correct an incorrect Retail Delivery Registration (RDR):

• The incorrect Retail Delivery Registration (RDR) submission must be canceled within 15 days of initial registration with HMA.
• The correct resubmitted (subsequent) Retail Delivery Registration requires that the vehicle's actual mileage be 500 miles or less (if the vehicle's actual mileage exceeds 500 miles, the original retail delivery date from the previous RDR is retained.)

Note: If the vehicle was initially registered as a Dealer demonstrator, the demo service date remains the same as the Warranty start date.

## Section 4: Warranty Policy Statements

### 4.0 General Warranty Statement

Hyundai Motor America provides certain express limited warranties to its customers with respect to new Hyundai vehicles supplied by Hyundai Motor Company, Hyundai Motor Group, Hyundai Motor Manufacturing Alabama, Kia Motors Manufacturing Group, Kia Motors Mexico and distributed by Hyundai Motor America. The terms and conditions of each limited warranty are set forth in this manual as well as in the applicable Owner's Handbook and Warranty Information Booklet.

#### 4.0.1 Company Obligations

Hyundai Motor America warrants to the Dealer that Hyundai Motor America will reimburse the Dealer for repair, replacement, or adjustment of any part of a Hyundai vehicle manufactured by Hyundai Motor Company, Hyundai Motor Group, Kia Motors Manufacturing Georgia (KMMG), Kia Motors Mexico (KMM) or Hyundai Motor Manufacturing Alabama (HMMA) and distributed by Hyundai Motor America (HMA) that is found to be defective in material or workmanship under the stated provisions of the limited warranties, under normal use and maintenance, and within the warranty period. Hyundai Motor America warrants Hyundai vehicles pursuant to the limited warranties described in this manual and the Owner's Handbook and Warranty Information Booklet.

#### 4.0.2 Dealer Obligations

The Dealer is to follow through on all warranty obligations to the Dealer's customer. In addition, the Dealer is to provide warranty service, without charge, to any visiting customer who requests such service. For performing such service, the Dealer should establish an overall system whereby the dealership will be able to supply customers with the necessary service and parts when required.

#### 4.0.3 Warranty Period

The warranty period begins on the date of retail sale or date of first use, or if the vehicle is first placed in service as a "Demonstrator" or "Company" car prior to delivery, on the date it is first placed in service, whichever occurs first. If the vehicle is first placed in service as a "Demonstrator" or "Company" car as previously described and subsequently sold at retail, the original selling dealer must inform the owner of the applicable warranty start date (i.e., the date it was first placed in service). The date of first use is recorded per the Dealer's input of the Retail Delivery Registration (RDR) information via the Dealer Communications System (DCS). The time and mileage limits are detailed in each limited warranty statement. In the event that the vehicle is sold by the original owner while still within the warranty period, the unexpired portion of the Hyundai warranty will be transferred to each subsequent owner. Hyundai Motor America Warranty coverage (excluding 10 year/100,000 mile Powertrain Limited Warranty) applies to the vehicle, regardless of a change in the ownership and is transferable to subsequent owners.

### 4.0.4 Visiting Owner Provisions

An owner will usually return to the original selling Dealer whenever warranty repairs or other services are needed. However, an owner may go to any authorized Hyundai Dealer due to a variety of circumstances such as a change of address, a need for an emergency repair, or even a desire for better service. The owner is to be treated with the same courtesy and service that the Dealer extends to the Dealer's own sales customers.

Upon request by a visiting owner, an authorized Hyundai Dealer is to perform needed warranty or policy repairs on a Hyundai manufactured vehicle distributed by Hyundai Motor America, regardless of whom the selling Dealer may be, providing that the vehicle is still within the warranty period. The Warranty Start Date can be determined by accessing the Warranty Vehicle Information via WebDCS.

### 4.0.5 Magnuson–Moss Act

With the passage of the Magnuson–Moss Warranty Act (Public Law 93–637) (the "Act") in 1975, Congress granted the Federal Trade Commission the authority to establish rules and regulations aimed at encouraging both manufacturers and Dealers to improve the consumer's understanding of warranties. Hyundai Motor America encourages all of its Dealers to become thoroughly familiar with the provisions of the Act.

The Act does not require that a supplier give a warranty, nor does it stipulate that any specific coverage must be provided, but strictly regulates warranties that are given in writing. Further, the Act stipulates that any written warranty, as defined by the Act, must meet certain disclosure requirements. Provided the warranty meets certain substantive requirements, it may be called a "Full (Statement of Duration) Warranty". These requirements include: (a) the repairs must be made in a reasonable time and be effective within a reasonable number of repair visits and (b) implied warranties may not be limited, and no charge can be made to the customer for warranty repairs. The language used in these warranties must be simplified so that they can be easily understood.

A written warranty which does not meet these requirements must be labeled as a "Limited Warranty". Hyundai's vehicle warranty is a limited warranty which complies with the Act. As such, Hyundai's warranty limits the duration of implied warranties to the duration of the expressed warranty.

Under the Act, after December 31, 1976, all retailers of customer goods costing more than $5.00 are required to make available to consumers and prospective customers the written text of the warranty prior to sale. Hyundai Motor America has made available to all Dealers an Owner's Handbook. The Owner's Handbook must be displayed prominently in the Dealer's new vehicle showroom. To fulfill the Dealer's obligation to advise the customer of the written warranty on the vehicle, Dealers should point out the warranty statement in the Owner's Handbook to the customer at the time of purchase (i.e., just before the customer signs the buyer's order). In addition, all purchasers of Hyundai vehicles will be provided a statement of the warranty

coverage through the Owner's Handbook supplied with each new vehicle. Dealers must provide this Owner's Handbook to the customer at the time of vehicle delivery.

**Note:** This warranty coverage information must also be available for review by prospective consumers.

The provisions of the Act also apply to parts and accessories for cars and light trucks. Hyundai Motor America provides a warranty to retail customers on Hyundai Motor America supplied parts and accessories sold to them. Dealers are obligated under the Act to convey this warranty to the purchaser and prospective purchasers. All purchasers or prospective purchasers of Hyundai parts and/or accessories must be provided with a copy of the Hyundai Service Parts and Accessories Limited Warranty.

### 4.0.6 Exclusion of All Other Warranties and Owner's Rights

The limited warranties described in this manual are the only warranties furnished by HMA. HMA does not authorize any person to create or assume for it any other warranty obligation of liability in connection with Hyundai vehicles. These stated warranties give the owner specific legal rights. The owner may also have other rights which may vary from state to state.

### 4.0.7 Warranty Jurisdiction

The New Vehicle Limited, Powertrain Limited, and Anti-Perforation Limited warranties apply to vehicles manufactured to United States specifications which are distributed by Hyundai Motor America, and registered and normally operated in the 50 United States and Washington, D.C. Vehicles manufactured to other than United States specifications, distributed by other than HMA, and registered and normally operated outside the 50 United States and Washington, D.C., are entitled to warranty service on the basis of the warranty applicable to such other country. The Federal Emissions Defect and Emissions Performance Warranties also apply to vehicles registered in the 50 United States and Washington, D.C., the Commonwealth of Puerto Rico, the Virgin Islands, Guam, and American Samoa, including the Commonwealth of the Northern Mariana Islands. Contact the Hyundai Customer Care Center at 1-800-633–5151 prior to performing such a warrantable repair.

### Force Majeure ("Acts of God") Exclusions

HMA will not be liable for any breach of this warranty caused by or resulting from prohibition or restriction by law or regulation of any government, fire, flood, storms, earthquake, epidemic, war, strike, lockout or other labor troubles, accident, riot, Acts of God or other events beyond a party's control.

### Judgement of Warranty Matters

Hyundai Motor America reserves the right to furnish the final decisions in all warranty matters, and if HMA deems it appropriate in certain circumstances, a warranty claim chargeback may be issued at HMA's discretion.

## 4.1 New Vehicle Limited Warranty (2016 - 2026 Model Year Vehicles)

### 4.1.1 Warrantor

Hyundai Motor America (HMA) warrants each new Hyundai 2016 - 2026 Model Year Vehicles pursuant to the limited warranties described in this manual and the Owner's Handbook. New Vehicle Limited Warranty coverages indicated in this manual and the Owner's Handbook and Warranty Information Booklet apply to the vehicle regardless of a change in ownership and is transferable to subsequent owners.

### 4.1.2 Warranty Jurisdiction

These warranties apply to vehicles manufactured to United States specifications which are distributed by Hyundai Motor America and registered and normally operated in the 50 United States and Washington, D.C. Vehicles manufactured to other than United States specifications, distributed by other than HMA, and registered and normally operated outside the 50 United States and Washington, D.C., are entitled to warranty service on the basis of the warranty applicable to such other distributing country.

### 4.1.3 Judgement of All Warranty Matters

Hyundai Motor America reserves the right to furnish the final decisions in all warranty matters.

### 4.1.4 Customer Satisfaction Adjustment Programs

Coverage for certain components may vary under the Hyundai warranties or under one of the scheduled maintenance programs. In certain unique circumstances, Hyundai may decide, as a matter of goodwill, to pay for service or for an item not normally covered by warranty. Also, there may be times when Hyundai will inform all affected Hyundai owners of a special policy to pay for all or part of the cost of certain repairs beyond the terms of the Hyundai warranties. Check with your DPSM to determine whether a special policy applies.

### 4.1.5 Owner's Rights

These stated warranties give owners specific legal rights. Owners may have other rights which vary from state to state depending upon applicable state law.

### 4.1.6 What is Covered

Repair or replacement of any component originally manufactured or installed by Hyundai Motor Company, Hyundai Motor Group, Hyundai Motor Manufacturing Alabama (HMMA), Kia Motors Manufacturing Georgia (KMMG), Kia Motors Mexico (KMM) or Hyundai Motor America (HMA) that is found to be defective in material or factory workmanship under normal use and maintenance, except any item specifically referred to in the Section, 4.1.15 "What is Not Covered".

Towing expense to the nearest Hyundai Dealership or authorized service location is covered when the vehicle is inoperable due to a warrantable defect, within 60 months from the date of original retail delivery, or date of first use, or 60,000 miles.

Repairs will be made using new Hyundai Genuine Parts or Hyundai-authorized remanufactured parts.

**4.1.7 Warranty Period (2016 - 2026 Model Year Vehicles)**
The warranty period for 2016-2026 model year vehicles is limited to 60 months from the date of original retail delivery, date of first use, or 60,000 miles, whichever occurs first.

**4.1.8 Battery (12V, non-Hybrid)**

**Battery (12V, non-Hybrid) (2016 - 2026 Model Year Vehicles)**
An original equipment battery found to be defective in material or workmanship will be covered for the first 36 months from the date of original retail delivery, or date of first use, or 36,000 miles, whichever occurs first.

**4.1.9 Adjustments**
Service Adjustments (minor repairs not usually associated with the replacement of parts) are covered for the first 12 months from the date of original retail delivery, or date of first use, or 12,000 miles, whichever occurs first.

**4.1.10 Air Conditioner Refrigerant Charge**
Air conditioner refrigerant charge is covered for the first 12 months from the date of original retail delivery or date of first use with no mileage limitation unless the refrigerant charge is done as part of a warrantable repair.

**4.1.11 Radio, Sound Systems, Bluelink, Bluetooth & Navigation System (2016 Equus only)**

**Bluelink System**
An original Bluelink system, parts hardware, wire harness, Bluelink unit defects (TMU, rearview mirror, antenna) are covered for the first 60 months from the date of original retail delivery, or date of first use, or 60,000 miles, whichever occurs first.

**Bluetooth System**
An original Bluetooth system, parts hardware, wire harness, module (HFM) and bezel are covered for the first 5 years from the date of original retail delivery, or date of first use, or 60,000 miles, whichever occurs first.

**Navigation System**
An original Navigational System, parts hardware, head unit, bezel trim, antenna and wire harness and software failure are covered for the first 5 years from date of original retail delivery, or date of first use, or 60,000 miles, whichever occurs first.

**4.1.12 AVN (Audio Video Navigation), Sound Systems, Bluelink & Bluetooth (2016 - 2026 Model Year Vehicles)**

**All Models:**
An original equipment AVN, compact disc player, DVD player, speakers, antennas, and antenna leads are covered for the first 60 months from the date of original retail delivery, or date of first use, or 60,000 miles, whichever occurs first.

**Bluelink System (2016 - 2026 Model Year Vehicles)**
An original Bluelink system, parts hardware, wire harness, Bluelink unit defects (TMU, rearview mirror, antenna) are covered for the first 60 months from the date of original retail delivery, or date of first use, or 60,000 miles, whichever occurs first.

**Bluetooth System (2016 - 2026 Model Year Vehicles)**
An original Bluetooth system, parts hardware, wire harness, module (HFM) and bezel are covered for the first 60 months from the date of original retail delivery, or date of first use, or 60,000 miles, whichever occurs first.

**Navigation System (2016 - 2026 Model Year Vehicles)**
An original Navigational System, parts hardware, head unit, bezel trim, antenna and wire harness and software failure are covered for the first 60 months from date of original retail delivery, or date of first use, or 60,000 miles, whichever occurs first.

### 4.1.13 Paint (2016 - 2026 Model Year Vehicles)

Paint repairs are covered for the first 36 months from the date of original retail delivery, or date of first use, or 36,000 miles, whichever occurs first.

Some minor cosmetic imperfections that are visible at delivery are covered for 12 months from the date of original retail delivery, or date of first use, or 12,000 miles, whichever occurs first.

**Sublet Paint Claim Submission Limits:**

- The sublet type on all paint claims is “P1” - Paint.
- ***Paint sublet amount over 100% of the LTS time allowance, even if under $500.00 - is not to exceed 150% of the LTS.***

To calculate the allowance, multiply your labor rate by the total number of paint labor op hours listed on your claim. Then multiply that number by 1.5. This gives you the maximum sublet reimbursable amount.

- All paint labor operations performed on the same day must be listed on one claim.
  - Include paint labor operations for panels that require blending
- Material Allowance is calculated into the Paint Labor Op.

### 4.1.14 Owner’s Responsibilities

- Proper use, maintenance and care of the vehicle in accordance with the instructions contained in the Owner’s Handbook and Owner’s Manual.
- Retain maintenance service records. It may be necessary for the customer to show that the required maintenance has been performed, as specified in the Owner’s Manual.

• Deliver the vehicle during regular service business hours to any authorized Hyundai Dealer to obtain warranty service.
• Check for trim, paint, or other appearance concerns at the time the new vehicle is delivered.

### 4.1.15 What is Not Covered

**Note for Equus vehicles:** Please refer to Equus At Your Service Program for specific information regarding exceptions and additional services for Equus.

• Normal maintenance services such as: cleaning & polishing, minor adjustments, lubrication, oil/ fluid changes, filters, anti-freeze coolant replenishment, wheel alignment and tire rotation unless such services are performed as part of a covered warrantable repair.
• Normal maintenance items such as: belts, brake pads and linings, clutch linings, filters, wiper blades and bulbs (except headlamp bulbs, see Warranty Coverage Guide) are warranted in normal service, only when the replacement is the result of a defect in material or factory workmanship, for 12 months from the date of original retail delivery, or date of first use, or 12,000 miles, whichever occurs first, or up to the first scheduled maintenance replacement interval.
• Normal deterioration or wear of any part such as:
  – Spark plugs
  – Worn brake pads/linings
  – Worn clutch linings
  – Filters
  – Worn wiper blades
  – Bulbs and fuses
  – Other wear and consumable items
• Any vehicle where the odometer mileage has been altered.
• Any vehicle that has been scrapped and a certificate of salvage has been issued for the vehicle.
• Damage or failure resulting from:
  – Negligence of proper maintenance as required in the Owner's Manual.
  – Misuse, abuse, accident, theft or fire.
  – Use of improper or insufficient fuel, fluids or lubricants.
  – Use of parts other than Hyundai Genuine Parts or parts of equivalent quality and design.
  – Any devices and/or accessories not supplied by HMA.
  – Modifications, alterations, tampering, or improper repair.
  – Parts or accessories used in applications for which they were not designed or not approved by HMA.
  – Slight irregularities not recognized as affecting quality or function of the vehicle or parts, such as slight noise or vibration, or items considered characteristic of the vehicle.
  – Tires (See separate tire manufacturer's warranty).

– Damage resulting from airborne “fallout”, salt, hail, windstorms, or other “Acts of God.”
– Action of road elements (sand, gravel, dust, or road debris) which result in stone chipping of paint or glass.
– Paint scratches, dents or similar paint or body damage.
– Parts or glass broken during removal as part of the repair.

• The charge for diagnostic labor which does not lead to the determination that a warrantable condition exists.
• INCIDENTAL OR CONSEQUENTIAL DAMAGES, INCLUDING WITHOUT LIMITATION, LOSS OF TIME, INCONVENIENCE, LOSS OF USE OF THE VEHICLE OR COMMERCIAL LOSS.
• The duration of any implied warranties, including those OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, are limited to the duration of this limited warranty.

Some states do not allow limitations on how long an implied warranty lasts, or the exclusions or limitation of incidental or consequential damage, so the limitation or exclusions set forth regarding this limited warranty may not apply to the owner. The owner may also have other rights which vary from state to state.

Note: Vehicles which contain a non-Hyundai genuine part, or which have been misused, or improperly maintained, will not have the coverage under the New Vehicle Limited Warranty denied, unless the non-genuine Hyundai part, the misuse, or the improper maintenance directly caused or contributed to the subsequent problem.

### 4.1.16 Obtaining Warranty Service

Warranty service will be provided by an authorized Hyundai Motor America Dealer without charge for parts or labor. This warranty will not apply to warranty service performed by those other than an authorized Hyundai Dealer.

### 4.1.17 Wheel & Tire Information

**Wheels (RIMS)**

Wheels are covered for defects in workmanship or material under the New Vehicle Limited Warranty (NVLW).

Wheels damaged due to outside influences including but not limited to: curb damage, excessive washing, or use of unapproved chemicals on the finish are not considered warrantable concerns.

**Tires**

Tires originally equipped on Hyundai vehicles are warranted directly by the tire manufacturer. In the event that the customer needs assistance in locating an authorized tire manufacturer,

please contact Hyundai's Tire Center at 1-888-401-1595, or the applicable Toll Free Number listed below.

| | |
|---|---|
| BF Goodrich Tire: | 800-521-9796 |
| Bridgestone Tire: | 866-775-6480 |
| Continental Tire: | 800-847-3349 |
| Dunlop Tire: | 800-321-2136 |
| Hankook Tire: | 800-426-8252 (West)<br>800-426-5665 (East) |
| Kumho Tire: | 800-445-8646 |
| Michelin Tire: | 800-847-3435 |

**4.1.18 Speedometer/Odometer Repair/Recalibration**

If a speedometer fails within the Hyundai Basic Warranty period of 60 months/60,000 miles, HMA's policy is to recalibrate the new speedometer with the vehicle mileage at the time of failure replacement.

Many states now require that only preset speedometer/odometers be installed. A copy of the repair order and purchase order must be sent with the new speedometer or I/P cluster to the following HMA recommended vendor:

Palo Alto Speedometer, Inc.
718 Emerson Street
Palo Alto, CA 94301
Phone: (650) 323-0243
Email: info@paspeedo.com
www.paspeedo.com

Model Electronics, Inc.
615 East Crescent Avenue
Ramsey, NJ 07446
Phone: (800) 433-9657
Email: cmcgraw@modelelectronics.com
www.modelelectronics.com

Dealers may use their own qualified vendors to recalibrate the new speedometer or I/P cluster. The recalibration final invoice must be attached to the warranty claim.

Turn around time is between one and three days, depending upon the speedometer.

**Warranty Claim Submission Information**

- Submit as a normal warranty claim
- Use the recalibrated mileage on the claim
- Use Op 94210R00 Speedometer Assy or Op 94002R00 Instrumental Cluster Assy
- Charge out the replacement part and list the speedometer/instrument cluster as the causal part
- Input the calibration charge in sublet using the C2 Instrument Cluster Calibration
- Include shipping charges and attach final invoices to the claim in WebDCS
- Submit any applicable rental charges on a separate rental claim

**Vehicles equipped with Instrument Cluster Module / GDS tablet odometer mileage writing:**

For vehicles equipped with separate Instrument Cluster Module and odometer mileage capability through GDS tablet, the dealer must perform the odometer mileage writing process with the GDS tablet. Software verification is required prior to the odometer mileage writing. Please refer to TSB 25-BE-008H or latest version for additional information.

## 4.2 Powertrain Limited Warranty (2016 - 2026 Model Year Vehicles)

### 4.2.1 What is Covered

Repair or replacement of powertrain components listed in Sections 4.2.4 and 4.2.5, originally manufactured or installed by Hyundai Motor Company, Hyundai Motor Group, Hyundai Motor Manufacturing Alabama (HMMA), Kia Motors Manufacturing Georgia (KMMG), Kia Motors Mexico (KMM) or Hyundai Motor America (HMA) that are found to be defective in material or factory workmanship under normal use and maintenance, except any item specifically referred to in the section, “What is Not Covered”.

Towing expense to the nearest Hyundai Dealership or authorized service location is covered when the vehicle is inoperable due to a warrantable defect. For 2016-2026 model vehicles, towing is covered for warrantable defects for 60 months from the date of original retail delivery, or date of first use, or 60,000 miles, whichever occurs first.

Repairs will be made using new Hyundai Genuine Parts or Hyundai authorized remanufactured parts.

Vehicles with the following classifications have the Limited Powertrain Warranty (10/100) for the first retail owner:

A01 - Vehicle repaired and sold as new
A02 - Vehicle repaired and sold as used
A06 - Vehicle repaired and sold as used (except for paint warranty)
A14 - Vehicle not repaired/sold as used (except for paint warranty)
A19 - Hail Damage/repaired/used

Owner’s Responsibilities and Obtaining Warranty Service are the same as specified under the Hyundai New Vehicle Limited Warranty.

### 4.2.2 Warranty Period (2016 - 2026 Model Year Vehicles)

Upon expiration of the 60 months/60,000 miles Hyundai New Vehicle Limited Warranty, for Original owners, this Powertrain Limited Warranty begins and will continue to cover powertrain components* up to 120 months from the date of first use or 100,000 miles, whichever occurs first.
* See section 4.2.4 and 4.2.5.

### 4.2.3 Original Owner (2016-2026 Model Year Vehicles)

Original Owner is defined as the first retail purchaser of the vehicle who took delivery of the vehicle on its date of first use. If the vehicle was first placed in service as a lease vehicle, and the lessee purchases the vehicle at the end of the lease, the 10 years/100,000 miles Powertrain Limited Warranty remains in effect.

If the vehicle was first placed in service as a Hyundai Motor America (HMA) Manager Demonstrator Vehicle or Hyundai Motor America Service Rental Car (SRC) under HMA's Service Rental Car (SRC) Program, the original (first) retail purchaser of the vehicle is considered the original owner, and the 10 years/100,000 miles Powertrain Limited Warranty remains in effect.

If the first retail purchaser of the vehicle is a commercial business, organization or government agency and not placed in commercial use (i.e. taxi, route delivery, livery service, car rental service, etc.), the 10/100,000 Powertrain Limited Warranty remains in effect.

The 10 year/100,000 mile Powertrain Limited Warranty coverage is excluded for vehicles placed in commercial use (i.e. taxi, route delivery, livery service, car rental service, etc.).

(2024-2026 Model Year Vehicles - Powertrain Limited Warranty)
For 2024-2026 model year vehicles, this Powertrain Limited Warranty is only transferable to the spouse or registered domestic partner of the Original Owner. All subsequent owners have powertrain components covered under the 60 months/60,000 miles Hyundai New Vehicle Limited Warranty.

**10 Years/100,000 Miles Powertrain Limited Warranty - Original Owner Verification Affidavit Form**

The 10 years/100,000 miles Powertrain Limited Warranty Original Owner Verification Affidavit Form was developed for the customer and dealer to certify their eligibility for the 10 years/100,000 mile Powertrain Limited Warranty.

The affidavit is required on all powertrain claims associated with the 10 years/100,000 miles Powertrain Limited Warranty. A copy of the customer's current and up-to-date (not expired) owner registration from Department of Motor Vehicles (DMV) to validate powertrain warranty is required with the affidavit.

This affidavit form is not required on Powertrain warranty repairs during the 60 months/60,000 miles coverage period.

### 4.2.4 Engine

Cylinder block/head and all internal parts, manifolds, timing gears, timing chain, timing cover, gasket and seals, oil pump, water pump, flywheel, oil pan assembly, rocker cover, engine mounts, and turbocharger.

### 4.2.5 Transmission/Transaxle

Case and all internal parts, axle shafts, constant velocity joints, hub bearings, propeller shafts, seals and gaskets, torque converter and converter housing and clutch cover and housing, transfer case, and rear differential.

### 4.2.6 What is Not Covered

Items not covered by this warranty and any exclusion or limitations relating to this warranty are the same as those set forth in Section 4.1.15 “What is Not Covered” under the New Vehicle Limited Warranty (2016 - 2026 Model Year Vehicles) section.

## 4.3 Hybrid, Plug-In Hybrid, and Electric Vehicle (EV) Direct Energy Components Warranty

### 4.3.1 What is Covered

Repair or replacement of Hybrid, Plug-In Hybrid, and EV Direct Energy components listed below, originally manufactured or installed by Hyundai Motor Company, Hyundai Motor Group, Hyundai Motor Manufacturing Alabama (HMMA), Kia Motors Manufacturing Georgia (KMMG), Kia Motors Mexico (KMM) or Hyundai Motor America (HMA) that are found to be defective in material or factory workmanship under normal use and maintenance, except any item specifically referred to in the section “What is Not Covered”.
Towing expense to the nearest Hyundai Dealership or authorized service location is covered when the vehicle is inoperable due to a warrantable defect, within 60 months from the date of original retail delivery, or date of first use, or 60,000 miles. For IONIQ branded vehicles (e.g. IONIQ 5, IONIQ 6), warranty repairs should only be performed by IONIQ certified dealers. Non-IONIQ certified dealers are not authorized to perform warranty repairs on IONIQ branded vehicles.
“Owners Responsibilities” and “Obtaining Warranty Service” are the same as specified under the Hyundai New Vehicle Limited Warranty. Repairs will be made using new Hyundai Genuine Parts or Hyundai authorized remanufactured parts.

**Hybrid, Plug-In Hybrid and EV Direct Energy** components include the following:

- Hybrid Battery
- Hybrid Starter & Generator
- Hybrid Power Control Unit
- Auto Transmission and Traction motor (including housing case, clutch and all internal parts

Please note that the above list is not all-inclusive. For additional Hybrid, Plug-In Hybrid and EV Direct Energy warranty components, please refer to the vehicle’s Owner Handbook & Warranty Information.

### 4.3.2 Warranty Period (2016 - 2026 Model Year Vehicles)

The Warranty period for Hybrid, Plug-In Hybrid and EV Direct Energy warranty components is limited to 10 years from the date of original retail delivery or date of first use, or 100,000 miles, whichever occurs first.

### 4.3.3 Lifetime Hybrid/Electric High Voltage Battery Warranty (2012 - 2019 Model Year Vehicles)

Original Owner Only - non-transferable. The Lifetime Battery Warranty covers the Hybrid/Electric High Voltage Battery Assembly throughout the ownership period for the original owner of the vehicle.

Second and subsequent owners - The warranty period for the Hybrid/Electric High Voltage Battery Assembly for second and subsequent owners is limited to 10 years from the date of original retail delivery or date of first use, or 100,000 miles, whichever occurs first.

**Please Note:** The Hybrid High Voltage Battery is covered for 10 years from the date of original retail delivery or date of first use, or 150,000 miles, whichever occurs first under the California Emissions coverage for subsequent owners. For applicable 2012MY - 2015MY Sonata Hybrid certified as a SULEV, 2016MY - 2019MY Sonata Plug-in Hybrid certified as a PZEV; 2018MY - 2022MY Ioniq Plug-in Hybrid certified as a PZEV or TZEV; 2022MY - 2026MY Tucson Plug-in Hybrid, and 2022MY - 2023MY Santa Fe Plug-in Hybrid certified as a TZEV, the Hybrid High Voltage Battery is covered 10 years/150,000 miles for vehicles sold, registered and operated in California, Colorado, Connecticut, Delaware, Maine, Maryland, Massachusetts, New Jersey, New York, Oregon, Pennsylvania, Rhode Island, Vermont, and Washington.

Vehicles certified as a SULEV / PZEV / TZEV* must be sold, registered and operated in California or any state (with the exceptions noted above) that adopts the California Emissions warranty provisions. Certified vehicles are VIN-specific, be sure to check the Hyundai WebDCS Warranty Vehicle Information screen to identify the emission type.

*“Super Ultra Low Emissions Vehicle Standard (SULEV)” / “Partial Zero-Emission Vehicles (PZEV)”/”Transitional Zero Emissions Vehicle (TZEV)”

### 4.3.4 Owner’s Responsibilities

The Owner’s responsibilities are the same as those described in the Hyundai New Vehicle Limited Warranty.

### 4.3.5 What is Not Covered

Items not covered by this warranty and any exclusion or limitations relating to this warranty are the same as those set forth in Section 4.1.14 and 4.1.15 “What is Not Covered” under the New Vehicle Limited Warranty (2016 - 2026 Model Year Vehicles) section.

## 4.4 Anti-Perforation Limited Warranty (2016 - 2026 Model Year Vehicles)

### 4.4.1 What is Covered

Any Hyundai vehicle body sheet metal found under normal use, to have developed a perforation (rust hole through the body panel) from corrosion due to defects in material or workmanship.

### 4.4.2 Warranty Period (2016 - 2026 Model Year Vehicles)

2016 - 2026 Model Year Vehicles: 84 months, unlimited miles, from the date of original retail delivery or the date of first use.

### 4.4.3 Owner's Responsibilities

The Owner's responsibilities are the same as those described in the Hyundai New Vehicle Limited Warranty with the exception of one additional requirement:

- Retain any body repair records. It may be necessary to show that the required anti-corrosion material has been applied to any previously replaced or repaired body components.

### 4.4.4 What is Not Covered

- Exhaust system components.
- Corrosion of any part of the vehicle other than body panels.
- Corrosion of body panels that have been previously repaired or refinished from the original factory finish after the date of retail sale, except for body panels replaced under this Anti- Perforation Limited Warranty.
- Corrosion of any body panel replaced after the date of retail sale, except panels replaced under this Anti-Perforation Limited Warranty.
- Corrosion other than perforation. Cosmetic or surface corrosion due to defects in material or workmanship is covered for 12 months or 12,000 miles (2016 - 2026 Model Year Vehicles).
- Corrosion of the exterior surface of the underbody panels such as floor pan.
- Corrosion resulting from: misuse, accident or fire, stone chipping, airborne "fallout", industrial fallout, acid rain, tree sap, hail, windstorm, or other "Acts of God."
- Corrosion caused by lack of proper maintenance, misuse, or abuse.
- Matching of paint. Painting of the entire vehicle for matching of paint is not covered. Painting of the replaced or repaired panel to match the vehicle's original finish is to be decided by HMA on a case by case basis.
- The charge for diagnostic labor which does not lead to the determination that a warrantable condition exists.
- INCIDENTAL OR CONSEQUENTIAL DAMAGES, INCLUDING WITHOUT LIMITATION, LOSS OF TIME, INCONVENIENCE, LOSS OF USE OF THE VEHICLE, OR COMMERCIAL LOSS.
- The duration or any implied warranties, including those of MERCHANTABILITY and FITNESS FOR A PARTICULAR PURPOSE, regarding perforation defects are limited to the duration of this limited warranty.

Some states do not allow limitations on how long an implied warranty lasts, or the exclusion or limitation of incidental or consequential damages, so the limitations or exclusions set forth regarding this limited warranty may not apply to the owner.

**Note**: Vehicles which contain a non-genuine Hyundai part, or which have been misused, or improperly maintained, will not have the coverage under the Anti-Perforation Limited Warranty denied, unless the non-genuine Hyundai part, the misuse, or the improper maintenance directly caused or contributed to the subsequent problem.

### 4.4.5 Obtaining Warranty Service

In the event of a claim, the Owner must deliver the vehicle to an authorized Hyundai Motor America Dealer for examination and approval by Hyundai prior to any repair or replacement.

Warranty service will be provided by authorized Hyundai Dealers without charge for parts or labor.

## 4.5 Emission Defect Warranty – Federal Vehicle

**2013 Model Year Vehicles and greater Federal Emission Control Warranty Statement**
In accordance with Federal Clean Air Act, as amended, Hyundai Motor America (HMA) warrants to the original and each subsequent owner of each new model Hyundai vehicle that the vehicle: (1) was designed, built and equipped to conform at the time of sale to applicable federal regulations and (2) is free from defects in material and workmanship at the time of sale which would cause the vehicle to fail to conform with such regulations for a period of five (5) years from the date of first use or 60,000 miles, whichever occurs first, except for certain specified major emissions control components for which the coverage is 8 years from the date of original retail delivery, or date of first use, or 80,000 miles, whichever occurs first.

Failures, other than those resulting from defects in material or workmanship, which arise solely as a result of owner abuse and/or lack of proper maintenance are not covered by the warranty.

### 4.5.1 What is Covered - 2013 Model Year Vehicles and greater

The primary components covered are listed in the “5 Years/60,000 Miles Emission Warranty Parts List” and “8 Years/80,000 Miles Warranty Parts List” of the Emission Performance Warranty. (See the Owner’s Handbook & Warranty Information Booklet for details.)

The vehicle itself or any part of the vehicle itself not designated by “*” is not covered by this warranty unless a failure in such vehicle or part causes the vehicle not to conform to applicable emission regulations.

Some items require scheduled replacement as part of the scheduled maintenance of the vehicle. Replacement of these items is warranted in normal service up to the first replacement interval or up to the limits of the applicable emission warranty coverage period, whichever occurs first. (Refer to the Owner’s Manual and its scheduled maintenance section.)

### 4.5.2 Warranty Jurisdiction

This warranty applies to vehicles manufactured to either Federal specifications or California specifications which are distributed by Hyundai Motor America and registered and normally operated in the 50 United States and Washington, D.C.

## 4.6 Emission Performance Warranty – Federal Vehicle

### 4.6.1 What is Covered - 2013 Model Year Vehicles and greater

Some states and local jurisdictions have established periodic vehicle inspection and maintenance (I/M) programs to encourage proper maintenance of the vehicle. If an I/M program in the customer's area has U.S. Environmental Protection Agency (EPA) approval, the customer may be eligible for HMA's Emission Performance Warranty coverage under the following conditions:

1. The vehicle has been maintained and operated in accordance with the scheduled maintenance instructions described in the Owner's Manual provided with the vehicle;
2. The vehicle fails to conform during the warranty period to the applicable emission standards as determined by an emissions test approved by the Environmental Protection Agency (EPA), and
3. The failure to conform results, or will result, in the owner of the vehicle having to bear a penalty or other sanctions, such as denial of the right to operate or use the vehicle or a fine under local, state or federal law.

If all of the above conditions are met, HMA warrants that any authorized Hyundai Dealer will replace, repair or adjust to Hyundai's specifications, at "NO CHARGE", any of the components listed under Section 4.7.4 "Warranty Parts List", which may be necessary to cause the vehicle to conform to the applicable federal emission standards.

### 4.6.2 Warranty Jurisdiction

This warranty applies to vehicles manufactured to either Federal specifications or California specifications which are distributed by Hyundai Motor America and registered and normally operated in the 50 United States and Washington, D.C.

### 4.6.3 Warranty Period

2013 Model Year Vehicles and greater

This warranty is effective for 5 years from the date of original retail delivery; if the vehicle is first placed in service as a "Demonstrator" or "Company" car prior to delivery, on the date it is first placed in service, or 60,000 miles, whichever occurs first, except for certain specified major emissions control components for which the coverage is 8 years from the date of original retail delivery, or date of first use, or 80,000 miles, whichever occurs first. This warranty coverage applies to the vehicle regardless of a change in ownership and is transferable to subsequent owners.

### 4.6.4 Warranty Parts List

Some items require scheduled replacement and are warranted up to the first replacement interval or up to the limits of the applicable emission warranty coverage period, whichever occurs first. (Refer to the Scheduled Maintenance section in the Owner's Manual). For a listing

of emission covered parts, please refer to the applicable Owner's Handbook and Warranty Information Booklet.

### 4.6.5 What is Not Covered By These Emission Warranties

**The Emission Defect Warranty and the Emission Performance Warranty shall not apply to:**

- Normal maintenance service (such as filters).
- Malfunctions in any part directly caused by misuse, modification, improper adjustments, alterations, tampering, disconnections, improper or inadequate maintenance, or use of leaded gasoline or contaminated fuel.
- Damage resulting from an accident or an "Act of God".
- Any vehicle on which the odometer reading has been altered so that mileage cannot be readily determined.
- Failures that are a direct result of a lack of performance of required emission control maintenance as outlined in the Owner's Manual.
- Parts or accessories used in applications for which they were not designed or not approved by HMA.
- Parts not supplied by HMA or damage to other parts caused directly by using non-Hyundai parts, non-EPA certified replacement parts in the maintenance or repair of the vehicle which ultimately proves to be defective in material, or workmanship, or not equivalent from an emission control standpoint to the original equipment part.
- The charge for diagnostic labor which does not lead to the determination that a warrantable condition exists.
- INCIDENTAL OR CONSEQUENTIAL DAMAGES INCLUDING WITHOUT LIMITATION, LOSS OF TIME, INCONVENIENCE, LOSS OF USE OF THE VEHICLE, OR COMMERCIAL LOSS.

The duration of any implied warranties, including those OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE regarding emissions systems defects are limited to the duration of these emission system warranties.

Some states do not allow limitations on how long an implied warranty lasts, or the exclusion or limitation of incidental or consequential damages, so the limitations or exclusions set forth regarding these warranties may not apply to the owner.

**Note**: Vehicles which contain a non-genuine Hyundai part, or which have been misused, or improperly maintained, will not have the coverage denied under the Emissions Control Systems Defect Limited Warranty, Emissions Defect Warranty, or Emissions Performance Warranty, unless the non-genuine Hyundai part, the misuse, or the improper maintenance directly caused or contributed to the subsequent problem.

### 4.6.6 Owner's Responsibility

It is the owner's obligation to properly maintain and use the vehicle in accordance with HMA's written instructions in the Owner's Manual. Failures caused by inadequate or improper maintenance are not covered by the warranty. To help resolve questions as to whether the

proper vehicle maintenance has been performed, HMA urges that the owner retain all maintenance service records and receipts indicating that service has been performed on the vehicle.

**4.6.7 Replacement Parts**

It is recommended that any replacement parts used for maintenance or for the repair of emission control systems be new or remanufactured Hyundai Genuine Parts.

***The warranty obligations are not dependent upon the use of any particular brand of replacement parts. The owner may elect to use non-genuine Hyundai parts for replacement purposes. The use of replacement parts which are not equivalent may impair the effectiveness of the emission control system.***

If other than Hyundai Genuine Parts are used for maintenance replacements or for the repair of components affecting emission control, the owner should determine that such parts are warranted by their manufacturer to be equivalent to Hyundai Genuine Parts in performance and durability.

New or remanufactured Hyundai Genuine Parts when used in connection with Hyundai vehicles means parts manufactured by or approved by Hyundai, designed for use on Hyundai Vehicles and distributed by HMA.

**4.6.8 Maintenance Service**

Maintenance replacement or repair of the emission control devices and systems may be performed by any qualified automotive repair establishment or individual using any part certified pursuant to applicable emission regulations, however, warranty service must be performed by an authorized HMA dealer.

Claims under the Emission Performance Warranty may not be denied due to the failure of a properly installed certified non-Hyundai Genuine Part. Claims may be denied on the basis of an uncertified replacement part used in the maintenance or repair of a vehicle if Hyundai presents evidence that the uncertified replacement part is either defective in materials or workmanship or not equivalent from an emission standpoint to the original equipment part and the vehicle owner is unable to rebut the evidence.

Receipts covering the performance of maintenance services should be retained in the event questions arise concerning maintenance. These receipts should be transferred to each subsequent owner of this vehicle. HMA reserves the right to deny warranty coverage if the vehicle has not been properly maintained. However, denial will not be based solely on the absence of maintenance records.

These warranties apply only to vehicles manufactured to United States specifications which are distributed by Hyundai Motor America and registered and normally operated in the 50 United States and Washington, D.C., the Commonwealth of Puerto Rico, the Virgin Islands, Guam,

American Samoa, including the Commonwealth of the Northern Mariana Islands. Vehicles manufactured to other than United States specifications, distributed by other than HMA and registered and normally outside the 50 United States and Washington, D.C., the Commonwealth or Puerto Rico, the Virgin Islands, Guam, and American Samoa or the Commonwealth of the Northern Mariana Islands are entitled to service of the emission control systems on the basis of the warranty applicable to such other distributing country.

**4.6.9 Claims Procedure**

To obtain warranty service under these warranties, the owner should return the vehicle to an authorized HMA Dealer's place of business during its normal service business hours, where such service will be performed at no charge for parts, labor, diagnosis, and tax.

If an owner's claim under the Emission Performance Warranty is denied, HMA will provide the owner with a written explanation of why the claim was denied (1) within 30 days from the time the owner brings the car to a HMA Dealer or (2) within the time required by local, state, or federal law for the vehicle to be repaired without incurring further penalty, whichever is shorter. Failure to provide an explanation within a 30 day period shall obligate HMA to remedy the nonconformity under the Emission Performance Warranty except:

- When delay is requested by the vehicle owner.
- When delay is caused by factors beyond the control of HMA or authorized HMA Dealers.

If the HMA Dealer cannot repair the vehicle or process the owner's claim within a reasonable time, the customer is to contact Hyundai's Customer Care Center at 1-800-633-5151 for assistance.

The Environmental Protection Agency (EPA) is authorized to investigate the failure of manufacturers to comply with the terms of emission warranties. If the vehicle owner has followed Hyundai's procedures (including those for appeals) for making a warranty claim as set out in the Owner's Handbook, has received a written denial and is not satisfied with Hyundai's determination, the vehicle owner may submit a letter to EPA at the following address. It should provide details of the situation including the basis for the claim, a copy of the written denial, copies of the vehicle owner's letters to Hyundai, and copies of any receipts for emission control parts and repairs that the vehicle owner has paid for:

## 4.7 California Emission Control Systems Warranty Statement *(2005 - 2026* Model Year Vehicles)

### 4.7.1 Warranty Jurisdiction

This warranty applies exclusively to vehicles manufactured to California Emission specifications which are distributed by Hyundai Motor America and registered in the states of:

**5 Years/60,000 Miles and 7 Years/70,000 Miles:**

**California** (2008 - 2026 Model Year Vehicles)
Colorado (2022 - 2026 Model Year Vehicles),
Connecticut (2008 - 2026 Model Year Vehicles),
Delaware (2014 - 2026 Model Year Vehicles),
Maine (2008 - 2026 Model Year Vehicles),
Maryland (2011-2026 Model Year Vehicles),
Massachusetts (2008 - 2026 Model Year Vehicles),
New Jersey (2009 - 2026 Model Year Vehicles),
New York (2016 - 2026 Model Year Vehicles),
Oregon (2009 - 2026 Model Year Vehicles),
Pennsylvania (2008 - 2026 Model Year Vehicles),
Rhode Island (2008 - 2026 Model Year Vehicles),
Vermont (2008 - 2026 Model Year Vehicles),
Washington (2009 - 2026 Model Year Vehicles)

**15 Years/150,000 Miles and 10 Years/150,000 Miles for specific models listed in this section certified by California as SULEV/PZEV/TZEV**:

**California** (2004-2026 Model Year Vehicles),
Colorado (2022 - 2026 Model Year Vehicles),
Connecticut (2008 - 2026 Model Year Vehicles),
Delaware (2018 - 2026 Model Year Vehicles),
Maine (2009 - 2026 Model Year Vehicles),
Maryland (2011-2026 Model Year Vehicles),
Massachusetts (2006 - 2026 Model Year Vehicles),
New Jersey (2009 - 2026 Model Year Vehicles),
New York (2004 - 2026 Model Year Vehicles),
Oregon (2009 - 2026 Model Year Vehicles),
Pennsylvania (2018 - 2026 Model Year Vehicles),
Rhode Island (2008 - 2026 Model Year Vehicles),
Vermont (2007 - 2026 Model Year Vehicles).
Washington (2018 - 2026 Model Year Vehicles).

This coverage exists **in addition** to that of the Emission Defect Warranty for Federal vehicles and the Emissions Performance Warranty for Federal vehicles.

**Warranty Rights and Obligations**

The California Emission Control System Warranty applies to Hyundai vehicles certified for sale in California and registered and operated in California, Colorado, Connecticut, Delaware, Maine, Maryland, Massachusetts, New Jersey, New York, Oregon, Pennsylvania, Rhode Island, Vermont, and Washington. HMA warrants the emission control system on Hyundai vehicles for the periods of time listed above, provided there has been no abuse, neglect or improper maintenance of the Hyundai vehicle.

The emission control system includes parts such as the fuel injection system, ignition system, catalytic converter, and engine computer.

Also included may be hoses, belts, connectors and other emission-related assemblies.

Where a warrantable condition exists, HMA will repair the Hyundai vehicle at no cost to the owner including diagnosis, parts and labor.

**4.7.2 Manufacturer's Warranty Coverage**

**2010 Model Year Vehicles and prior - See Applicable Owners Handbook**
**2013 Model Year Vehicles and greater**

1. For 5 years or 60,000 miles (whichever occurs first):
   – If the Hyundai vehicle fails a Smog Check inspection, all necessary diagnosis, repairs and adjustments will be made by HMA to ensure that the vehicle passes the inspection. This is the Emission Control System PERFORMANCE WARRANTY.
   – If any emission-related part on the vehicle is defective, the part will be repaired or replaced by HMA. This is the short-term Emission Control System DEFECT WARRANTY.

2. For 7 years or 70,000 miles (whichever occurs first):
   – If an emissions-related part listed in the Owner's Handbook on the Warranty Parts List with coverage for 7 years or 70,000 miles (whichever occurs first) is defective, the part will be repaired or replaced by HMA. This is the long-term Emission Control System DEFECT WARRANTY.

3. For 15 years or 150,000 Miles (whichever occurs first) for applicable 2004MY - 2026MY Elantra/Hybrid, 2013MY Elantra GT, 2013MY - 2014MY Elantra Coupe, 2009MY - 2026MY Sonata/Hybrid, 2010MY - 2026MY Tucson/Hybrid, 2022MY – 2026MY Kona, 2020MY – 2026MY Santa Fe/Hybrid certified as a SULEV; applicable 2016MY - 2019MY Sonata Plug-in Hybrid certified as a PZEV; applicable 2018MY - 2022MY Ioniq Plug-in Hybrid certified as a PZEV or TZEV; applicable 2022MY – 2026MY Tucson Plug-In Hybrid, and 2022MY – 2023MY Santa Fe Plug-in Hybrid certified as a TZEV:
   – All parts covered under the PERFORMANCE WARRANTY and the DEFECT WARRANTY, which are listed in the Owner's Handbook on the Emission Warranty Parts List with coverage for 15 years or 150,000 miles (whichever occurs first), unless otherwise stated. This coverage applies to vehicles sold, registered and

operated in California, Colorado, Connecticut, Delaware, Maine, Maryland, Massachusetts, New Jersey, New York, Oregon, Pennsylvania, Rhode Island, Vermont, and Washington (see NOTE). Vehicles certified as either a SULEV / PZEV / TZEV must be sold, registered and operated in California or any state that adopts the California Emissions warranty provisions. Certified vehicles are VIN specific. Be sure to check the Hyundai WebDCS Warranty Vehicle Information screen to identify the emission type.

4. For 10 years or 150,000 Miles (whichever occurs first) for the applicable 2012MY - 2015MY Sonata Hybrid certified as a SULEV, 2016MY - 2019MY Sonata Plug-in Hybrid certified as a PZEV; 2018MY - 2022MY Ioniq Plug-in Hybrid certified as a PZEV or TZEV; 2022MY – 2026MY Tucson Plug-In Hybrid and 2022MY – 2023MY Santa Fe Plug-in Hybrid certified as a TZEV:

– The Hybrid High Voltage Battery is covered under California Emissions Coverage for vehicles sold, registered and operated in California, Colorado, Connecticut, Delaware, Maine, Maryland, Massachusetts, New Jersey, New York, Oregon, Pennsylvania, Rhode Island, Vermont, and Washington (see NOTE)

NOTE: See section 4.7.1 for applicable model years by state.

**4.7.3 Owner's Warranty Responsibilities**

The Hyundai vehicle owner is responsible for the performance of the required maintenance listed in the Owner's Manual. HMA recommends that the owner retain all receipts covering maintenance on their Hyundai vehicle, but HMA will not deny emission warranty coverage solely for the lack of receipts or for failure to ensure the performance of all scheduled maintenance.

- The customer is responsible for presenting their Hyundai vehicle to a HMA Dealer as soon as a problem exists. The warranty repairs should be completed in a reasonable amount of time, not to exceed 30 days.
- The Hyundai vehicle owner should also be aware that HMA may deny their warranty coverage if their Hyundai vehicle or a part has failed due to abuse, neglect, improper maintenance or unapproved modifications.

If the owner has any questions regarding their warranty rights and responsibilities, the owner should contact Hyundai's Customer Care Center at 1-800-633-5151, or the Chief, Mobile Source Operations Division, California Air Resources Board at 9528 Telstar Avenue, El Monte, CA 91731.

**Note:** According to Federal Regulations, the vehicle may also be eligible for additional warranty coverage under the Federal Emission Warranty.

**4.7.4 Warranty Parts List (California Spec Vehicles only)**

California requires minimum emission warranty coverage for the first 7 years or 70,000 miles for certain "high cost" emission related parts, determined by a California government specified formula.

Hyundai provides greater warranty coverage of 5 years or 60,000 miles for all emission related components and 8 years or 80,000 miles coverage for catalytic converters, the electronic engine control module, and the onboard emissions diagnostic device. Hyundai also provides coverage for the first 7 years or 70,000 miles for other “high cost” emission related parts, determined by a California government specified formula.

The 5 year/60,000 miles, 7 year/70,000 miles, or 15 year/150,000 miles (For 2023MY, select Elantra, Sonata, Kona, Santa Fe and Tucson certified as SULEV; and Santa Fe Plug-In Hybrid and Tucson Plug-In Hybrid models certified as TZEV) Emission Control System Defect Warranty covers any part that affects emissions. Check the Owner’s Handbook and Warranty Information Booklet for specific coverages on California Spec & Federal Spec VINs.

Some items are scheduled for replacement as part of the required maintenance for the vehicle. Replacement of these items is warranted up to the first replacement interval or up to the limits of the applicable Emission Warranty coverage period, whichever occurs first (refer to the Scheduled Maintenance chart in the Owner’s Manual). Any such part repaired or replaced under warranty shall be warranted for the remainder of the warranty period, for that part.

If the failure of a warranted component causes damage to any other vehicle part, both parts will be covered by the Emission Warranties.

**4.7.5 Warranty Start Date**

The above-mentioned warranty periods shall begin on the date the vehicle is delivered to the first retail purchaser, or if the vehicle is first placed in service as a demonstrator or company car prior to sale at retail, on the date the vehicle is first placed in such service.

**4.7.6 What is Not Covered**

**The Emission Control System Defects Warranty and the Emission Control System Performance Warranty shall not apply to:**

- Malfunctions in any part directly caused by abuse, misuse, modification, improper adjustment (except those done by a dealership during warranty service work), alterations, tampering, disconnections, improper or inadequate maintenance, neglect or use of leaded gasoline or other fuels not recommended in the Owner’s Manual.
- Damage resulting from an accident or an “Act of God”.
- Any vehicle on which the odometer reading has been altered so that mileage cannot be readily determined.
- Failures that are a direct result of a lack of performance of required emission control maintenance as outlined in the Owner’s Manual.
- Parts or accessories used in applications for which they were not designed or not approved for use by HMA.

- Parts not supplied by HMA or damage to other parts caused directly by non-Hyundai parts or non-equivalent parts.
- The charge for diagnostic labor which does not lead to the determination that a warrantable condition exists.
- INCIDENTAL OR CONSEQUENTIAL DAMAGES, SUCH AS, LOSS OF TIME, INCONVENIENCE, LOSS OF USE OF THE VEHICLE, OR COMMERCIAL LOSS.
- The duration of any implied warranties, including those of MERCHANTABILITY and FITNESS FOR A PARTICULAR PURPOSE, regarding emissions systems defects, are limited to the duration of this limited warranty.

Some States do not allow limitations on how long an implied warranty lasts or the exclusion or limitation of incidental or consequential damage, so the limitations or exclusions set forth regarding this limited warranty may not apply to the vehicle owner.

**Note**: Vehicles which contain a non-genuine Hyundai genuine part, or which have been misused, or improperly maintained, will not have the coverage under the California Emissions Control Systems Warranty denied, unless the non-genuine Hyundai part, the misuse, or the improper maintenance directly caused or contributed to the subsequent problem.

### 4.7.7 Replacement Parts

It is recommended that any replacement parts used for maintenance, repair or replacement of the emission control systems be parts supplied by HMA.

Maintenance, repair or replacement of the emission control system may be performed by any qualified automotive repair facility or individual, using parts other than Hyundai Genuine Parts without invalidating this warranty.

However, the cost of such maintenance and parts will not be covered under this warranty unless it is an “emergency repair” situation. Refer to “Emergency Repair” for definition of emergency repair situation.

Use of replacement parts which are not equivalent in quality to Hyundai Genuine Parts may impair the effectiveness of the emission control system. The owner should make sure such parts are warranted by their manufacturer to be equivalent in design and quality to Hyundai supplied parts. HMA assumes no liability under this warranty for any vehicle damage caused by a defect in any such parts.

### 4.7.8 Obtaining Emission Warranty Service

To obtain warranty service under these warranties, the owner must return the Hyundai vehicle to any authorized HMA Dealer in California, Connecticut, Delaware, Maine, Maryland, Massachusetts, New Jersey, New York, Oregon, Pennsylvania, Rhode Island, Vermont, or Washington during its normal service business hours, where such service will be performed.

When failing a Smog Check Test, an authorized HMA Dealer may ask the owner to provide proof that the required maintenance was performed when the Dealer has reason to believe that the required maintenance:

- Was not performed, and
- If not performed, may be the cause for the particular vehicle exceeding applicable emission standards.

For a Smog Check Test failure, if your warranty claim under the Emission Control Systems Limited Warranties is denied, HMA or its Dealer will provide the owner with a written explanation of why the claim was denied within 30 days from the time the owner brings the car to a HMA Dealer.

If the authorized Hyundai Dealer does not notify the vehicle owner within 30 days that a warrantable condition does not exist, then HMA will repair the vehicle free of charge, unless:

- The delay is requested by the Hyundai vehicle owner.
- The delay is caused by factors beyond the control of HMA or an authorized HMA Dealer.

The lack of availability of warranted parts within 30 days shall constitute an emergency situation (see Section 4.7.9–Emergency Repair).

**4.7.9 Emergency Repair**

In an emergency, where the vehicle is inoperable or unsafe and an authorized HMA Dealer is not reasonably available, warranty repairs may be made at any available service facility or by the owner using any replacement part. A repair not being completed within 30 days also constitutes an emergency.

HMA will reimburse the owner for expenses including diagnostic charges, for repairs covered by this warranty, for parts at HMA's suggested retail price and for labor at a geographically appropriate labor rate per HMA's recommended time allowance.

For reimbursement, the owner must contact the Hyundai Customer Care Center at 1-800-633-5151. HMA assumes no liability for the workmanship of the repair facility.

**4.7.10 California Vehicle Inspection Program**

**2010 Model Year Vehicles and prior** - See Applicable Owner's Handbook

**2013 Model Year Vehicles and greater**

If a Hyundai 2013 Model Year Vehicle or greater fails to pass a Smog Check test after a period of use of 5 years or 60,000 miles, but before a period of use of 8 years or 80,000 miles, whichever occurs first, the owner may choose to have their vehicle repaired at an authorized HMA Dealer or another service facility.

In the event that the HMA Dealer determines that the smog check failure was caused by the failure or malfunction of a part listed in this Owner's Handbook specially noted with coverage for 8 years or 80,000 miles, then the Hyundai vehicle will be repaired under this limited warranty at no expense to the owner, unless the part failure or malfunction was caused by abuse, neglect, or improper maintenance.

However, if the authorized HMA Dealer determines that the smog check failure was directly caused by abuse, neglect, or improper maintenance, then the owner will be responsible for all diagnostic and repair costs related to detecting and repairing the Hyundai vehicle so it will pass the Smog Check Test.

If the owner chooses to have their Hyundai vehicle repaired at a service facility other than an authorized HMA Dealer, HMA will not be liable for any diagnostic and repair expenses, except where such repair is necessary by reason of an emergency. If the Hyundai vehicle is determined to fail the Smog Check Test by such service facility, the owner may deliver their Hyundai vehicle to an authorized HMA Dealer and have it repaired free of charge in accordance with this warranty.

## 4.8 Replacement Parts and Accessories Limited Warranty

### 4.8.1 What is Covered

Warranty coverage is for repair or replacement of any Hyundai Genuine Replacement Part or Accessory supplied from Hyundai Motor America and installed on Hyundai vehicles which is found to be defective in material or workmanship under normal use and maintenance, except any item specifically referred to in the Section 4.8.6 “What is Not Covered”.

Repairs are to be performed using New Hyundai Genuine Parts or Hyundai authorized remanufactured parts. Parts/Accessories that were sold and installed by an Authorized Hyundai Dealer will be repaired or replaced without charge for diagnosis, parts/accessories and labor. If the parts/accessories were not originally installed by an Authorized Hyundai Dealer, they will be repaired or replaced without charge for parts/accessories, but labor charges will not be covered.

Exception to policy: Engine assembly, transmission assembly, or electric high voltage battery that fails during the replacement part warranty period will need to be diagnosed by an Authorized Hyundai Dealer. If the engine, transmission, or high voltage battery is determined to be defective in material or workmanship, HMA will reimburse parts and labor to an Authorized Hyundai Dealer to replace the defective component(s). Prior Approval from the PA Center is required for engine assembly, transmission assembly, and electric high voltage battery. Initial diagnosis will be customer pay until the dealer diagnostic is complete and verified as a manufacturing defect.

Not warrantable: If replacement part(s) failure was due to incorrect installation by a third-party repair facility, the third-party repair facility will be responsible for repair costs (parts & labor) associated with the incorrect installation. Failure to follow HMA published repair procedures (e.g., TSBs) will result in disapproval of claim submission.

### 4.8.2 Replacement Parts Warranty Period

The Replacement Parts Limited Warranty Period is limited to twelve (12) months from the date of installation or twelve thousand (12,000) miles of service, whichever occurs first, for Hyundai Genuine replacement parts supplied by HMA and purchased from and installed by an authorized Hyundai Motor America Dealer, which were installed beyond the time and mileage limits of the New Vehicle Limited, Powertrain, Emissions Defect, Emissions Performance, California Emissions Control System, and Anti-Perforation Warranties.

Parts replaced free of charge to the customer under the terms of the New Vehicle Limited Warranty, Powertrain Warranty, Emission Defect Warranty, Emission Performance Warranty, or California Emission Control System Warranty are warranted for the remainder of the time/mileage coverage applicable to the warranty coverage under which the part/accessory was previously replaced.

The twelve (12) month/twelve thousand (12,000) miles Hyundai Parts and Accessories Limited Warranty only applies to genuine Hyundai parts supplied by HMA and that were purchased from an authorized HMA dealer. Those parts replaced under one of the above noted Hyundai Warranties will be warranted for the remainder of the warranty coverage that the part was replaced under.

> **Example:**
> A heater control switch on a 2017 Sonata is replaced under the terms of the Hyundai New Vehicle Limited Warranty at fifty-nine (59) months/fifty-nine thousand (59,000) miles. The heater control switch is covered under the sixty (60) months/sixty thousand (60,000) miles Hyundai New Vehicle Limited Warranty. The heater control switch that was installed at fifty-nine (59) months/fifty-nine thousand (59,000) miles is covered for the remainder of the 60 month/60,000 miles, or an additional 1 month/1,000 miles and not for an additional 12 months/12,000 miles.

Certain Emission Control System items require scheduled replacement as part of the scheduled maintenance of the vehicle (i.e. spark plugs). Replacement of these items is warranted in normal service up to the first replacement interval (time or mileage), or the emissions warranty period (Refer to the Owner's Manual and its scheduled maintenance section).

Genuine Hyundai Parts and Accessories supplied by HMA and purchased from an authorized Hyundai Motor America Dealer, but not installed by an authorized Hyundai Dealer are covered twelve (12) months/unlimited mileage from the date of purchase from the authorized Hyundai Motor America Dealer.

### 4.8.3 Replacement Batteries

Hyundai replacement batteries installed after 36 months from the date of first use are covered for twelve (12) months/unlimited mileage from date of installation or retail sale. If the replacement battery was originally installed by a Hyundai Dealer, the labor to remove and replace the battery is also covered.

After this twelve (12) month period, dealer warranty reimbursement will be made on a prorated basis of the current dealer net cost of the battery to a maximum of forty-eight (48) months/unlimited mileage from the date of installation. Refer to the Replacement Battery Proration Chart located in the 9.0 Warranty Resources section of this manual. The labor to remove and replace the battery is not covered after this twelve (12) month period and is to be charged to the customer.

### 4.8.4 Accessory Warranty Period

**Accessories installed by authorized Hyundai dealer**

**Model Year 2018 - 2026 vehicles**

A Hyundai Genuine Accessory installed by an Authorized Hyundai Dealer on a new Hyundai vehicle **at the time of, prior to, or after the vehicle's date of delivery to the original retail purchaser,** or the date the vehicle is first put into service, is covered for 1 year / unlimited mileage, whichever occurs first from the date of original date of original retail delivery or date for first use. The accessories may also be covered by a separate manufacturer warranty. Please refer to the specific accessory for full details.

Certain accessories, such as Thule, are covered by its own manufacture warranty and do not carry any warranty provided by Hyundai.

**Note:** Port Installed Accessories prior to RDR is covered under the New Vehicle Limited Warranty and is limited to 60 months from the date of original retail delivery, or date of first use, or 60,000 miles, whichever occurs first.

**Model Year 2016 - 2017 vehicles**

An accessory installed on a new Hyundai vehicle **at the time of, or prior to** the vehicle's date of delivery to the original retail purchaser, or the date the vehicle is first put into service, whichever is earlier, is covered under the New Vehicle Limited Warranty and is limited to 60 months from the date of original retail delivery, or date of first use, or 60,000 miles, whichever occurs first. This would include all Port Installed and Dealer installed Accessories prior to RDR.

An accessory installed after the vehicle has been retailed or placed into service shall be warranted for the remainder of the New Vehicle Limited Warranty, up to 60 months from the date of original retail delivery, or date of first use, or 60,000 miles, whichever occurs first.

An accessory installed after the vehicle has been retailed or placed into service shall be warranted for twelve (12) months or twelve thousand (12,000) miles, whichever occurs first, from the date of purchase or installation.

**Accessories sold over the counter**

An accessory purchased over-the-counter is warranted for twelve (12) months/unlimited mileage.

An air conditioning system installed by an authorized Hyundai Motor America Dealer is covered for twelve (12) months or twelve thousand (12,000) miles, whichever occurs first, or the remainder of the New Vehicle Limited Warranty, whichever is greater, from the date of installation. An AM/ FM radio, cassette player, CD/DVD player or air conditioning system purchased over-the-counter is warranted for twelve (12) months/unlimited mileage.

An AM/FM radio, cassette player and CD/DVD player are covered for 12 months, unlimited mileage, if purchased and installed after the vehicle has been retailed or placed into service.

A Bluetooth system, if installed after the vehicle has been retailed or placed into service, is covered for 12 months, or 12,000 miles.

### 4.8.5 Owner's Responsibilities

• Proper use, maintenance, and care of the vehicle (part) in accordance with the instructions contained in the Owner's Manual.
• Retention of maintenance service records. It may be necessary for the customer to demonstrate and prove that the required maintenance has been performed as specified in the Owner's Manual.
• Retention of the Customer's copy of the original repair order or original part counter sales receipts. The repair order or sales slip receipt will state the date of the parts sale. For parts originally installed by an authorized Hyundai Dealer, the repair order must also state the mileage of the vehicle at the time of original replacement.
• Delivery of the part or accessory and supporting documentation indicating the date and if applicable, mileage at time of purchase and installation during regular parts and/or service hours to any authorized Hyundai Dealer to obtain warranty service.

### 4.8.6 What is Not Covered

• Normal maintenance services of parts or accessories such as: cleaning, adjustment or replacement (i.e. spark plugs that are oil fouled, lead fouled, or which fail due to the use of low grade fuel).
• Parts or accessories that fail due to abuse, misuse, neglect, alteration, or accident, or which have been improperly lubricated or repaired.
• Parts or accessories used in applications for which they were not designed or not approved by HMA, including installation in other than Hyundai vehicles.
• Failures due to normal wear.
• Failures caused by non-Hyundai parts.
• The Navigation System is not an authorized Dealer installed accessory option.
• Any vehicle on which the odometer reading has been altered so that mileage cannot be accurately determined.
• Any part previously replaced under the terms of the New Vehicle Limited Warranty, Powertrain Limited Warranty, Emission Defect Warranty, Emission Performance Warranty, or California Emission Control Systems Warranty.
• The charge for diagnostic labor which does not lead to the determination that a warrantable condition exists.
• INCIDENTAL OR CONSEQUENTIAL DAMAGE, INCLUDING WITHOUT LIMITATION, LOSS OF TIME, INCONVENIENCE, LOSS OF USE OF THE VEHICLE, OR COMMERCIAL LOSS.
• The duration of any implied warranties, including those **OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE**, are limited to the duration of this limited warranty.

Some states do not allow limitations on how long an implied warranty lasts, or the exclusion or limitations of incidental or consequential damages, so the limitations or exclusions set forth regarding this limited warranty may not apply to the owner.

**Note:** Vehicles which contain non-Hyundai Genuine parts or which have been misused, or improperly maintained, will not have the coverage under the Replacement Parts and Accessories Limited Warranty denied, unless the non-Hyundai Genuine part, the misuse, or the improper maintenance directly caused or contributed to the subsequent problem.

Warranty Service will be provided by any authorized Hyundai Dealer.

## 4.9 Over the Air Software Updates (OTA)

Some Hyundai vehicles with an active Bluelink account have control units that can perform "Over the Air (OTA)" software updates. These updates are performed in the background and are typically imperceptible to the dealer or customer. Performance of Over the Air updates are considered a feature of operation of the vehicle and are not a warrantable concern.

In the event of an Over the Air update fails to program properly or if the vehicle is presented with a concern that is rectified by performing an Over the Air update; any associated diagnosis and repairs are covered under the New Vehicle Limited Warranty (NVLW).

Note: If an Over the Air causes failure to a component and the vehicle is out of warranty, please submit a Prior Approval Request for goodwill consideration prior to performing the work. See section 5.4.1 Prior Approval Requirements.

## 4.10 Annual Map Updates

Annual map updates performed by the Hyundai dealer are not covered under warranty.

# Section 5: Warranty Reimbursement Policies

## 5.0 Warranty Claim Submission Screens

The following section details the required information for claim submissions and how to enter the information on the WebDCS screen. Before entering data into the computer, group claim submissions/repair orders by screen type.

The following information indicates which screen to use for specific situations:

### 5.0.1 Warranty Claim Screen

The majority of the claims submitted to HMA will be entered on the Warranty Claim Screen. This screen is used to obtain reimbursement for most repairs performed during the warranty period. The only time this screen would not be used is if the claim falls within the criteria of one of the following other screens:

- Replacement Parts and Accessories (Retail Part) Claim Screen
- Campaign Claim Screen
- Pre-Delivery Inspection (PDI) Claim Screen
- Rental Claim Screen

Before a dealer submits each 10 Year/100,000 Mile Powertrain Limited Warranty related repair claim, a Dealer must input original owner validated information in the screen listed below.

- Original Owner Verification Screen

If a warranty claim is submitted for a 10 Years/100,000 Miles Powertrain Limited Warranty repair, and there is no corresponding Original Owner Verification record on file with HMA, the Powertrain claim will be returned.

The first retailed owner of a Class II vehicle “sold as used” which is sold at auction is eligible for 10/100.

**Note**: Check your Warranty Claims Processing Manual on HyundaiDealer.com under the Service tab / Dealer Resources / Documents Library / Warranty / Warranty Claims Processing Manual (SVC-1241) for the necessary instructions on Original Owner Verification Record submission.

### 5.0.2 Replacement Parts and Accessories (Retail Part) Claim Screen

The Replacement Parts and Accessories Claim Screen is to be used for submission of claims related to parts previously replaced as part of a **customer pay repair** or an **over-the-counter** sale found to be defective. For detailed information on the Replacement Parts and Accessories Limited Warranty, see Section 4 (Warranty Policy Statements) in this manual.

The Replacement Parts and Accessories Claim Screen **should only be used** when the defective part was previously replaced and originally purchased by the customer. In all cases, the replacement part must be determined to be defective in material or workmanship. The following situations will indicate the use of the Replacement Parts and Accessories Claim Screen:

1. The part was previously replaced on a “customer pay” repair within the past 12 months or 12,000 miles, whichever occurs first.
2. The part was previously purchased over-the-counter and is returned due to defects in material or workmanship within 12 months of purchase, regardless of mileage.

**5.0.3 Campaign Claim Screen**

The Campaign Claim Screen is used in the event of a campaign claim. A special campaign code will be assigned and instructions will be issued via a Technical Service Bulletin to indicate when campaign claims are to be submitted on this screen.

**5.0.4 PDI Claim Screen**

The PDI Claim Screen is used to obtain reimbursement of completed Pre-Delivery Inspections. Claims with PDI performed after Retail Delivery Date (RDR) or Demo date will not be accepted by HMA.

**5.0.5 Hyundai Protection Plan (HPP) Vehicle Service Contracts**

For all claims on contracts sold ON or AFTER April 19, 2007, dealers must call the HPP Vehicle Service Contract claims line to obtain prior authorization.

| Contract Sale Date | Telephone # For Prior Authorization |
|---|---|
| 4/19/2007 through 1/10/2013 | 866-367-9040 |
| 1/11/2013 - Present | 800-477-8089 |

**5.0.6 Warranty Vehicle Information**

The Hyundai Warranty Vehicle Information provides warranty claim repair history and includes:
Basic Information:

- VIN/Model
- Warranty Start Date - # of months and days of being in-service now displayed
- Original Owner
- DMV Transfer Date
- Current Owner
- Emission Type
- Selling Dealer code and name
- Production Date
- IQS/CSI/VDS/Others

- Allocation Date
- Branded Information
- Customer Loyalty
- Extra Warranty
- Service Interval

Bluelink Information, if so equipped:

- Bluelink Enrollment Status
- Bluelink Equipped
- Monthly Vehicle Report
- Maintenance Alert
- Last Service Check
- SVR Status

Campaign Not Performed

- Campaigns not performed, including vehicles that have been reclassified as non-warrantable. Procedures should be performed on all vehicles, including reclassified vehicles with open campaigns.

Warranty Claim History

Service Contract

Service Contract Claim History

Through WebDCS, a query is transmitted from the Dealership to the Hyundai Host computer. Online information is immediately sent back to the Dealer.

**5.0.7 Claim Search Resubmit Screen**

The Claim Search Resubmit Screen provides the ability to view returned claims and allows for the selection of appropriate claims for update and resubmission to HMA.

**Note:** Check your Warranty Claim Processing Manual on HyundaiDealer.com under the Service tab / Dealer Resources / Documents Library / Warranty / Warranty Claims Processing Manual (SVC-1241) for the necessary instructions on claim submission.

**5.0.8 Service Rental Car (SRC) / 3rd Party Rental Program / Alternative Transportation / Rideshare**

Hyundai Motor America encourages its dealers to participate and actively utilize Service Rental Cars (SRC), 3rd Party Rentals and Rideshares. These programs are intended to help drive and maintain customer satisfaction by providing service customers with transportation while their vehicle is in service.

The expectation for the program is that dealers will present SRC and alternative transportation options to all retail service customers regardless of warranty status or where the vehicle was purchased.

The SRC program and alternative transportation options are among the strongest customer retention and satisfaction tools available.
**Note:** The SRC, 3rd Party Rental and Rideshare options are not considered part of the New Vehicle Limited Warranty (NVLW).

For further details, including reimbursement rates, best practices and requirements, please refer to the SRC Program Rules available on www.Hyundaidealer.com > Service > Document Library > Service Rental Car.

**Criteria for Reimbursement**
For those repairs being performed under the New Vehicle Limited Warranty (NVLW) that meet the specific requirements outlined below, Hyundai Motor America will reimburse the dealer based on a three-tier daily reimbursement rate. For 3rd Party Rentals or Rideshares (i.e., Uber, Lyft) a specific defined daily rate of reimbursement is provided as well.

**No Prior approval is required for SRCs, 3rd Party Rentals or Rideshares so long as it meets the criteria for reimbursement outlined below.**
Hyundai Motor America may provide a Service Rental Car (SRC), 3rd Party Rental or Rideshare reimbursement to dealers for customer satisfaction purposes for one or more of the following reasons:

- Vehicle is within any warrantable and certain goodwill conditions and the repair cannot be completed in the same day and:
  - Vehicle is unsafe, inoperative, or requires emergency repairs; or
  - Non-emergency repairs require the vehicle to be kept overnight to complete.
- Parts are on HMA backorder (warrantable concern or customer pay) - Both parts on backorder (B/O) screen printout(s) and part arrival record(s) (for example, WebDCS Parts Order Inquiry screen) be attached to Repair Order, and meets the requirements of:
  - Vehicle is unsafe, inoperative, or requires emergency repairs; or
  - Non-emergency repairs require the vehicle to be kept overnight to complete.
- Vehicle has multiple warranty issues where total time to complete repairs requires more than one day.
- Vehicle has extensive diagnostic time where total time to complete diagnosis and repairs require more than one day.
- At the request of HMA's AMM, FSE, or CA department; alternative transportation can be provided for technical inspection of the subject vehicle.

If a dealer cannot duplicate a customer complaint and consequently submits a No Trouble Found (NTF) claim, HMA can reimburse a maximum of two days rental (2 business days, Monday to Friday).

If one or more of the aforementioned bulleted requirements are met, the dealer is eligible to receive reimbursement.

The Hyundai SRC will only pay out max of one daily reimbursement rate per day. IE: If a vehicle is used multiple times in one day for warranty related concerns, HMA will only reimburse for one occurrence that day. However, a vehicle used multiple times a day will benefit SRC utilization. Please refer to SRC Program rules for complete details.

Dealers are required to complete warranty repairs in a timely manner. Dealers may be denied or charged back reimbursement if it is the result of inadequate dealer scheduling or if the dealer is found not to have accessed available TSB, HTSS, or other HMA technical resources leading to delays in the repair.

Backordered parts should be placed on a daily parts order or SOP order. If a dealer is found not to have placed an expedited parts order, the rental is subject to chargeback. Customers are responsible for meeting the requirements of the 3rd party rental agency.
**Note:** Allowance for ordered parts is up to 2 rental days (2 business days, Monday to Friday) after the part arrives for dealer to complete the repair. If allowance is exceeded, dealer must attach supporting documentation to the claim for review.

In the event a customer is not offered or initially declines an SRC, 3rd Party Rental, or Rideshare but meets the requirements and later requests one of these services; the SRC, 3rd Party Rental, or Rideshare can be offered and is eligible for reimbursement.

**Rideshare**
The dealer is eligible for reimbursement for the use of rideshare services provided on behalf of the customer such as Uber or Lyft up to the published daily rate per day while the customer's vehicle is in service and meets the criteria for reimbursement outlined in this section. The trips can be to and from the dealership or for any ridesharing trips requested by the customer for the duration of their repairs up to the maximum daily reimbursement amount.

**Dealer Provided Shuttle Service**
Dealer provided shuttle service is not eligible for dealer reimbursement. Active SRC units cannot be used as a Shuttle.

**Reimbursement Criteria Not Met**
Costs associated with SRC vehicles, 3rd Party Rentals, or Rideshares provided for customers that are outside of any warrantable, certain goodwill, certain customer pay conditions, complimentary maintenance, or for those that do not meet the program criteria for reimbursement are the responsibility of the dealership or customer and will not be reimbursed.

**Source of Rental Vehicles**
Hyundai encourages dealers to participate in the SRC program, and when an SRC is not available, then an independent 3rd Party Rental may be provided. Dealers are encouraged to

sign up for and utilize the Enterprise ARMS© Dealership platform for 3rd Party Rental services and, if available, request a Hyundai vehicle for the warranty customer.

**Submission of Service Rental / 3rd Party Rental / Rideshare Claims Documentation & Retention**

All SRC, 3rd Party Rental and Rideshare claims must be submitted to Hyundai Motor America only if there is a corresponding paid warranty claim, campaign claim or certain customer pay conditions. All program claims are subject to review at time of claim submission. Refer to the Hyundai Warranty Claims Processing Manual for details.

For warranty claims or campaign claims, please check the Claim Status Report (answerback) or the Claim Inquiry screen in WebDCS to obtain the causal part number.

For SRCs, a copy of the TSD (SRC fleet management tool) Vehicle Use Agreement signed by the customer must be attached to the claim. Please also attach any corresponding documents to justify the rental days submitted.

For 3rd Party Rentals, a copy of the rental agreement or final invoice must be attached to the claim. This must show RO number, customer name, days, rental model, rental VIN, daily rate and total amount. Please also attach any corresponding documents to justify the rental days submitted. A rental justification form may be required for explanation and supporting documents on rentals over 3 days.

For Rideshares, a copy of the final invoice/receipt must be attached to the claim. Please also attach any corresponding documents to justify the rental days submitted. Receipts for each ride must be attached to the repair order and maintained with the file copy.

Unless otherwise required by applicable state law, claims for SRC, 3rd Party Rentals, and/or Ride Shares should be submitted at the same time as the corresponding repair claim. Claim submission or resubmission over 30 days is subject to denial. See section 6.0.

Claims submitted with incorrect/invalid Repair Claim information (RO number and Causal Part) may go into “hold status” for up to 7 days. If after 7 days the system does not find the corresponding repair claim, the claim will be returned. If dealer notices incorrect information was entered or there is no corresponding claim, such as a buyback situation, please contact the WCC through the Warranty Support Portal or by phone at 877-446-2922 for immediate processing.

**Note:** Chargeback of warranty claim will result in subsequent chargeback of associated SRC / Rental / Rideshare Claim(s).

**What Is Not Covered**

Under no circumstances should a claim be submitted to Hyundai for the following reasons:

• The vehicle is outside of any warrantable and certain goodwill conditions or does not meet the criteria for claim reimbursement.
• The rental vehicle is kept beyond the completion of warranty repairs to the eligible vehicle. When the warranty repairs are completed and the customer is notified, continued use of a rental vehicle is at the expense of the customer or dealership. Any warranty claim submitted to Hyundai should not include charges for continued use.
• Over-the-counter and retail parts purchases are not eligible for rental coverage due to parts issues or delay.
• Dealer scheduling/time issues or delays in servicing the vehicle are not valid reasons for submitting extended rental coverage.
• Extended Service Contracts with rental coverage must be used and documented first before considering HMA goodwill rental.

| RENTAL REASON CODE | RENTAL REASON DESCRIPTION | REQUIREMENT FOR USAGE | DOCUMENTATION NEEDED |
|---|---|---|---|
| R4 | Parts on HMA Backorder | Parts on Backorder due to Hyundai Motor America backorder status. | Additional comments must be entered on claim, including part number and parts order number. Repair issue must affect drivability/safety. Requires copy of parts availability screen attached to R.O. |
| R5 | Overnight repair / VOR Part Order / Weekend / Holiday | Issue must affect drivability/safety for more than one day of rental coverage, or repair falls over a weekend or Holiday | Additional comments must be entered on claim and include which part(s) were SOP. Requires copy of parts order attached to R.O., or detail why customer was provided rental over holiday/ weekend, rather than set up for appointment during normal work week. |
| R6 | Extensive Diagnosis / FSE / Fast involved | Repair requires extensive diagnosis to determine applicable repair | Additional comments must be entered on claim including Techline case #, FSE or FAST involvement. |
| R8 | Remedy Not Available | Rental was provided due to an open recall without a remedy | Additional comments must be entered on claim including remedy not available recall information and related part order information, if applicable. |
| R9 | Buyback | Vehicle has been in dealership for multiple concerns and rental given as part of customer satisfaction. | Additional comments must be entered. If CA case exists, Case # must be included in tech notes with claim. Service Manager must sign R.O. and notate authorizing rental in this case. |

**Note:** Allowance for ordered parts is up to two (2) rental days (2 business days, Monday to Friday) after the part arrives for dealer to complete the repair. If allowance is exceeded, dealer must attach supporting documentation to the claim for review.

## 5.1 Parts Reimbursement

Unless otherwise required by applicable state law, HMA will reimburse the Dealer at the Dealer net price plus an additional parts handling allowance based on the Dealer net price. The Dealer net price is the current purchase price applicable to the Dealer on the repair order (RO) open date. The parts handling allowance is to cover the dealer's administrative costs associated with the storage and handling of the parts. The parts handling allowance is:

- 40% for 2016 - 2026 model year vehicles
- 40% for all over-the-counter claims

• For new Hyundai dealers as a result of a Buy-Sell: the parts handling allowance shall be the lower of: (1) the parts allowance that the selling dealer received at the time of sale or (2) the median dealer parts allowance in the state in which the dealer operates. For example: Selling dealer is 42% and the median dealer parts allowance in the state is 41%, the buying dealer will receive a 41% dealer parts allowance.

• For new Hyundai dealers by appointment of HMA: the parts handling allowance shall be 40%

• For all other situations: the parts handling allowance shall be 40%

### 5.1.1 Core Policy

Specific parts (such as a remanufactured alternator assembly), will have a core charge that is a separate charge from the dealer net part price. Warranty reimbursement will be based upon the current dealer net price for the assembly, not the core value, plus the parts handling allowance applied to the dealer net price. Your parts department can give you information on core reimbursement amounts.

Please contact the Dealer Parts Support Call Center at 1-800-545-4515 for status relating to these core exchanges. Your PDC will issue credit for cores on the monthly Dealer Parts Statement.

### 5.1.2 "No Part Number" (NPN) Purchase Reimbursement

The Dealer is to maintain an inventory of new Hyundai Genuine supplied parts in sufficient quantity to enable necessary parts replacements in vehicles serviced by the Dealer.

The Dealer is required to use new Hyundai Genuine parts in all warranty and customer satisfaction repairs and in the case of sublet repairs, to furnish the outside sublet repair shop with such new Hyundai Genuine parts as may be required for repairs.

There are some supplies which Hyundai does not sell (i.e. battery acid, etc.) and others that Hyundai sells that are also available from other sources, which the Dealer or sublet shop must purchase from a source other than HMA. Reimbursement for such items will be based on the allowances shown in the Warranty Claim Processing Manual, with no additional parts handling allowance.

| NPN Description | Part Number |
|---|---|
| Anti-Freeze / Coolant | NPNANTFREZ |
| ATF Fluid SPIII* | NPNEATMOIL |
| ATF Fluid JWS3309 T4 | NPNATFJWS3309 |
| ATF Fluid NWS9638 AISIN | NPNATFNWS9638 |
| ATF Fluid RED 1 | NPNATFRED1 |
| ATF 6HP ZF (BH, BK, VI) | NPNATF6HPZF |
| ATF Fluid SP4-M | NPNATFSP4M |
| ATF Fluid SPH IV RR | NPNATFSPH4RR |
| Brake Fluid Dot 3 | NPNBRAKEFD |
| Brake Fluid Dot 4 | NPNBRAKEFD4 |
| Clutch Fluid | NPNCLTCHFD |
| Engine Oil Synthetic Blend, 5w-20/5w-30 | NPNENGNOILSB |
| Engine Oil Synthetic, 0w-16 | NPNFSYN016 |
| Engine Oil -Hyundai Full Synthetic 0w-20 | NPNHSYN020 |
| Engine Oil Full Synthetic 0w-20 | NPNFSYN020 |
| Engine Oil Full Synthetic 0w-30 | NPNFSYN030 |
| Engine Oil Full Synthetic 5w-20 | NPNFSYN520 |
| Engine Oil Full Synthetic 5w-30 | NPNFSYN530 |
| Engine Oil Full Synthetic 5w-30 | NPNFSYN540 |
| Gear Oil 75W-90, Synthetic | NPNGEAR75W |
| Gear Oil 80W-90, Semi-Synthetic | NPNGEAR80W |
| Hypoid 75W-85 Gear Oil GL-5, LSD | NPNGEAR7585LSD |

| Refrigerant (1234YF) | NPNR1234YF |
| TF 0870B Transfer Case Oil | NPNTF0870B |
| Windshield Washer Fluid | NPNWWASHFD |
| Notes: Maximum quantity may vary by model. NPNs may vary by model (please refer to most recent Chemical List posted at Hyundaidealer.com for which models apply). | |

Note: Most recent Chemical List can be found at Hyundaidealer.com (Service > Dealer Resources > Documents Library > Warranty)

### 5.1.3 Parts Return Freight Reimbursement

Parts returned to the WTC must be completed online at www.HyundaiDealer.com. Click WTC Part Return on either the PARTS or SERVICE page. Dealers will not be responsible for paying freight charges, account or online label fees. For more information please refer to Section 7.5 and 7.6 of this manual.

## 5.2 12V Battery Claims (excludes 12V Lithium Batteries)

A battery in a stored vehicle is subject to conditions that can reduce its performance and life. Regular monthly battery maintenance must be performed by the dealer to ensure proper operation and optimal battery life for the customer. A vehicle battery that is not adequately maintained during dealer storage can result in reduced battery life and customer dissatisfaction.

As a matter of warranty policy (2.3.5), Hyundai does not provide warranty coverage for discharged and/or failed 12V batteries due to lapses in dealer aged inventory maintenance. For more information, please refer to section (2.3.2) Dealer Stock Inspection every 30 days (Monthly) – Not Covered by Warranty.

Dealers should inspect batteries within 7 days of arrival from Hyundai. Warranty claims can only be submitted for repairs performed within 7 days of unit delivery at dealers. Claims can only be submitted using approved testing methods. For more information and relevant TSBs, please refer to section (2.3.3) 12V Lead-acid/AGM Battery Inspection and Maintenance.

It is the dealer's responsibility to maintain the battery in good condition while the vehicle is in dealer stock. Maintaining the battery in good condition will minimize the dealer's battery replacement cost since dealer stock is not covered by Hyundai warranty. The regular upkeep of the battery will also ensure optimal battery performance for the customer.

**The following TSBs contains battery tester information and warranty related procedures.**

- 24-EE-014H – 12V BATTERY MAINTENANCE FOR INVENTORY & PDI
- 24-EE-013H – WEBDCS AGED INVENTORY – BLUELINK SOC ALERTS
- 25-EE-003H – GUIDE TO BATTERY DIAGNOSTIC TSBS

**Note:** The TSBs listed above are subject to change; for the most up-to-date version(s) please visit www.HyundaiDealer.com under the Service tab/Service Programs/Hyundai Tech Info/TSB.

For unusual battery situations, such as a leaking battery, please contact the WCC using the Warranty Support Portal or by phone at 877-446-2922 for assistance.

**Dealer Battery Maintenance Schedule** (per TSB 24-EE-014H):

Note: Hyundai highly recommends storing dealer stock vehicles in "Shipping Mode" to help reduce battery current draw and conserve Battery State of Charge (SOC%) while vehicles are in dealer lot or storage location.

For more information on Shipping Mode, please review TSB 24-EE-012H-1.

Dealer Option - Covered by Warranty:

**Within 7 days of vehicle delivery to dealer:**

Inspect the battery condition using Battery Test/Claim App on GDS Smart, referencing TSB 25-EE-003H. Warranty claim submissions must use the approved process described in the TSB. Take the appropriate action based on the test results:

| **Battery Condition** | **Action** |
|---|---|
| D00 or Good Battery (Cadex) | No action required (covered under PDI) |

After charging, check the battery again with a Hyundai approved battery tester and utilize the Battery SOC information on **TSB 24-EE-013H**.<br><br>Battery test results must yield, "Good Battery"<br>Refer to **TSB 24-EE-014H** and **TSB 24-EE-013H** for more details. |
| Replace Battery | Replace Battery at Dealer's expense |

**Please note:** The TSBs listed above are subject to change; for the most updated version(s), please visit www.HyundaiDealer.com under the Service Tab/Service Programs/Hyundai Tech Info/TSB.

**Note:** There will be a warning on the instrument cluster if the vehicle is driven with the Power Fuse Switch turned off.

### 5.2.1 Original Equipment Battery (2016-2016 Model Year Vehicles)

An original equipment battery found to be defective in material or workmanship will be warranted for the first 3 years from the date of original retail delivery or date of first use, or 36,000 miles, whichever occurs first.

### 5.2.2 Claim Preparation for Original Equipment 12V Lead-acid/AGM Batteries

**(2016-2025 models year vehicles NOT capable of GDS battery diagnosis) 0–36 Months/36,000 Miles**

2016-2025 model year vehicles and the Venue model not capable of GDS battery diagnosis must be tested using Cadex Spectro Modular via GDS Smart Battery Test/Claim Application. For more information, please refer to section (2.3.3) 12V Lead-acid/AGM Battery Inspection and Maintenance.

The fields on the Warranty screen must be correctly filled in following regular submission procedures, including the following:

- Causal part is the part number of the Interstate battery.
- Labor operation code as applicable:
  - 37110R00 for Battery Replacement
  - 37110A00 for Battery Diagnostic Inspection and Charging Operation
  - 37110A00 + 37110R00 for Charge AND Battery Replacement
  - Refer to TSB 25-EE-003H and 25-EE-005H
- Labor operation code quantity of 1.

• Part number of the replacement battery, quantity 1.

**(2025-2026 models year vehicles capable of GDS battery diagnosis) 0-36 Months/36,000 Miles**

2025-2026 model year vehicles capable of GDS battery diagnosis must be tested using the GDS Smart Battery Test/Claim Application. For more information, please refer to section (2.3.3) 12V Lead-acid/AGM Battery Inspection and Maintenance.

The fields on the Warranty screen must be correctly filled in following regular submission procedures, including the following:

- Causal part is the part number of the Interstate battery.
- Labor operation code as applicable:
  - 37110R00 + 37110A1A for Battery Diagnostic Codes R01 and R02
  - 37110R00 + 37110A00 for Battery Diagnostic Codes R03 and R04
  - 37110A1A for Battery Diagnostic Inspection
  - 37110A00 for Battery Diagnostic Inspection and Charging Performance Test
    - Diagnostic Code D01
- Labor operation code quantity of 1.
- Part number of the replacement battery, quantity 1.

**Note:** The TSBs listed above are subject to change; for the most up-to-date version(s) please visit www.HyundaiDealer.com under the Service tab/Service Programs/Hyundai Tech Info/TSB.

### 5.2.3 Over-the-Counter Sales Batteries

12V Lead-acid/AGM batteries purchased over-the-counter are warranted for 48 months/unlimited mileage from the date of purchase. For the first 12 months HMA will cover the full dealer net cost of the battery, plus the applicable parts handling allowance. During the 13th through 48th month, the battery is prorated. The Warranty Claim System will prorate the battery based on the submitted detail part. Labor is not covered on an over-the-counter sale.

### 5.2.4 Dealer Installed Replacement Batteries

Dealer installed replacement 12V Lead-acid/AGM batteries are warranted for 48 months/unlimited mileage from the date of purchase. For the first 12 months HMA will cover the full dealer net cost of the battery, plus the applicable parts handling allowance, and the labor to remove and replace the battery. During the 13th through 48th month the battery will be reimbursed at a prorated amount and the labor is not covered under warranty.

### 5.2.5 Claim Preparation for Replacement Batteries Purchased Over-the-Counter

**0–48 Months/Unlimited Mileage**

The field on the Replacement Parts and Accessories Screen must be correctly filled in following regular submission procedures, including the following:

- Causal part is part number of the battery being replaced.
- Labor operation code 37110R00.
- Labor operation code quantity of “0”.
- Part number of the replacement battery, quantity 1.

### 5.2.6 Claim Preparation for Replacement Batteries – Dealer Installed 0–48 Months/Unlimited Mileage

The fields on the Replacement Parts and Accessories Screen must be correctly filled in following regular submission procedures, including the following:

- Causal part is the part number of battery being replaced.
- Labor operation code 37110R00.
- Labor operation code hours of 0.3 hours (Hours may vary by model, see LTS).
- Labor operation code quantity “1” (After 12 months, labor opcode quantity “0”).
- Part number of the replacement battery, quantity 1.

**Note:** The system will automatically calculate the correct prorated adjustment amount on the submitted battery replacement detail part number for the 13–48 month time period.

### 5.3 Emergency Repairs and Owner Refunds

In situations where a customer requires an emergency repair at a non-Hyundai approved Dealership and is seeking a refund, the customer should contact the Hyundai Customer Care Center at 1-800-633–5151.

## 5.4 Prior Approval Policies

Hyundai's Prior Approval (PA) Center provides a centralized location that authorizes Warranty and Goodwill Repairs. Prior Approval is required for certain repairs (5.4.1) prior to performing the repair.

As a reminder, the required claim preparation procedures, as outlined in other sections of the P&P including other HMA publications (i.e. Campaign Literature, Technical Service Bulletin, etc.) must also be adhered to; a Prior Approval will not serve as a "blanket" approval and the claim may still be subject to denial or chargeback for failure to comply with the claim preparation procedures.

Dealer shall adhere to the following:

- Submit PA request within 2 business days (Monday to Friday) of R.O. open date.
- Respond to PA return within 1 business day (Monday to Friday).
- Order part(s) within 1 business day (Monday to Friday) of PA approval.

Note: Refer to SRC allowance guidelines for max days allowed for repair completion.

### 5.4.1 Prior Approval Requirements

**Dealers are required to submit a Prior Approval for authorization, prior to performing the following repairs:**

- Engine Assembly (sub engine assembly and short engine assembly)
- Transmission/Transaxle Assembly (manual, automatic, IVT and DCT)
- Electric High Voltage Battery
- Engine Assembly, Transmission Assembly or Electric High Voltage Battery sold to a third-party repair facility
- Combustion Chamber Cleaning (Oil Consumption)
- All Goodwill related repairs including:
    - Campaign related repairs (consequential and previously completed recall repairs)
    - Goodwill over HSA limits (5.4.6)
    - Concerns reported while vehicle was in warranty
    - For latest updates, check the WebDCS Messages and Alerts

When replacing Engines or Transmissions, dealers must adhere to the Transmission and Engine Programs outlined in sections 5.6.3, 5.6.4 & 5.6.5.

HMA reserves the right to furnish the final decisions in all Goodwill matters. HMA encourages Goodwill participation from both Dealerships and/or Customers in the cost of the repairs. HMA may participate only in a portion of the cost of the repairs (i.e. Only Parts or Labor, a Limited Dollar Amount, or a Percentage of the Total Amount). HMA participation in Goodwill repairs will

always be Parts at Warranty pricing and Labor times as per HMA LTS, unless otherwise stated or required under applicable state law.

**Note**: If a previously completed Recall needs to be performed again and the vehicle is out of warranty, in order to ensure that the Recall is performed at no expense to the customer, please submit a Prior Approval Request for goodwill consideration prior to performing the work. Check the WebDCS Messages and Alerts for the latest updates.

**5.4.2 Prior Approval Request Submission**

Prior to starting any repairs which require Prior Approval (5.4.1), dealers must submit a PA request from WebDCS. To locate the PA Request under WebDCS, find the **Service** tab, access the **PA Request** link and then create and submit a new request. Status updates of other PA requests in Approved, Saved, In Progress, Returned or Declined, can also be found under the **PA Request** link.

**Comments for the PA Request Reason:**

- Engine PA Requests Include:
  - Repairs Needed & Cause of Malfunction
  - Condition/Level of the Oil/Signs of Sludge/Metal Contamination
  - New or Reman; include Part Number
  - Breakdown of Parts and Labor

- Transmission PA Requests Include:
  - Repairs Needed & Cause of Malfunction
  - DTC Codes
  - New or Reman; include Part Number
  - Breakdown of Parts and Labor

- Electric High Voltage Battery PA Requests Include:
  - Techline advised replacement
  - DTC Codes
- Breakdown of Parts and Labor
- Goodwill PA Requests Include:
  - Repairs Needed
  - Why warranty is not applicable
  - Reason for the Goodwill

**Note:** The list above is not all-inclusive and is subject to change.

**Required Attachments:**

All PA requests require repair order (RO), front & back, including technician comments. Additional required attachments may include photos and documents as requested by PA Center. Submitted photos must be digital, colored, high-resolution, original and unedited.

Photocopies of photos are not acceptable. Common photo file formats should be used: e.g. JPEG, PNG, BMP, TIFF.

- Engine PA Requests Must Include:
  - Completed digital Engine Diagnosis Worksheet, including the engine serial number from the removed engine and the Service Manager's signature.
  - Copy of customer's current and up-to-date (not expired) owner registration from Department of Motor Vehicles (DMV) to validate 10/100K Powertrain Warranty.

**Note:** Dealers should check that the removed engine core's serial number matches the OE engine serial number in WebDCS. If it does not match, dealers should notify PA of the removed engine core serial number as part of the PA review/approval process. Failure to notify PA if the engine's core serial number does not match can result in denial of claim approval or subject to claim chargeback.

- Transmission PA Requests Must Include:
  - Transmission Diagnosis sheet, completely filled out (Use the latest version of the Diagnosis sheet posted in Documents library on www.HyundaiDealer.com)
  - Copy of customer's current and up-to-date (not expired) owner registration from Department of Motor Vehicles (DMV) to validate 10/100K Powertrain Warranty. )

**Note:** The list above is not all-inclusive and is subject to change.

**Please review IMPORTANT NOTES below regarding possible reasons for denial of reimbursement claim:**

- Failure to confirm vehicle and/or customer eligibility
- Failure to submit the required PA Request and obtain Prior Approval can result in denial of the dealership's reimbursement claim.
- Reusing photos from another vehicle will result in denial of the dealer's reimbursement claim.
- Failure to disclose information related to warranty eligibility
- Obscene, offensive, lewd or derogatory media submissions (including audio submissions)
- Falsified documentation
- Using Techline / Field Service Engineering repair recommendation as approval in lieu of approved PA request for warranty coverage or goodwill assistance.

**Note:** The list above is not all-inclusive and is subject to change.

### 5.4.3 Prior Approval For Dealer Buy/Sell

In instance of dealer buy/sell, submit a new PA request utilizing the new dealer code for any vehicle where the claim will be submitted after the previous Dealer's 'end' date and a PA number is required on the claim submission (i.e., campaign engine claims). If a new PA is needed, the only required documentation for the new PA submission is a copy of the repair order from the roll-up (new) Dealer. The related supporting documentation will be referenced from the previous Dealer approval. Any pending or new PA requests needed after dealer's termination date must be submitted as new PA requests utilizing the new dealer code.

**5.4.4 Prior Approval Center Contact Information**
Email: PA@HMAUSA.COM

**5.4.5 Repairs Pending Claim Review**
Records and documents must be available and submitted within ten business days when requested by HMA for review. Dealers must adhere to Dealer Documentation Requirements (6.0) and Repair Order Retention Requirements (6.2.1).

**5.4.6 Hyundai Dealership Self-Authorization (HSA)**
HMA's dealer self-authorization program is referred to as HSA (Hyundai Dealer Self-Authorization). This dealer self-authorization semi-annual program enables qualifying and enrolled dealerships to perform specific out-of-warranty and/or selected warranty repairs. In addition, the associated claims for these repairs are processed directly upon claim submission.

**HSA Dealers may self-authorize Goodwill repairs within the following HSA limits:**

- Repairs beyond coverage but within 12 months/12,000 miles of New Vehicle Limited Warranty (60 months/60,000 miles) & Powertrain Warranty (120 months/100,000 miles) components*
- Total repair amount per visit is $1,000.00 or less

*Replacement of engine and transmission assemblies require Prior Approval.

If any HSA limits are exceeded, dealers must submit for Prior Approval (5.4.1 & 5.4.2). Goodwill claims exceeding any HSA limits, total repair amount per visit/months/mileage, and submitted without obtaining Prior Approval are subject to denial or chargeback.

**Examples when HSA Dealers can self-authorize Goodwill repairs:**

- New Vehicle Limited Warranty Repairs beyond 60 months/60,000 miles, but within 72 months/72,000 miles from date of first use
- Powertrain Warranty Repairs beyond 72 months/72,000 miles, but within 72 months/72,000 miles from date of first use, for second and/or subsequent owner *
- Powertrain Warranty Repairs beyond 120 months/100,000 miles, but within 132 months/112,000 miles from date of first use, for original owner *
- Federal emission repairs beyond 96 months/80,000 miles, but within 108 months/92,000 miles from date of first use

- California emission repairs beyond 84 months/70,000 miles, but within 96 months/82,000 miles from date of first use
- Parts & Accessories Warranty repairs beyond 12 months/12,000 miles, but within 24 months/24,000 miles from date of original customer purchase
- Bluetooth, Navigation, Radio and Sound System repairs:
  - Beginning with 2016MY: Repairs beyond 60 months/60,000 miles, but within 72 months/72,000 miles from date of first use
  - Prior to 2016MY: Repairs beyond 36 months/36,000 miles, but within 48 months/48,000 miles from date of first use (excluding 2013-2015MY Equus which is covered for 60 months/60,000 miles)
- Maintenance and miscellaneous repairs such as belts/brake pads/bulbs beyond 12 months/12,000 miles, but within 24 months/24,000 miles from date of first use **

**Note:** The list above is not all-inclusive and is subject to change.

*Replacement of engine and transmission assemblies require Prior Approval.

**Maintenance repairs for Equus not performed as part of a scheduled maintenance as outlined in the Equus Service Advocate QRG is not warranty, see 4.1.15. Any part being replaced due to wear is not eligible for HSA, see 5.4.8.

**Note:** Eligible HSA self-authorized claims submitted by HSA actively enrolled dealers will automatically be identified and processed as self-authorized claims.

**5.4.7 HSA Eligibility Criteria***
***HSA Eligibility Criteria are reviewed on a frequent basis throughout the year and are subject to change.**

Dealership eligibility for enrollment in the semi-annual HSA program is based on the following criteria:

1. Average Warranty Operational Performance Review (WOPR) ranking is in the top 550 of Hyundai Dealers in most recent 6-month period.

**AND**

2. Average Hyundai Service Experience (HVX) greater than or equal to 835 in most recent 6-month period.

**HSA Dealer eligibility and participation will be reviewed and determined semi-annually by HMA.**

A Dealer that has been previously removed from participation in HSA is eligible for reinstatement (participation) in HSA upon the Dealership meeting or exceeding the HMA Service Objectives, indicated above, for the period under review.

Region Management can deny the participation in HSA of any “eligible” Dealership, at any time, provided that Region Management has “just cause” for such denial, such as:

- Excessive number of vehicles bought back involving Dealership
- New Service Management at Dealership

HSA participation start date(s) and removal date(s) are based upon date of repair. Claims meeting HSA parameters with repair completion dates prior to the effective date of active participation will not be processed/accepted as HSA claims. Claims meeting HSA parameters with repair completion dates after the effective date of removal from HSA participation will not be processed/accepted as HSA claims.

Claims submitted by participating HSA Dealers that exceed the HSA program self-authorization parameters, will automatically be reviewed by the PA Center for authorization/approval or denial.

### 5.4.8 HSA Decision Guidelines

**The following types of repairs are to be considered under HSA (Dealer Self-authorization):**

- Goodwill repairs to be considered only on a case-by-case basis
- Warranty repairs must be the direct result of a defect in Hyundai supplied material or Hyundai Factory workmanship
- Replacement of a complete assembly with a new assembly when a remanufactured assembly is either not available or the applicable State disclosure laws for a “new” vehicle requires replacement using a new, rather than a used part
- Goodwill cost splits/sharing (Customer and/or Dealer contributions to repair cost)
- Warranty extension repairs (e.g. clock spring, MDPS Coupling)

**The following types of repairs/services are NOT to be considered under HSA (Dealer Self-Authorization):**

- Reconditioning of a used vehicle or repairs to a vehicle in Dealer stock
- Repairs for excess expense due to Dealership Technician or Sublet Shop error or inefficiency
- Goodwill repairs for a relative, or friend, when such a relationship is the sole basis for the goodwill repair
- Repairs to a vehicle for which the actual mileage cannot be determined
- Repairs to a vehicle that has a canceled warranty
- Repairs to a vehicle that has been abused or used in a manner that is inconsistent with “normal” driving conditions or use
- Repairs or components which are not covered under HMA warranty (e.g. Tires)
- Repairs that clearly are outside of the warranty period that are due to vehicle:
  - Abuse
  - Commercial use
  - Modification from original factory specification

– Normal wear or maintenance related (e.g. fluid changes, belts, spark plugs, brake pads and oil changes-including additional services not covered under the Equus Maintenance Program and Genesis Maintenance Program)
– Not being maintained
– Covered under an existing Extended Service Contract or similar plan
– Deductible for repairs (e.g. repairs covered by Extended Service Contract or Insurance plans)
– Gifts, Gift cards or Coupons

**Note:** The list above is not all-inclusive and is subject to change.

### 5.5 Anti-Perforation

If a vehicle has a rust hole (from the inside out), through a body panel from corrosion due to defects in material or workmanship, the following procedures must be followed:

• The Dealer is to inspect the vehicle to determine if the rust is due to a perforation condition. If there is a perforation, the Dealer must complete the Anti-Perforation Limited Warranty Vehicle Inspection Report (NP430-00000_10-04), available on www.HyundaiDealer.com under the Service tab / Dealer Resources / Documents Library /Warranty / Anti-Perf Inspection Report (NP430-00000_10-04). The Anti-Perforation Limited Warranty Vehicle Inspection Report should be attached to the corresponding repair order. If the Inspection Report is not available upon request, the claim may be subject to chargeback.

**Note:** Surface corrosion or surface rust is covered for the first 12 months from the date of original retail delivery or date of first use or 12,000 miles, whichever occurs first.

• The Dealer should submit the anti-perforation claim to HMA following normal WebDCS claim submission procedures.

– Causal Part
The causal part is the part number of the panel that caused the owner's complaint and the need for the repair. If more than one panel is affected, the panel that has the majority of the perforation evident should be listed as the causal part.

– Nature and Cause Code
Use the applicable nature and cause codes, such as **A12** and **ZZ8.**

– Sublet Code
Use **B2** - body repair.

• The Anti-Perforation Limited Warranty Vehicle Inspection Report, repair estimate and repair final invoice should be attached to the hard copy of the repair order and retained by the Dealer following normal warranty document retention policy and procedures.

## 5.6 Audio Video Navigation Dealer Direct Exchange (DDE) Systems, Transmission and Engine Program

### 5.6.1 Dealer Direct Exchange (DDE) Audio Video Navigation Systems

1. The dealer direct exchange manufacturer will stock and ship all remanufactured audio video and navigation units. Ordering of these units will take place using the DCS system. Audio Video Navigation Resources are available at Hyundaidealer.com>Parts>Document Library > Reference Materials > Audio Video Navigation Return and Replacement Program

To Exchange Unit (in warranty and out of warranty units)

- At time of shipment, HMA will invoice the Dealer at zero ($0.00) cost for the DDE unit. If the order is for an out of warranty unit, a Repair Fee will be charged at time of shipment.
  - If the inoperative (core) unit is returned to the manufacturer within 45 calendar days of DDE unit ship date, no subsequent charges will be filed.
  - If the core is not returned to the manufacturer by the 45th calendar day of DDE unit ship date, the DDE unit's Dealer Net Price will be charged on the 46th day.
  - If the core is returned to the manufacturer between 46 – 90 calendar days of DDE unit ship date, the DDE unit's Dealer Net Price will be credited, and a Late Return Fee will be charged.
  - If the core is returned to the manufacturer after 90 calendar days of DDE unit ship date, the core will not be accepted, and a credit will not be issued.
- When returning the core, include a copy of the dealer Repair Order showing the VIN, mileage, and installed part number.

2. Package the inoperative core unit in the carton in which the remanufactured replacement unit was shipped. Then immediately ship, using the provided prepaid FedEx Ground shipping label, the inoperative core, along with a copy of the dealer Repair Order to the manufacturer. The unit will be processed upon receipt and confirmation that the repair falls within the warranty guidelines of the Dealer Direct Exchange AVN Program.

- A Repair Fee will be charged for units found to be unwarrantable (out of warranty, modified, damaged due to customer abuse or misuse).

3. Do not attempt any type of repair on these units. If a CD/DVD or any other object becomes stuck or trapped in the unit, **do not attempt to remove it**. If the customer requests that their CD or other object be returned, fill out the diagnostic form and check the appropriate box in the customer complaint analysis section, requesting the CD/DVD or other object be returned to your dealership, so you may return the item(s) to the customer (**Damage from forcible removal will negate the warranty**). Otherwise, the CD or other object will be disposed of. If the dealership believes that the damage is the customer's responsibility, the dealership should discuss the matter with the customer. In

many cases of customer caused damages, the customer's auto insurance policy may provide the customer with coverage. HMA recommends that the Dealer communicate this to the customer. Customer caused damage is not warrantable.

4. Submit a warranty claim through the DCS system for the replacement labor.

A. Use the labor operation code from HMA LTS that is applicable to the VIN and DDE unit part number, description: radio assembly, qty: 1. Do not use any other labor operation in addition, or substitution, to the one prescribed above.

B. Do not charge out the DDE unit as a detail part. If you return the core with 45 calendar days from ship date, you will not be charged for the part. If the core is not returned by the 45th day from ship date, you will be charged for the Dealer Net cost of the replacement radio on your parts statement separately.

Audio video and navigation core units are to be returned via prepaid shipping label (FedEx Ground) provided by the manufacturer.

For all audio video and navigation replacements, the following must be adhered to:

– DDE units must be used unless any of the following are true:

- Vehicle has less than 500 miles.
- Specific Legal requirement by State Governing Agency.
- DDE unit is unavailable or on backorder (parts availability screen print must be attached to the subject repair order to document this condition).
- Repeat repair or customer satisfaction - Regional approval is required.

**– Please note:** If dealer substitutes a float unit for an OE unit, DDE billing rules and core return procedures will apply.

5. DDE Repair Facilities

- LG/Specmo - Phone: 800-545-7910 or customerservice@specmo.com
- MPA/MRC - Phone: 909-456-3798 or RC1_MRC@mobisusa.com
- Harman/United Radio - Phone: 800-448-0944 or contact@unitedradio.com

### 5.6.2 Discontinued Parts

**Contact a repair facility listed below or Dealer Parts Support Center at either of the following:**

- Contact: MOBIS Parts Portal on Hyundaidealer.com **OR**
- Phone: 800-545-4515

Repair Facilities:
Alpine - 800-421-2284 x 860304
Delphi - 800-321-6970 (head units/Monsoon)

Delphi - 800-886-0022 (rear seat entertainment)
Kenwood - 626-333-2435
Visteon - 951-471-5535
Goodwill
If an out of warranty Audio / Video / Navigation Unit fails and goodwill is justified, submit a PA request for goodwill consideration.

### 5.6.3 Transmission Reman Program

**For all Transmission replacements, the following must be adhered to:**

- Remanufactured transmission must be used unless any of the following are true:
  - Vehicle has less than 500 miles.
  - Specific Legal requirement by a state governing agency.
  - Reman part is unavailable or on backorder (parts availability screen print from WebDCS must be attached to the subject repair order to document this condition).
  - Reman part ordered but system converted to new part order due to no reman inventory available at the facing PDC (the order status inquiry screen in WebDCS that shows that the OE part has supersession with an Advice Code "A" must be attached to the subject repair order to document this condition.)

  The process to submitting a screenshot is as follows:
  1. Go to HyundaiDealer.com/WebDCS/Orders/Order Status Inquiry
  2. Select the Original Order Number submitted
  3. Take a screenshot and attach it to the RO

By utilizing Hyundai's DCS Online Website at **www.HyundaiDealer.com**, click on WebDCS, Parts tab, Core Returns to enter core returns and request pickups. MOBIS Parts America's Dedicated Delivery Service carriers (MPA DDS) will arrange for pick-up and delivery to a MPA DDS core return center where the cores will be inspected, processed, credits authorized, and electronically transmitted to HMA. Do not submit a Warranty Freight Claim for these charges.

As HMA is paying all Freight Charges under this program, it is important to note the following Program Guideline Updates:

- Go to **www.HyundaiDealer.com**, then click on WebDCS, Parts tab, Core Returns to initiate the core pickups through MPA DDS.
- The Reman Vendor will not accept any direct shipments of transmissions from dealers. Use the MPA DDS program for all transmissions, including WTC returns.
- If you have any problems using the website, call your Hyundai Parts Dealer Support Group at 1-800-545-4515 or MOBIS Parts Portal
- Dealers should remember to print and include with their pickups, the Bill of Lading (BOL) and Packing List from the Website. This will assist in timely processing.

• A returned transmission core should be fully assembled, including the torque converter, motors, actuator, etc. and all plastic/rubber plugs, and the core should be completely drained of all fluids.
• Include the following completed forms with the returned core. Failure to adhere to these requirements will result in the chargeback of the core credit and possibly the warranty claim.
  – **Transmission Diagnosis Worksheet. Worksheets are available on Hyundaidealer.com/WebDCS/Parts/Core Returns Diagnosis Worksheets. It is also available on www. HyundaiDealer.com/Service/Documents Library/Service/Reman ATM and Engine Core Return and Diagnosis Forms**
  – Core Return Form
  – Warranty Parts Tag (part number NP445-00011). Sample in section 7.3.
  – Dealer's Repair Order must include detailed condition, cause and correction information.
  – Final Invoice (if over the counter sale).

• Additionally, if a warranty claim is submitted and the transmission core was not returned to a MPA DDS core return center, the warranty claim will be charged back to the dealer.
• Dealers will be billed the freight pickup & recovery costs for all invalid returned cores.

Before and after readings/measurements must be recorded on the Transmission Diagnosis Worksheet whenever the GDS is used.

Second and subsequent remanufactured transmission replacements on the same VIN will require a case to be opened with Tech Line 1-800-325-6604 prior to repair and Prior Approval Center approval/authorization for the claim payment.

Your adherence to program guidelines will ensure the program continues to run effectively.

If you have any questions concerning the Reman Core Return Program, contact your HMA Parts Dealer Support Center at 1-800-545-4515.

### 5.6.4 Engine Reman Program

**For all engine replacements, the following must be adhered to:**

• Remanufactured engine must be used unless any of the following are true:
  – Vehicle is under 36 months/36,000 miles (whichever occurs first).
  – Specific Legal requirement by a state governing agency.
  – Reman part is unavailable or on backorder (parts availability screen print from WebDCS must be attached to the subject repair order to document this condition).
  - Reman part ordered but system converted to new part order due to no reman inventory available at the facing PDC (order status inquiry screen in WebDCS to

show that the OE part has supersession with an Advice Code “A” must be attached to the subject repair order to document this condition.)

1. Go to HyundaiDealer.com/WebDCS/Orders/Order Status Inquiry
2. Select the Original Order Number submitted
3. Take a screenshot and attach it to the RO

By utilizing Hyundai’s DCS Online Website at **www.HyundaiDealer.com,** click on WebDCS, Parts tab, Core Returns to enter core returns and request pickups. MPA DDS will arrange for pick-up and delivery to a MPA DDS core return center where the cores will be inspected, processed, credits authorized, and electronically transmitted to HMA.

As HMA is paying all Freight Charges under this program, it is important to note the following Program Guideline Updates:

- Go to **www.HyundaiDealer.com**, then click on WebDCS, Parts tab, Core Returns to initiate the core pickups through MPA DDS.
- The reman vendor will not accept any direct shipments of Engines from dealers. Use the MPA DDS program for all engines, including WTC returns.
- If you have any problems using the website, call your Hyundai Parts Dealer Support Group at 1-800-545-4515 or MOBIS Parts Portal
- Dealers should remember to print and include with their pickups, the Bill of Lading (BOL) and Packing List from the Website. This will assist in timely processing.
- Damage to the return core due to improper removal process or insufficient packaging may lead to chargeback of the core charge (if applicable) and warranty claim. Refer to section 7.5.1 for details on Engine Shipping Procedure.
- If a warranty claim is submitted and the Engine Core was not returned to a MPA DDS core return center, the warranty claim will be charged back to the dealer.
- Dealers will be billed the freight pickup & recovery costs for all invalid returned cores.

Second and subsequent remanufactured engine replacements on the same VIN will require a case to be opened with Tech Line 1-800-325-6604 prior to repair and Prior Approval Center approval/authorization for the claim payment.

Your adherence to program guidelines will ensure the program continues to run effectively.
If you have any questions concerning the Reman Core Return Program, contact your HMA Parts Dealer Support Center at 1-800-545-4515.

**5.6.5 New Engine/Transmission Replacement**

Replacement of an engine while the vehicle is under 36 months/36,000 miles will be done with a new engine. If a new engine is not available, a reman engine may be used with customer’s written consent.

Second and subsequent engine and transmission replacements on the same VIN will require a case to be opened with Tech Line 1-800-325-6604 prior to repair and Prior Approval Center approval/authorization for the claim payment.

Replacement of an engine for a retailed vehicle outside of 36 months/36,000 miles will be done with a reman engine except in the case of any specific legal requirement by a state government agency. Refer to section 5.6.4 for the complete engine reman program policy.

Replacement of a transmission for a retailed vehicle will be done with a reman transmission except in the case of any specific legal requirement by a state government agency. Refer to section 5.6.3 for the complete transmission reman program policy.

**5.6.6 Small Cores Alternators (ALT), Power Steering Gears (PSG), AC Compressors (RAC), Starters (STR) Reman Program**

For all ALT, PSC, RAC and STR replacements, the following must be adhered to:

- Remanufactured ALT, PSG, RAC and STR must be used unless any of the following are true:
  - Vehicle has less than 500 miles
  - Specific Legal requirement by a state governing agency.
  - Reman part is unavailable or on backorder (parts availability screen print from WebDCS must be attached to the subject repair order to document this condition).
  - Repeat repair or customer satisfaction - Regional approval is required.

By utilizing Hyundai's DCS Online Website at **www.HyundaiDealer.com,** click on WebDCS, Parts tab, Core Returns to enter core returns and request pickups. YRC will arrange for pick-up and delivery to a YRC Core Return Center where the cores will be inspected, processed, credits authorized, and electronically transmitted to HMA.

As HMA is paying all Freight Charges under this program, it is important to note the following Program Guideline Updates:

- Go to www.HyundaiDealer.com, then click on WebDCS, Parts tab, Core Returns to initiate the core pickups through YRC
- If you have any problems using the website, call your Hyundai Parts Dealer Support Group at 1-800-545-4515 or yrcreverselogistics@yrcw.com Do not use the YRC Service Center to initiate pickups, unless it is an extreme urgency.
- Dealers should remember to print and include with their pickups, the Bill of Lading (BOL) and Packing List from the Website. This will assist in timely processing.
- Include the following completed forms (listed below) with the returned core. Failure to adhere to these requirements will result in the chargeback of the core credit and possibly the warranty claim.
  - Core Return Form

– Dealer's Repair Order / Final Invoice (if sold over the counter)

• Dealers will be billed the freight pickup & recovery costs for all invalid returned cores.

Your adherence to program guidelines will ensure the program continues to run effectively.

If you have any questions concerning the Reman Core Return Program, contact your HMA Parts Dealer Support Center at 1-800-545-4515.

### 5.6.7 Refurbished Hybrid and Electric High Voltage Battery Program

For all hybrid and electric high voltage battery replacements, the following must be adhered to:

- Refurbished high voltage battery must be used unless any of the following are true:
  - Vehicle has less than 500 miles.
  - Specific Legal requirement by a state governing agency.
  - Refurbished high voltage battery is unavailable or on backorder (parts availability documentation must be attached to the subject repair order to document this condition).

A returned high voltage battery core should be fully assembled including all plastic and rubber plugs. Include all completed forms with the returned core. Failure to adhere to these requirements will result in the chargeback of any core credit and possibly the warranty claim.

## 5.7 Non-Reimbursement Items

### 5.7.1 Items Considered Dealer Responsibility, Not Warranty

The following repair items are considered to be Dealer responsibility and are not covered under warranty:

- Inspections included and covered under the Pre-Delivery Inspection Service.
- Minor paint and cosmetic concerns which were not noted at time of delivery of the vehicle to the dealership.
- Disposal fees incurred.
- Defects due to long storage or poor storage conditions caused by lapses in aged inventory maintenance.
- Repairs or replacements made necessary by faulty diagnosis or poor workmanship by dealer personnel, or duplicate, repeat, or comeback/subsequent repairs of the same item if previously performed by the same Dealer, unless the replaced part proves to be defective in material or workmanship.
- Repairs related to the replacement of parts which are not held for inspection by HMA, or are not returned to HMA when requested, or otherwise not handled in accordance with current HMA policies and procedures.

Failure of the following components and assemblies are considered the Dealer's responsibility and are not reimbursable under warranty if the vehicle involved has been in Dealer inventory for an extended period of time (over 90 days):

- Batteries
- Paint repairs
- Bright metal repairs (chrome, etc.)
- Wiper blades
- Weatherstrips
- Soft trim
- Lamp bulbs
- Failure of powertrain components due to corrosion
- Faded or corroded mirrors, lamps, reflectors and lenses
- Fuel system corrosion or defects caused by contamination

### 5.7.2 Items Considered Customer Responsibility

The following items are considered to be the customer's responsibility and are not covered under warranty, unless the items are defective in material or workmanship:

- Normal maintenance service: oil & filter changes, engine tune-ups, anti-freeze/coolant, refrigerant, head light aiming, tire rotation, wheel alignment, fuel system cleaning beyond 500 miles of service on a new vehicle, wheel balancing, and any maintenance or inspection service recommended by HMA for the vehicle involved.
- Defects judged by HMA to be attributable to failure to properly perform the periodic inspections and services as specified in the Owner's Manual.

- Normal Replacement of Service Items
  - Replacements suggested by Dealer personnel as a part of preventive maintenance
  - Replacements required because of abuse, misuse, or improper driving habits of the customer
  - Worn clutch linings, brake linings, and wiper blades
  - Filter replacements (fuel, oil, and air)
  - Spark plugs
  - Condensers
  - Drive belts

- Upholstery and Trim
  - Worn
  - Soiled
  - Torn or cut by a foreign object
  - Normal deterioration due to use and exposure

- Paint
  - Dents, nicks, scratches or other damage
  - Normal deterioration due to exposure
  - Industrial fallout which occurs after delivery of the vehicle to the customer
  - Chipping due to road conditions or hazards (e.g. sand)

- Bright Metal Trim
  - Dents, nicks, scratches, or other damage
  - Normal deterioration due to exposure

- Damage or Failure Resulting from
  - Negligence or improper maintenance as specified in the Owner's Manual
  - Misuse, accident, theft or fire
  - Use of improper or insufficient fuel, fluids, or lubricants
  - Modification, alteration, tampering, or improper repair
  - Racing or a competitive event (competitive events are defined as formal or informal time trials, competition with another vehicle, or any abnormal application of stress to the vehicle or the components thereof)
  - Any device and/or accessory not approved and/or supplied by Hyundai and not installed by Hyundai or an authorized Hyundai Motor America dealer
  - Slight irregularities not recognized as affecting the quality or function of the vehicle, such as slight noise or vibration, or items considered characteristic of the vehicle

- Adjustments Required through Normal Use
  - Pre-Delivery type adjustments required after a reasonable period of normal use

– Adjustment or repair to improve the vehicle's appearance or performance beyond what is considered normal standards
– Adjustment performed for a second time by the same Dealer

**5.7.3 Other Items Not Considered HMA Responsibility**

The following additional repair items are NOT considered to be HMA responsibility and are NOT covered under warranty:

• Tires are warranted by the tire manufacturer and the warranty is administered by the tire distributor and their retail store representatives.
• Any HMA product which has been damaged from accident, fire, or other casualty, or which fails due to misuse, negligence, alteration, or overloading beyond the specified vehicle weight rating, or which has been used for purposes other than those generally accepted applications for which it was designed.
• Any labor operation performed by other than an authorized Hyundai Motor America dealer, except repairs sublet by the authorized Hyundai Motor America Dealer to a specialty shop or performed in an emergency by an independent repair facility. Any claim to HMA for sublet work must be filed by the Dealer who sublets the work, with the sublet final invoice attached to the dealer accounting copy of the repair order and a copy of the sublet final invoice attached to the shop hard copy of the repair order retained in the customer service file.
• Parts not acknowledged by HMA to be defective in original workmanship and/or material.
• Glass breakage or scratches, unless conclusive evidence is presented to substantiate the claim that breakage was unquestionably due to a defect in material and/or workmanship.
• Repairs required as a result of using any component or parts not recommended or not approved by HMA.
• Defects in equipment, devices, and accessories, other than those supplied by HMA and mounted on vehicles by authorized Hyundai Motor America dealers or HMA, and defects resulting from the use of such unspecified devices and accessories.
• Concerns and/or difficulties which are generally not accepted as caused by a defect in material or workmanship, which happen in very special operations such as:
  – Slight sound or vibration which is not recognized as affecting the quality or function of the vehicle
  – Slight misting of oil or the like around packing and/or oil seals which causes no appreciable consumption or dripping of oil
  – Gaps between panels which are within the limits set by HMA
  – External appearance defects such as paint, chrome, and trim, which are not visible unless magnified by special means
• Loss of use of the vehicle, loss of time, loss or damage to personal property or revenues, inconvenience and other consequential damages such as expenses for fuel, telephone, travel, lodging, and towing, (except where such exclusions or limitations are not permitted by law).

– Certain expenses may be covered by the Hyundai Roadside Assistance Program. Customers should refer to their Hyundai Roadside Assistance Program Owner's Guide or the Hyundai Owner's Handbook for these coverages

• Key fob reprogramming should only be necessary when a new key is required, thus any labor-only key fob claim will be denied.
• Shop materials which are considered Dealer responsibility such as rags, shop cleaner, etc.
• Disposal fees incurred are considered the cost of doing business and are therefore considered Dealer responsibility.
• HMA reserves the right to return any claim for a VIN with an open campaign.

## 5.8 Labor Reimbursements

HMA will reimburse the Dealer for labor based upon the Dealer's approved warranty labor rate in effect on the date of repair, multiplied by the time allowed for the operation, as indicated on your claim and shown in the current Labor Time Standard in effect on the date of the repair.

If the labor operation performed is not listed in the Labor Time Standard or in a separate HMA service communication (i.e. Technical Service Bulletin), or if the labor operation is an Actual Time (TT) operation, the Dealer will be reimbursed on the basis of:

- Actual labor operation performance time within reasonable time limits, multiplied by the Dealer's approved warranty labor rate. Service Manager approval must be obtained prior to performing all actual time repairs and must sign his or her name, print his or her name and note the time authorized prior to performing all actual time diagnosis or repairs.

In addition, the Technician must provide an explanation of why the actual time is needed on the hard copy or the repair order.

The time must be realistic and consistent with accepted industry practices. Actual time added to a standard labor operation to supplement the standard time may only be claimed for highly unusual repair situations where additional time is required to properly complete the repair procedure. The same documentation and authorization requirements apply.

**ACTUAL TIME REPAIR OPERATION CODE: (NTT VS ATT)**
Actual Time Repair Operation means any specific repair performed where no applicable standard labor code exists in the manual or additional time is needed for a specific repair:

The operation code for Actual Time must be created as follows:

1. **"NTT"** – NO APPLICABLE STANDARD LABOR CODE EXISTS IN LTS OR LABOR OPERATION IS NOT APPLICABLE TO MODEL
Applicable "NTT" labor operation must always be in the first position when submitting a claim.
The first five (5) digits of the causal part number or replaced part is used for creating your applicable "NTT" Labor Operation.
Example of Causal Part Number: **91837-XXXXX**

To create the applicable labor operation, use the first 5 digits of the causal part number or replaced part number followed by "NTT".
Example of Causal Part Number: 91837-XXXXX
Labor Operation: **91837-NTT**

2. **"ATT"** – ADDITIONAL TIME REQUIRED TO PERFORM REPAIR

Applicable “ATT” labor operation must always be in the second or subsequent position when submitting a claim.
The first five (5) digits of the specific labor operation requiring additional time is used for creating your applicable “ATT” Labor Operation.

Example of labor operation: **56910R00**

To create the applicable labor operation, use the first 5 digits of the specific labor operation followed by “ATT”.

Example of Causal Part Number: **56900-29750**
Labor Operation: **56910R00**
ATT Labor Operation: **56910ATT**

3. ALL CLAIMS WILL REQUIRE COMPLAINT, CAUSE, AND CORRECTION (“3 C’S”) OR WILL BE RETURNED.

Note: Labor operations performed that are not listed in the Labor Time Standard are considered actual time labor operations (TT time). Technicians must record their actual beginning and ending times for all actual time repairs by punching on and off of a Daily Time Ticket (flag sheet). A separate flag is required to document the actual time spent by the technician to make the needed repairs. The time flag strip must be adhered to the back of the repair order hard copy. For dealers with an ERO system, the technician must open a new line and log on and off to document the actual time spent repairing the vehicle.

**5.8.1 No Trouble Found Procedure**

HMA will reimburse the Dealer for specific diagnosis time for “No Trouble Found”, when no repair (claim has no parts, sublet, towing, freight, or any additional repair labor operation) is performed. Repairs that qualify for diagnosis labor time reimbursement, when no problem/trouble is found and no repair is performed, must adhere to the following requirements:

- Repair attempts eligible for no trouble found diagnosis must be related to the following repair categories:
  - Automatic Transmission
  - Engine Electrical
  - Electrical
- The customer’s complaints must be fully documented/explained on the repair order.
- Normal Hyundai documentation/paperwork requirements apply, with the hard copy of the repair order retained for future review.
- Diagnosis performed must directly relate to the Customer’s complaint.
- The Technician must provide an explanation of diagnostic procedures and results on the hard copy of the repair order.
- Approved diagnosis labor time applies to use of only the following diagnosis equipment:
  - Global Diagnostic System (GDS)

– Hyundai Automatic Transaxle Tester

• Reimbursement time is equal to the applicable labor time listed in current Labor Time Standard (LTS) for the labor time operation codes for the Diagnosis operations performed.

• Before and after readings/measurements obtained from the above diagnosis equipment must be documented and appear on the Technician's shop copy of the repair order. All GDS diagnosis usage must have a printout of the before and after readings attached to the Technician's shop copy of the repair order.

• HMA considers fuse failure to be caused not by the fuse itself, but because of an inherently larger issue. Technical support from Techline may assist in finding an actual failure or defective part.

Fuses must be claimed under No Trouble Found using NTF0000000 as the causal part.

Excessive and/or above average requests for "No Trouble Found" diagnosis time will be continually reviewed by HMA.

## 5.9 Repairs on Used Hyundai Vehicles in Dealer Inventory

The phrase, **"Repairs on used Hyundai Vehicles in Dealer Inventory"** refers to repairs performed on any used Hyundai taken into a Hyundai Dealer's inventory and has the remainder of the 60 months/60,000 miles New Vehicle Limited Warranty (NVLW). For such repairs,

- Engine and transmission repairs will require Prior Approval.
- Any used vehicle reconditioning, dents, scratches, or damage to a vehicle is not covered under any Hyundai Warranty.

**Note 1:** HMA will monitor all in-stock vehicle warranty repairs.
**Note 2:** It is the dealer's responsibility to perform any open Service Campaigns or Recalls on used vehicles in dealer stock prior to selling or trading the vehicle. Service Campaigns or Recalls on used vehicles do not require Prior Approval Center authorization, unless otherwise stated.

## 5.10 Warranty Labor Rate Establishment

The Dealer's Warranty Labor Rate approved and reimbursed by HMA is intended to compensate the Dealer adequately, fairly and most importantly, competitively for warranty repairs performed. In determining fair, reasonable, and competitive warranty labor rates under this Section, areas of consideration include:

- The Dealer's current actual retail hourly labor rate.
- The reasonableness of the requested labor rate in relation to local competition and market area.
- The Dealer's year-over-year labor rate increases.

### 5.10.1 Warranty Labor Rate Request Procedure

A warranty labor rate must be requested prior to the operation or start-up date. A change to an existing warranty labor rate may be requested under Subsection 5.10.3 after 12 months from the date of the most recent approved warranty labor rate. The following procedures must be adhered to when requesting a warranty labor rate under this Section.

**Please Note:** The Dealer Principal or General Manager are the only individuals authorized to sign the Labor Rate Request Form under this Section. **If the procedure is not adhered to, the Labor Rate Request form will be returned for corrections.**

### 5.10.2 New Dealer Labor Rate Establishment

The procedures stated below must be followed for a new Dealer requesting the establishment of a Warranty Labor Rate under this Subsection:

- Dealer obtains and DPSM/Region and/or Business Management Representative assists Dealer in completing a Warranty Labor Rate Request/Competitive Labor Rate Evaluation Form and in establishing a Warranty Labor Rate under this Subsection. This form must be submitted to the HMA Regional Office at least 30 days prior to dealership operation date. The form must include the Retail Labor Rate dealer is planning on charging the customer. This rate should be entered in the area called "Projected Posted Retail Customer Labor Rate" on the Labor Rate Evaluation Form. The Warranty Labor Rate Request form is available on www. HyundaiDealer.com under the Service Tab / Dealer Resources / Documents Library / Warranty.
- Warranty Labor Rate Request /Competitive Labor Rate Evaluation form is submitted to the Regional Office for review/approval. Do not send the form directly to the National Warranty Department. ***Competitor labor rates from dealers under the same ownership group as the requesting Hyundai dealer is not allowed.**
- Regional office will forward the reviewed form and proposed recommended rate to the National Warranty Department for approval and processing. **National Warranty will *not approve* a region recommended rate that is greater than the Dealer's "Projected Posted Retail Customer Labor Rate".**

• Dealer receives notification of approval/disapproval of Warranty Labor Rate request from Regional office.

**Note:** Allow at least 30 days for approval/disapproval of the requested Warranty Labor Rate from when the packet is received at National. Please note that the new dealer's labor rate will be made effective (if approved by National) when the dealer becomes activated by Hyundai National's Dealer Development.

• DPSM/Regional Office may perform a review of at least 25 of the most current sequentially numbered Hyundai customer pay retail repair orders within 60 days after Dealer's operation date to validate that the approved Warranty Labor Rate is not actually greater than the Dealer's actual customer pay retail repair labor rate. If the DPSM/Regional Office verifies that the Dealer's approved Warranty Labor Rate is greater than the Dealer's actual customer pay retail repair labor rate during this review, HMA shall have the right to adjust the Dealer's approved Warranty Labor Rate to reflect the Dealer's actual customer pay retail repair labor rate.

**5.10.3 Existing Dealer Labor Rate Change**

The procedures stated below must be followed for an existing Dealer requesting a change in their Warranty Labor Rate under this Subsection. **Labor rate increase requests under this Subsection will be approved up to a maximum of 5% less than the average RO labor dollars per hour calculated in the 25 RO survey. On a case-by-case basis, the actual labor rate approved by HMA may vary dependent on local market conditions and the total year-over-year increase being requested. Please note, Warranty Labor Rate requests submitted under this Subsection do not constitute labor rate requests under applicable state law procedures. Nothing in this policy prohibits a dealer from requesting to have its rate set under applicable state law procedures.**

The procedures stated below must be followed for an existing Dealer requesting a change in their Warranty Labor Rate under this Subsection:

• Dealer provides and completes a Warranty Labor Rate Request/Competitive Labor Rate Evaluation Form*, Warranty Labor Rate Survey, a Warranty Labor Rate Checklist, and 25 most current sequentially numbered qualified Hyundai customer pay Retail Repair Orders (ROs). To be a qualified RO, the ROs must meet guidelines outlined in Section 5.10.6. to its regional office for review. ***Competitor labor rates from dealers under the same ownership group as the requesting Hyundai dealer is not allowed.**

**The above three forms can be found on www.HyundaiDealer.com** under the Service Tab / Dealer Resources / Documents Library / Warranty.
Please be sure to highlight all qualifying repair lines (total labor hours and labor dollars). If the hours are not on the RO, please submit supporting documentation (such as a timesheet) with hours listed on it.

**HMA Dealer will provide to DPSM the Warranty Labor Rate Request Form, Warranty Labor Rate Survey, and 25 of its most current sequentially numbered qualified Hyundai customer pay RO**s for review. The DPSM will validate and review the **highlighted labor hour(s) and labor dollar(s) on each RO** against the survey form. The DPSM should notify its regional office once it receives the dealer's submission. Once DPSM validates the dealer's submission, DPSM will forward to its regional office for review.

If DPSM finds error(s) in dealer's submission, it may return submission to dealer for correction. **Please note that the submission can be returned** to the dealer for the following reasons:

- If ROs are not listed in sequential order on the Warranty Labor Rate Survey Form
- If the supplied ROs are not in sequential order when provided for review
- If the Warranty Labor Rate Request/Warranty Labor Rate Survey are not typed
- If the ROs do not meet the guidelines outlined in Section 5.10.6 or include non-qualified ROs
- If the ROs do not substantiate the dealer's requested rate
- Please do not include maintenance or special pricing repairs (see section 5.10.6 for further details on exclusions) and hours should be typed, not handwritten on the RO.

- Once the submission is complete and reviewed by the DPSM, it will be forwarded to its regional office (Regional Warranty Manager) for review. If the regional office finds error(s) in dealer's submission, it may return submission to DPSM for dealer to correct.

- Once the regional office has reviewed the Dealer's submission, the regional office will forward approved forms (Warranty Labor Rate Request Form, Warranty Labor Rate Survey, ROs, along with Check list) along with its proposed recommendation to the National Warranty Department for final approval and processing. **Once the National Warranty Department reaches its decision, it will notify the Regional Office**.

**Note:** As set forth above, request for Warranty Labor Rates submitted under this Subsection do not constitute requests under state law and are not governed by state law.

Nothing in this Subsection prohibits a Dealer to submit a request to increase its Warranty Labor Rate under applicable state law. Requests for Warranty Labor Rates submitted under state statute shall be governed by the applicable state law.

### 5.10.4 Warranty Labor Rate Request Form

Available on www.HyundaiDealer.com under the Service tab / Dealer Resources / Documents Library / Warranty / Warranty Labor Rate Request

### 5.10.5 Warranty Labor Rate Verification

Approval of the requested Warranty Labor Rate is based on the following requirements and verification:

• The customer pay retail labor rate that is established and implemented by the dealership must be reasonable and consistent with the local trade practices in the market area in which the dealership performs service business. The rate must be consistent with competition and generally accepted sound business practices.
• The repair orders listed on the Warranty Labor Rate Evaluation Sheet must support the region's recommended rate and not above the dealer's posted retail rate for the customer.
• The repair orders listed on the Warranty Labor Rate Evaluation Sheet must be in sequential order and the RO open date (not the RO closed date) is to be used in the RO open date column.
• The customer pay retail labor rate charged to the retail customer must:

1. Be displayed and visible to the customer in both the service customer write-up/reception area and the service customer cashier area.
2. The lettering used to display the customer retail labor rate must be at least 2 inches high.
3. The rate must be displayed at all times during service operation and business hours and should state one or more of the following based upon the method or rate charged:

• If the actual technician clock time to perform the repair is the method of labor charge, the words displayed should state:

Retail Customer Labor Rate charges are based on a labor rate of $ _____ per hour.

• If a published flat rate manual is used as the method of labor charge for the type of repairs, the words displayed should state:

Retail customer labor rate charges are based on a labor rate of $ _____ per mechanical hour.
Retail customer labor rate charges are based on a labor rate of $ _____ per body repair hour.

**Note:** When the customer retail labor rate charge is based upon a published flat rate manual, the display of the posted rate must clearly state that "the dealership uses the labor time published in the (name of manual) labor time manual. The time published in the (name of manual) lists the average time required to perform the repair and therefore, since the time listed is an average time, the listed time may be more or less than the actual time spent to perform the repair" (consult with local laws for other requirements).

• If variable or discounted rates are charged, the words displayed should state for example:

Retail customer labor rate charges for Senior Citizens are based on a labor rate of $ _____ per hour.

**Note:** It is advisable to state who qualifies or the criteria for the variable or discounted rate.

• If a skill level, specialized, staggered or shop-track labor system is used as the method of labor charge, the words displayed should state:

Retail customer labor rate charges are based on a labor rate of:

**$ _____ per hour for technician skill level A**

**$ _____ per hour for technician skill level B**

**$ _____ per hour for technician skill level C**

**Note:** Types of repairs must be correlated with the appropriate technician skill level. This information must be made readily available to the customer if requested by the customer.

• If a team system is used, the displayed labor rate must state the fact that a team system is used by the dealership.
• The retail customer labor rate must be pre-printed or written on all copies of the retail customer pay repair order.
• The labor time charged to each retail customer must be stated in number of hours in tenths on the accounting copy of the retail customer pay repair order. Do not handwrite the hours on the Repair Order.
• The labor charges for all retail customer repairs must be based on a labor time and rate that is consistent with the dealership's practice.
• The dealership must maintain a reasonable percentage of warranty service labor sales to total customer service and warranty service labor sales as determined by HMA.
• If the regional office's review of the 25 sequentially numbered Hyundai retail customer pay repair orders reveals any discrepancies or any of the above requirements are not adhered to, the difference between the new verified rate and the current warranty labor rate will be charged back to the dealer for all labor hours approved under the unsubstantiated warranty labor rate. The new verified warranty labor rate will become the Dealer's approved warranty labor rate.

**5.10.6 Retail Customer Repair Order Evaluation and Exclusions**

Upon submission of a Warranty Labor Rate Request form to the Regional Office under Subsections 5.10.2 or 5.10.3, the DPSM/Regional office may perform, evaluate and verify at least 25 sequentially numbered Hyundai retail customer pay repair orders in order to verify that the labor rate actually charged to retail customers agrees with the dealer's retail customer labor rate posted.

Hyundai Motor America will only accept properly documented retail customer paid repair orders, provided they follow the procedure described below.

All repair order submissions must meet the guidelines described above or will be subject to denial.

The 25 sequentially numbered Hyundai repair orders (ROs) should consist of the most recent retail customer pay repair orders and be in sequential order. ALL customer repair line(s) on each

RO must display the labor hour(s) and labor dollar(s) on the RO or provide qualifying back up (such as a timesheet).

**Repair Order (RO) Requirements:**
The repair order provided must contain the following information at a minimum:

I. Dealer Logo/Name and Address

II. Repair Order must indicate “Accounting, Service File Copy, or Customer Receipt Copy” on the actual RO

*IF a dealer uses an electronic repair order system, the dealer must provide the “Accounting, Service File Copy, or Customer Receipt Copy” in addition to the initial repair order and final invoice copy)

III. The Totals Section should display the following: Total Labor, Total Parts, Total Sales Tax, Total Charges and Discounts, Miscellaneous, or Less Insurance

IV. The RO must include the following information:

a. RO number
b. VIN
c. RO open and close dates (close date is the date the vehicle leaves dealership-document if customer doesn’t pick up vehicle when first informed that it is ready)
d. Vehicle mileage (in and out)
e. Owner/ Customer’s name, address, and phone number
f. Description of customer’s complaint, cause and correction
g. **Customer’s signature** for initial repair order write up
h. **Customer’s signature** for receipt of repair completed vehicle (pre-invoice, customer, accounting, final invoice)
i. Replacement part number
j. Part(s) dollar amount (cost and part amount charged to the retail customer)
k. Part quantity
l. Labor dollar amount (if applicable)
m. Labor hours (if applicable)
n. Technician comments
o. Display and indicate any discounts offered to the retail customer
p. Summary of the “Totals Section” (parts, labor, tax, and etc. / A description of all payments received.

**Retail Customer Pay Repair Exclusions:** The type of repairs listed below will not be part of the evaluation.
· Discounts (i.e. repairs with discounts)

· All factory recommended maintenance services such as 7.5K, 15K, 22.5K, 30K, engine oil, air/oil filters belts (timing, serpentine, V-Belt, drive), spark plugs, tune-ups, fluid flushes & refills, etc.
· Internal, extended warranty, extended service contract, insurance company, or similar paid repairs.
· Any repairs that are not fully customer paid
· Dealership Goodwill repairs, including repairs where the Dealer absorbs a portion of the repair costs.
· Repairs due to customer abuse
· Brake pads (unless part of a larger repair such as replacement of rotors)
· Air Conditioner (AC) Refrigerant Evacuation and Recharge
· Wheel balance and alignment
· Tire service such as replacement and rotation.
· Vehicle Reconditioning
· Wiper blades
· Any repairs with Non-Hyundai make vehicles
· State safety and smog inspections
· All service specials*
· Any menu related repairs
· Variables rates applied to specific fleets.

***Note:** Service specials are generally defined as advertised sales, which may be in effect for a short period or are ongoing. Certain ongoing discounted repair items (e.g. menu repairs) are not considered service specials.

**Note:** The list above is not all-inclusive and is subject to change.

**For Customer Pay (CP) repair orders, be sure to highlight all qualifying repair lines (i.e., repairs that do not fall under the list of the above retail customer repair exclusions)**.

For example, if there is a CP repair order that includes the following repairs and times, highlight each qualifying line and SUM THE TOTAL HOURS AND LABOR DOLLARS. **The sums for the repair order will be entered on one line of the Warranty Labor Rate Survey.**

| RO#12345A | | | |
|---|---|---|---|
| Line 1 | Replace alternator | 1.0 hours | $150.00 |
| Line 2 | Replace compressor | 1.5 hours | $225.00 |
| Line 3 | Replace TPMS | 0.5 hours | $75.00 |
| Line 4 | Change oil and filter | 0.4 hours | $60.00 |
| Total Qualifying Repair Lines | | 3.0 hours | $450.00 |

## 5.11 Warranty Claim Corrections

In instances where an approved/paid warranty claim has been underpaid, overpaid, or contained incorrect or incomplete information such as part number(s), part quantities, labor operation code(s), labor quantities, sublet, towing freight, mileage, etc. Dealer can self-correct the claim two separate ways, depending on if the Total Cost will be impacted.

For any approved/paid claims needing an adjustment that will change the claim amount, Dealer may chargeback the original claim and create a new corrected claim with a new claim number. Do not adjust the original claim, or your resubmission will be denied.

For any approved/paid claims needing a non-financial adjustment (i.e. mileage discrepancy, etc.), Dealer may chargeback, adjust, and resubmit the claim (same claim number).

The following claims will need to be charged back by the Warranty Call Center 1-877-446-2922:

- Any claim(s) that are over the immediate Friday since the payment date.
- Any claim(s) that have been paid incorrectly, and your DCS Debit screen is not working.

## 5.12 Foreign Vehicle Claims

Claims for foreign vehicles being serviced and operated in the United States should be submitted using the Foreign Vehicle Warranty Claim screen located in Hyundai WebDCS under the Warranty tab.

Go to WEBDCS > Warranty Tab > Information > Foreign Vehicle Information screen to obtain the production and in-service dates of the foreign VIN. To verify warranty coverage or for technical support on a foreign vehicle, please be sure to contact the country of origin prior to performing any repairs. The contact information for the countries of origin can be found on the Foreign Vehicle Warranty Coverage Guide and Contact Information.

Once repairs are completed, submit the claim along with attachments required for digital documentation, repair order, and technician copy in WebDCS Foreign Vehicle Warranty Claim screen. Submit the applicable SRC or 3rd party rental in the Rental Claim screen.

For any questions relating to foreign vehicle claims, please submit inquiries by using the Warranty Support Portal in WebDCS.

## 5.13 Dealer Responsibility for Customer Satisfaction

**Repeat visits for the same issue**: Must contact Hyundai Techline (800) 325-6604 for assistance when having trouble in diagnosing, identifying, or repairing a customer's complaint **before beginning the Second, Third, Fourth, or greater repair attempt** for the same problem. Document the contact date, time, and case number on the repair order.

**Days out of service**: If a vehicle is down for over 10 days for parts backorder or technical issues, Dealer must contact the DPSM. If the parts necessary for the repair are on back order and do not affect either the (1) drivability of the vehicle or (2) the safety of the vehicle, Dealer shall return the vehicle to the customer and close out the repair order while the parts are on order. Any parts needed to repair an inoperative Hyundai vehicle must be ordered as an **"Emergency Order" and upgraded to "XVOR" if the part is on back order.**

**Customer Satisfaction**: Notify the DPSM and Regional Consumer Affairs Manager whenever experiencing an issue with customer satisfaction due to warrantable repairs or days out of service. Refer the customer to Hyundai Consumer Affairs line 1-800-633-5151 and the BBB Auto Line 1-800-955-5100.

## 5.14 Sublet Repair Requirements

Sublet repairs are an important part of dealer operations but carry additional responsibilities to maintain compliance with safety regulations and customer satisfaction expectations. This policy outlines the requirements for sublet repairs. These requirements are designed to protect the integrity of repairs and ensure that all work performed meets OE specifications.

Below are common sublet repairs and sublet repair requirements.

**Paint/Anti-Perforation**
To ensure high-quality repairs, compliance with environmental and safety regulations and to maintain consistent industry standards, dealers should not engage or authorize mobile paint operations for any paint repair, refinishing work or body panel repairs.

All paint and body related repairs must be performed at a fixed, licensed facility that meets local, state and federal regulations. Repairs must be completed in a controlled environment to ensure proper curing, finish quality, and adherence to OE specifications.

All invoices must be typed and printed. Handwritten invoices shall not be allowed for repair transactions. This requirement ensures legibility, accuracy and documentation compliance. Sublet vendors must use an electronic invoicing system or a computer-generated format. Invoices must include:

- Vendor name, address and contact information
- Detailed description of services performed
- Itemized costs for each services performed
- Date of service

**Glass**
Dealers must ensure that all sublet glass installations are performed by qualified vendors in compliance with OE specifications and safety standards.

If a windshield or other glass component is found damaged or compromised due to improper installation by a sublet glass vendor, the sublet vendor shall be fully responsible for repairing any damage caused by the improper installation, providing and installing a replacement windshield or glass component at no additional cost, and responsible for any related labor and materials necessary to restore the vehicle to OE standards.

**Cylinder Head Inspection**
All invoices must include:

- Vendor name, address and contact information
- Detailed description of services performed
- Itemized costs for each services performed

- Date of service

Failure to comply with Sublet Repair Requirements may result in denial of claim approval or claim being subject to chargeback. Dealer are responsible for ensuring that all sublet operations adhere to the requirements outlined.

## Section 6: Warranty Record Retention & Administration Requirements

### 6.0 Dealership Documentation Requirements

The information supplied on the repair order, warranty claim form, and other supporting documents is intended to substantiate the Dealer's claim for payment. In addition, this information assists the Manufacturer in determining which parts are failing, why they are failing, and provides information for evaluation of the reliability of the product.

It is the Dealer's responsibility to ensure that every claim submitted contains complete, accurate information, that the claim is fully and correctly executed, and that the supporting documentation, including the repair order, is legible and understandable.

This policy also applies to other claim types submitted to HMA for payment; including Campaign, PDI, Goodwill, and Retail Part.

It is also the Dealer's responsibility to submit the claim within the required time interval. All warranty claims must be submitted to HMA within 30 days of the repair order close date unless state law provides otherwise. The repair order close date is the date when the vehicle repairs have been completed and should similarly coincide with the date the customer picks up their vehicle. All warranty claims returned to a Dealer as incomplete or incorrect must also be resubmitted to HMA within 30 days from the date the claim was returned to Dealer. Failure to fully and accurately complete and submit the claim will be sufficient grounds for rejection or chargeback of the claim.

The record retention and submission requirements stated in the following articles apply to the submission of all types of claims submitted to HMA for payment, including warranty, Campaign, PDI, Goodwill, and Retail Part.

The requirements apply to both traditional manual repair order systems and electronic repair order systems unless specifically noted otherwise.

## 6.1 Repair Order and Warranty Claim Submission Requirements

The repair order is a document that is generated in response to a customer complaint or request. Occasionally, a request indicates only the need for an explanation of a certain feature or the proper operation of a particular component or accessory. In these cases it may not always be necessary to generate a repair order.

**A repair order must be written or computer generated when:**

- An inspection of the vehicle is required.
- A repair, replacement, or adjustment is to be performed (including sublet or outside repairs).
- A Pre-Delivery Inspection service is to be performed.
- A customer statement needs to be documented for future reference.
- A campaign (recall) or owner notification program repair or adjustment is to be performed.
- **Only one diagnostic labor operation (RQ0) is allowed for each repair order (RO).**

**A properly written repair order will:**

- Describe work in complaint, cause, and correction (3C) format.
- Accurately record the customer's complaint as stated by the customer.
- Communicate to the technician either the specific symptoms that the vehicle is exhibiting or a customer complaint for further diagnosis.
- Document technician verification of the complaint and indicate the cause of the complaint.
- Document the corrective action used to resolve the complaint.
- Complete the Technician Comments section on every repair order.
- Substantiate the warranty repair in compliance with HMA's warranty stipulations.

**Because every warranty claim has its origin in a repair order, a complete and legible repair order will ensure:**

- Faster warranty payment
- Fewer returned claims
- Reduced administrative workload

The Dealership's customer service file and the Hyundai WebDCS Warranty Vehicle Information screen must always be checked during the repair order write-up process. A printout of the Warranty Vehicle Information screen must be attached to the service file copy of the RO. This includes dealerships which have an electronic service file as well. This ensures that prior repairs to the same or similar component are recognized.

Repeat repairs due to poor diagnosis or improper repair are not covered under warranty. It is the responsibility of the dealership to stand behind its workmanship. Shop comebacks are not acceptable under warranty.

Checking and attaching a copy of the Hyundai WebDCS Warranty Vehicle Information screen will ensure that the Dealer is aware of any outstanding campaigns on the vehicle as well as any applicable HPP or CPO status on the vehicle.

Hyundai Motor America does not require the utilization of a specific repair order form or that the format be organized in a specifically defined manner. HMA does however stipulate that the repair order form utilized be clear and legible, contain specific details of information, and be administered as follows:

1. The repair order form utilized for warranty claim submission must contain at least the four following copies:
    - Dealer Accounting File Copy (Initial repair order and final invoice copies for electronic repair orders)
    - Service File Copy or Parts Scrapping Copy
    - Shop Hard Copy (Technician Input)
    - Customer Receipt Copy (Initial repair order and final invoice copies for electronic repair orders)

In certain states or local jurisdictions, additional requirements may be stipulated. Dealers should contact their legal counsel for clarification on this issue. Carbonless or transferable areas on the repair order form ensure the transfer of appropriate information to certain copies only. It is appropriate that repair order copies contain only pertinent information.

The Dealer must retain the repair order copies in the appropriate area. Accounting copy files must be kept in numerical sequence in the business office. Customer service file copies and technician input shop hard copies must be retained in the service department organized by vehicle identification number (VIN) in numerical sequence.

If an electronic repair order system is used, copies of the initial customer write-up repair order must be retained with the accounting files along with a copy of the final invoice. Electronic facsimile paper copies of the final repair order must also be retained in the customer service file in the service department.

The Dealer must provide each owner for whom warranty or customer satisfaction service is performed with a completed copy of the repair order stating all repairs and services performed. Certain states or local jurisdictions stipulate that a customer be provided an estimate copy at the time of original write-up. Dealers should contact their legal counsel for clarification on this issue.

**Note:** In dealerships which utilize an electronic repair order system, the Customer must be provided a copy of both the original initial write-up repair order and the final invoice. Likewise, Customer service file copies of both the original initial write-up repair order and the final

invoice, including all parts replaced, must be retained in the service department, organized by vehicle identification number (VIN) in numerical sequence.

2. Repair orders issued to perform a Pre-Delivery Inspection must include the following minimum information:

- Service Manager's **clear and legible** signature
- Dealer Logo and Address
- Repair Order Number
- Vehicle Identification Number (VIN)
- Vehicle mileage **before and after** the required test drive
- Technician time recording - See section 6.3 for requirements
- Repair Order Date
- Purchaser's name, address and telephone number
  - If the vehicle has not been sold by the date of performance of the Pre-Delivery Inspection, use the dealer's assigned vehicle stock number in place of purchaser's information.

3. Repair orders issued to perform warranty, Campaign, or Goodwill repairs must include the following minimum information:

- Repair Order Number
- Dealer Logo and Address
- Vehicle Identification Number (VIN)
- Vehicle Mileage - In **and** Out
  - HMA's policy is to recalibrate the new speedometer with the vehicle mileage at the time of failure replacement. In cases where dealer is unable to locate a vendor to recalibrate the new speedometer, then the repaired/replaced odometer should be adjusted to read 0 miles and a Speedometer/Odometer Repair/Replacement Sticker should be affixed to the driver side door frame indicating that such a repair was performed. These speedometer stickers are available from HMA's Non-Parts Warehouse, part #00924-00000. If a vehicle comes into your dealership for service which has a Speedometer/Odometer Repair/Replacement Sticker on the door frame, please add the mileages of the odometer and sticker to obtain the true mileage of the vehicle. State and local laws and regulations for this repair should also be reviewed to determine if there are additional obligations which might apply.
- Repair Order Open Date **and** Close Date (close date is the date the vehicle leaves the dealership-document if customer doesn't pick up vehicle when first informed that it is ready)
- Vehicle Delivery Date or Date of First Use
- Owner/Customer's name, address and telephone number
- Complaint - Description of the customer's complaint as stated by the customer (the repair order should state words such as "customer states" followed by customer's complaint)

- Cause - Description of cause of complaint
- Correction - Description of the actions taken by the technician to correct the complaint
- Customer's signature for initial repair order write-up
- Customer's signature for receipt of repair completed vehicle
- Claim Number(s)
- Prior approval number authorized by the Prior Approval Center (if applicable)
- Nature Code and Explanation
- Cause Code and Explanation
- Labor Dollar Amount (if applicable)
- Labor Operation Code(s), Quantities and Hours (if applicable)
- Part(s) Dollar Amount (if applicable)
- Part(s) Quantity (if applicable)
- Causal Part Number
- Replacement Part Numbers (if applicable)
- Sublet Amount and Sublet Code(s) (if applicable)
- Sublet Final Invoice Number and Name (if applicable)
- Towing Amount (if applicable)
- Towing Invoice Number and Name (if applicable)
- Freight Amount (if applicable)
- Freight Carrier (if applicable)
- Freight Shipping Date (if applicable)
- For Replacement Service Parts: the date of previous, original installation; previous, original mileage, and previous, original repair order or counter sales ticket number (if applicable)
- Technician Comments

4. The repair order's technician input/shop hard copy must be separated from the repair order's remaining soft copies prior to the work being performed. The technician is to be given the technician input/ shop hard copy of the repair order as the technician's work copy at the time of repair performance. The remaining repair order soft copies are to be sent to the Parts Department or elsewhere as needed. The complete repair order, including the technician input/shop hard copy and all the remaining soft copies are to be sent to the appropriate area for close out of the repair order after completion of the repair.

5. The repair order must contain all parts replaced as per the repair. The parts listed must be legible and contain:

- Complete Replacement Part Number(s)
- Replacement Part Quantity(s) issued
- Dealer Net cost of replacement part(s) on the date the repair is performed. (The extended total Dealer net costs must be stated for replacement part quantities greater than 1)

If an automated parts invoice or a separate parts invoice is used, the automated or separate parts invoice must contain cross-reference to the repair order and be attached to the technician input/shop hard copy that is retained in the customer/VIN service file. The repair order must also contain cross-reference to the automated or separate parts invoice.

6. The customer must sign and approve all repairs for complaints stated on the repair order. The customer must sign the repair order prior to the work being performed and upon receipt of the vehicle after completion of the repairs. Dealerships which utilize an electronic repair order system must ensure that a customer signature is obtained on both the original initial write-up repair order copy as well as the final invoice copy.

Digital signatures, or other electronic acknowledgements (E.g., signatures on a tablet, approval via text, email, or other app), are acceptable means of capturing customer authorizations. Electronic acknowledgements should be dated and time stamped, printed, attached, and retained as part of the work order. If the customer uses a night drop envelope, the night drop envelope must contain the customer's signature and should contain the date of drop off. The signed night drop envelope must be retained in the service files attached to the technician input/shop hard copy of the repair order. In the event that the Dealer cannot obtain a customer signature on a night drop envelope of a repair order, the Service Manager must sign and date the repair order.

The Service Manager must sign the repair order for vehicles repaired that are in stock and for the repair orders issued to perform the Pre-Delivery Inspection. Digital signatures (including the ones captured via tablet) are acceptable means of capturing the Service Manager's signature.

Upon completion of the repairs and receipt of the vehicle, the customer must receive the customer receipt copy of the completed repair order which must contain a description of the warranty repairs performed and the parts replaced on the vehicle.

7. The technician input/shop hard copy or electronic hard copy of the repair order must contain the technician's comments and description of the repair the technician performed. The description written by the technician must include the cause of the customer's complaint and include notes describing the diagnostic process. The technician must also document the corrective action used to resolve the complaint. In addition, technical measurements or readings that are required in order to determine the serviceability or performance of a part or assembly, as stated in the applicable shop manuals, must be stated on the technician input shop hard copy/electronic hard copy of the repair order.

Repairs should follow shop manuals procedures including replacing one-time use parts. One-time use parts designated in order to perform the repair need to be charged out on the warranty repair order in order complete the repair properly. If a warranty repair requires one-time use parts to properly repair a customer vehicle and the warranty claim is submitted without the one-time use parts, the warranty claim may be subject to denial or chargeback.

Ensure that all repairs are carried out in accordance with the latest published procedures detailed in shop manuals or other service related publications such as Technical Service Bulletins and campaigns. Refer to the most recent model and model year specific repair manual Technical Service Bulletin for diagnostic and available repair details.

Before and after readings/measurements must be recorded and documented. Parts requiring measurements and readings include, but are not limited to:

- Air conditioning Evac & Recharge refrigerant
- Automatic transmission oil pressure test/Diagnosis Worksheet
- ATM Tester
- Battery tester readings/Battery code and printout
- Brake discs/rotors
- Brake shoes
- Idle speed/Throttle body
- Cylinder compression
- Cylinder leak down
- Emission test readings
- Engine Diagnosis Worksheet
- GDS test printouts/readings
- Gear box preload
- Headlamp aiming
- Ignition timing
- Oil consumption test
- Test drive results
- Valve clearances
- Vehicle Tracking Data Sheet
- Wheel alignment, including Tire Balance Data Sheet
- Wheel balance

**Note:** Go to www.HyundaiDealer.com under the Service tab/Dealer Resources/Documents Library/ Warranty for the latest Test and Measurement Documentation Chart

Dealerships which utilize an electronic repair order must adhere to the same requirements, and technicians must input their comments into a computer terminal. In all instances where technician's comments are updated, a hard copy of the repair order with the technician's comments must be generated and retained in the customer/VIN service file. This requirement also applies to repairs orders when information is entered using a digital service lane technology application.

8. The individual technician performing the repair must be identified by name or number on the face of the technician input shop hard copy of the repair order next to each labor operation the

technician performed. Technician identification documented for a repair must be true and accurate. This requirement also applies to dealerships which utilize a team system. Identification by team only is not adequate. A code or name must also be utilized with an electronic repair order system.

9. All information added to the technician input shop hard copy of the repair order after the initial repair order write-up with the customer, must be transferred and added to the remaining repair order soft copies, including the customer receipt copy. Subsequent generations of a given repair order in an electronic repair order system must be printed and retained in the customer/VIN service file such that the evolution of a repair order can be demonstrated.

10. Warranty repairs made without a customer complaint are add-on repairs, and are only allowed under these circumstances:

- For completion of applicable campaigns or recalls.
- For repairs to items that would seriously impact the operational safety of the vehicle (for example SRS light, ABS light, Check Engine Light, or profuse fluid leaks).

Add-on Warranty repairs must adhere to the following administration requirements:

– The technician must provide a complete description of the needed work on the hard copy of the repair order. The description must include the cause, including notes describing the diagnosis. The technician must also document the corrective action.

– The Service Manager must verify the needed repair and sign next to the added repair on the hard copy of the repair order. This authorization must be clearly documented next to the technician's description of the problem prior to the work being performed. **A Service Manager's signature at the top or bottom of the invoice is not acceptable.** If the customer on the repair order was notified of the add-on repair by phone, it is acceptable to document on the repair order hard copy the date, time, contact method and the name of the customer who authorized the add-on repair. The customer who authorized the add-on repair should be the same customer on the repair order. The Service Manager's signature must be next to the add-on repair line.

– The additional repair information must be transferred and added to all remaining copies of the repair order.

– The customer's signature must appear next to the additional repair that has been added to the repair order. The signature must be next to the added repair description. A customer's signature at the top or bottom of the invoice is not acceptable.

– If an electronic repair order system is used, the add-on repair must be indicated with some sort of identifier such as an "*".

If a warranty repair is generated from a customer pay repair order, whereby the dealer uses separate repair orders for customer pay and warranty, the repair is considered an add-on repair. These repairs are subject to the same requirements as repairs made without a customer complaint. The customer pay repair order must have these items:

• The Service Manager's signature **next to** the added repair(s) on the hard copy of the repair order.
• The warranty repair description.
• A cross-reference to the warranty repair order. Complaints added by the customer after the time of initial write-up are customer add-on repairs. The date and time the additional request was made must be documented on the repair order. The following authorization requirements apply:

• The Service Manager must sign next to the added customer complaint before the repair work is performed. The signature must be next to the added repair description. A Service Manager's signature at the top or bottom of the invoice is not acceptable.
If the customer on the repair order was notified of the add-on repair by phone, it is acceptable to document on the repair order hard copy the date, time, contact method and the name of the customer who authorized the add-on repair. The customer who authorized the add-on repair should be the same customer on the repair order. The Service Manager's signature must be next to the add-on repair line.

11. In certain cases, a repair cannot be completed due to replacement parts not being available. In these cases, **do not** submit the warranty claim for the diagnosis or repair until the part is installed and the repair completed. Drivable vehicles are to be returned to the customer while waiting for the part to arrive. When the vehicle is returned to the customer, fill in the "date/mileage in" and "date/mileage out" fields accurately on the repair order. On the repair order, be sure to add a statement that the vehicle is drivable and was returned while waiting for the parts to arrive.

When the part arrives to the dealer:

- Open a new repair order using the date and mileage of when the vehicle was originally presented for diagnosis or repair.
- On the new repair order, refer to the original repair order number when the part was originally ordered and repeat the original customer complaint statement.
- In the customer concern section of the new repair order, input the repair completion date and mileage.
- In the customer concern section of the new repair order, include the following information:
    - The date and mileage when the vehicle was originally presented for diagnosis or repair.
    - The date the parts were ordered
    - The parts status at the time originally ordered (e.g. backordered, etc.).
    - The date the parts arrived at the dealer.

- The date and mileage of when the repairs were completed.

### 6.1.1 Repair Digital Documentation

Digital documentation of warranty, campaign, and goodwill repairs requires video or photo attachments of VIN, Miles, Part and Sublet(when applicable) to the claim.

Dealer can use GDS/STUI or any electronic device to capture the required repair information, photos or videos, to attach to the claim. Using GDS/STUI can automatically capture vehicle's VIN and Miles (2019MY+ only, for older models take photo of odometer), however, a photo must be uploaded to the Submission Process Tracker in GDS for the auto capture info to transfer to HMA. Photos and videos uploaded to HMA via STUI are available in WebDCS to attach to the claim.

Photos, videos, and documents captured by the technician related to the repair must be attached to the claim in WebDCS. The photos and/or videos should be digital, colored, high-resolution, original, and unedited displaying the defective part and/or the area of concern. A category must be assigned to each attachment file. In cases where GDS/STUI is not available, such as an outage, dealer may take photos or videos using separate device and manually attach files to the claim. Multiple uses of the same photo image for Prior Approval submission is not allowed.

If a warranty, campaign, or goodwill repair attaches the required digital documentation to substantiate the claim at submission, HMA will not require separate and distinguishable technician on/off punch times for any job that is identified through a labor operation in the Labor Time Standard, as well as any Campaign/Recall or op code in a TSB. It is the responsibility of the Dealer to verify that the required digital documentation is attached to the claim at the time the claim is submitted for payment.

Straight Time (NTT, ATT), and claims (including Campaign/Recall) utilizing non-HMA LTS hours must still be supported by separate and distinguishable on/off punch times, see sections 5.8 and 6.3.

Note: Pre-Delivery Inspection (PDI) claims do not require technician punch times.

For campaigns/recalls, please check the TSB instructions for specific STUI/digital documentation requirements. If not specified in TSB, then VIN and Miles are required. Document the repair or part replacement as instructed in the TSB.

HMA reserves the right at any time in its sole discretion to require a dealer to submit punch times (see sections 5.8 and 6.3) instead of the digital documentation policy outlined above.

### 6.1.2 GDS Basic Connection Requirements (BASICA00)

Claim submission for GDS Basic Connection of operation code BASICA00 (0.1) applies to warranty, paint, anti-perforation, hybrid, emissions, and powertrain claim types. BASICA00 does not apply to other claims, such as campaign, retail part, or goodwill claim types. BASICA00 also does not apply without a related warranty repair claim.

BASICA00 can only be submitted once per repair order. If the repair order contains a diagnostic RQ0 (0.3) operation code or No Trouble Found (NTF), BASICA00 will not apply for claim submission.

All modules must be selected from the GDS Fault Code Searching (FCS) and the GDS results must be uploaded to HMA in order to qualify for BASICA00 submission. As mentioned in 6.2.1 Repair Order Retention Requirements, a GDS screenshot should be saved in the repair order documentation retention and the screenshot should be attached onto a claim if FCS GDS results cannot be uploaded to HMA.

## 6.2 Repair Order Retention Requirements

### 6.2.1 Repair Order Retention Requirements

As stated in the Sales and Service Agreement, Dealers are required to maintain all warranty and policy repair orders and related documentation for a period of five years, exclusive of any retention period required by any governmental entity. The retention period begins with the date of claim payment, not from the date the repair was performed.

Dealers must retain all substantiating records and documents for all claims submitted to HMA for payment. The supporting documents must be arranged in a systematic order and be readily accessible for HMA review.

**Note:** Repair order copies requested by HMA must be submitted to HMA by the Dealer within ten business days from the date of the request.

The following list of supporting records and documents must be available for examination by HMA's representatives:

- Technician input/shop hard copy, service file copy (both original initial write-up repair order and final invoice copies for electronic systems) and parts scrapping copy of the repair order.
- Dealer accounting file copy of the repair order (This copy must list the part(s) replaced and must indicate the labor charge).
- The DCS acknowledgment (Claim Status Report) copy (from the day after submission) and any supporting documents, properly cross-referenced, must be retained when a warranty claim is subsequently prepared and submitted to HMA.
- Attached to the 10 year/100,000 mile Powertrain Repair Order and retained in the dealer files: A fully executed 10 year/100,000 mile Powertrain Limited Warranty Original Owner Verification Affidavit Form, along with the documents listed below.
    1. A photocopy of the customer's current and up-to-date (not expired) owner registration from Department of Motor Vehicles (DMV) as required by Prior Approval Request Submission (5.4.2) for 10/100k Powertrain warranty validation.
    2. A printout of the Warranty Vehicle Information Screen.
- All detailed records used to prepare payroll for Dealer employees who performed the particular repairs or replacements (includes time ticket and flag sheet hard copies).
- Original or true copies of final invoices covering parts or services purchased outside, and the record of payment of such invoices, (e.g. sublet repair final invoices, purchase orders, accounts payable files, parts inventory files, open account statements, etc.) along with Rental Agreements and other relevant documents
- New vehicle invoices
- Customer sales files (includes copy of Retail Delivery Registration (RDR) form, customer sales contract, etc.)

- Customer service files (includes Pre-Delivery Checklist, Vehicle Delivery Presentation, and copies of all repair orders including warranty, service campaign, Dealer internals, customer pay, body shop estimates, in-transit damage, etc.)
- Warranty Claim Register
- Dealer Financial Statements
- Loading/Distribution Sheets
- GDS machine before and after readings – upon completion of any test, take screenshot using GDS screen capture function for attachment to claim
- Any other records used by the Dealer to support the information recorded on the claim form

These requirements fully apply to electronic repair order systems as well as traditional manual repair order generation systems.

### 6.2.2 Electronic Document Storage Requirements

Hyundai supports the use of fully integrated document retention systems that meet or exceed the following requirements.

**All documentation must:**

- Be complete and retained as outlined in 6.2.1 Repair Order Retention Requirements in effect at the time of the repair.
- Be clearly legible for review and available upon request.
- Be easily retrievable by VIN sequence.
- Be backed up to a separate storage drive, providing redundancy for all customer and vehicle data.

**Original documents may be discarded only if there is a way to retrieve acceptable electronically stored documents that are identical copies of the original, and the dealer must have a back-up recovery plan to replace electronically stored documents in the event of disaster.**

Document storage systems must:

- Prohibit changes to the document after it has been imaged. If modification is necessary, both original and modified copies must be available, with complete explanation to include the name of the individual who approved the RO modification and date of modification.
- Protects against information being altered or destroyed once a repair order is finally closed.

**Note:** Any electronic communication (E.g., text messages, email, social media posts) done between the dealer and customer regarding any form of repair approval or update must be time stamped and stored in a manner that cannot be altered and can be retrieved in case of future audit or other business needs of HMA. Digital signatures, or other electronic acknowledgements

(E.g., signatures on a tablet, approval via text/email, or other apps), are acceptable means of capturing customer authorizations and must also be dated and stored in a manner that cannot be altered and can be retrieved in case of future audit or other business need of HMA.

In the event that a dealer is unable to produce sufficient RO documentation upon request or required control features are not being utilized, HMA reserves the right to chargeback the subject claims.

**Dealerships may utilize an electronic document storage system that meets the above requirements to retain all required documentation for the 5 year total retention period as required per the HMA Dealer Sales and Service Agreement. In certain states or local jurisdictions, additional requirements may be stipulated. Dealers should contact their legal counsel for clarification on this issue.**

## 6.3 Time Recording Requirements

### 6.3.1 Time Recording Requirements

The actual starting and ending times for all warranty repairs must be documented using one of these methods:

- A time punch clock which must show month, day, and time.
- An electronic repair order (ERO) system that records the times automatically on the service file or invoice copy of the repair order.

If a time punch clock is used, technicians must record their actual beginning and ending times by punching on and off of a Daily Time Ticket (flag sheet). Customer pay and internal work performed on the same repair order with warranty work requires separate time recording. The information on each time flag must be completely filled out. This includes the repair order number, technician identification, the type of repair performed (customer pay, internal, or warranty), labor time standard hours, and the appropriate line on the repair order that corresponds with the repair performed. The time flag adhesive strips must be removed from the flag sheet and affixed to the back of the repair order hard copy. The carbon copy of the flag sheet must be retained by the dealership for a period of five years, exclusive of any retention period required by any governmental entity. HMA reserves the right to chargeback any claim where the Dealer failed to retain the carbon copy of the flag sheet.

HMA will accept computerized clocking entries from an electronic repair order system provided they reflect “ON” and “OFF” entries. The actual system generated technician time tracking must be printed, and appear on the service file or invoice copy of the repair order. Time punch clocks are required when utilizing an electronic repair order system that does not generate “ON” and “OFF” clocking substantiation.

Actual labor time operations (ATT and NTT) not listed in the Labor Time Standard Manual that are listed on claims submitted to HMA for reimbursement must comply with the following requirements:

- The technician must provide a detailed explanation of why actual time is needed on the hard copy of the repair order. Technician comments should be entered in the claim in the ‘Additional comments’ field. If Techline was contacted, the Techline Case # should also be included.
- Service Manager must review all actual time diagnosis and repairs. The Service Manager must consent to the actual time **next to the repair line** by:
- Signing his or her name
- Printing his or her name
- Noting the time consented

A Service Manager’s signature at the top or bottom of the invoice is not acceptable.

- A separate time recording is required to document the actual time spent by the technician. Each actual time operation requires separate beginning and ending time recording.
- For diagnostic actual time labor operations, an explanation of the applicable diagnostic equipment and method must be documented on the hard copy of the repair order. The documentation must also include before and after readings/measurements.

The general requirements shown below are to be followed for all time operations by all Dealers on claims submitted to HMA.

- The technician's time may not be recorded on two or more repairs at the same time. Overlapping time recorded on two or more repairs will be subject to chargeback. To avoid the possibility of overlapping time recording, no more than one repair order may be assigned to a technician at any given time.
- If the technician inadvertently forgets to punch the beginning or ending time for a given repair, the Service Manager may handwrite the missing time punch. The Service Manager must authorize the time recording by recording the date and signing next to the flag strip affixed to the hard copy of the repair order.
- Only authorized members of service management who are non-production/working technicians may enter handwritten time. A member of service management who also performs warranty repairs and is separately paid for such work is not authorized to sign time clocking. In this case, the Dealership General Manager must sign the handwritten time and actual time repairs.
- When more than one technician performs repairs on the same vehicle, the time for each technician (including team lead technicians) must be recorded separately. The time flag for each technician must be affixed to the back of the repair order hard copy.
- Starting and ending times for PDI repair orders must be accounted for separately from time spent installing accessories or completing other repairs. The Service Manager must authorize any time spent on repairs for vehicles during the PDI process by signing next to the explanation of why the additional work is required.
- When a repair is not completed on the same day, the technician is taken off the job, or when the technician takes a lunch or personal break, the time off and the time resumed must be documented. All time recording must reflect the actual starting and ending times for the repair.

NOTE: Digital documented warranty, campaign, and goodwill repairs do not require technician to punch on and off any job that is identified through a labor operation in the Labor Time Standard, as well as any Campaign/Recall or op code in a TSB. Straight Time (NTT, ATT), and claims (including Campaign/Recall) utilizing non-HMA LTS hours must still be supported by separate and distinguishable on/off punch times, see section 6.1.1.

### 6.3.2 Time Recording for Service Performed by a Technician Team

Time recording requirements and payroll documentation apply to all technicians– whether working individually or working as part of a team. The additional time recording requirements as they apply to technician team service operations are:

- Each technician's time (including the lead technician's time) must be recorded separately by clocking on and off of a daily time ticket (flag sheet).
- The information on each time flag must be completely filled out. This includes the repair order number, technician identification, the type of repair performed (customer pay, internal, or warranty) labor time hours, and the appropriate line on the repair order that corresponds with the repair performed.
- The hard copy of the repair order must contain the name or number of the technician(s) who performed the repair alongside the description of the repair. Team only identification is not acceptable.
- The Labor Time Standard applies regardless of technician pay plans or working arrangements. For example, a trainee technician may remove and reinstall a transmission while the actual repair is performed by an expert technician. Reimbursement is based on the applicable labor time standard operations regardless of the fact that two persons work on the repair at the same time or that the actual time required for the repair may be in excess of the labor time standard because of the use of a trainee technician.

NOTE: Digital documented warranty, campaign, and goodwill repairs do not require technician to punch on and off any job that is identified through a labor operation in the Labor Time Standard, as well as any Campaign/Recall or op code in a TSB. Straight Time (NTT, ATT), and claims (including Campaign/Recall) utilizing non-HMA LTS hours must still be supported by separate and distinguishable on/off punch times, see section 6.1.1.

## 6.4 Parts Substantiation

Documentation must be provided to substantiate that a specific part stated on the warranty claim was used to repair the vehicle. The repair order must indicate and include the parts charged out to the repair order for a specific vehicle.

For Dealers using an automated parts inventory system, a numbered counter requisition cross-referenced with the repair order or point of sale document and a date of transfer of parts from inventory, must be completed each time parts are removed from inventory. Each counter requisition number must be recorded on the repair order or the point of sale document. Every part removed from inventory must be listed on a counter requisition. Counter requisitions must be accounted for and filed in numeric sequence.

All invoices or copies covering parts or services purchased from vendors or other shops (and a record of payment of such invoices), new car invoices and any other records used by the Dealer to substantiate the information recorded on the claim, must be retained by the Dealer for a period of five (5) years from date of claim payment. Repairs performed using other than Genuine Hyundai Parts purchased from HMA must have the non-genuine Hyundai part supplier's name, invoice number, and part number recorded on all copies of the repair order including the customer's receipt copy. The supplier's invoice must be retained with other accounting files. The use of non-genuine Hyundai parts for warranty repairs requires prior approval from the District Parts and Service Manager. Non-genuine Hyundai Parts include Hyundai-branded parts that are not supplied by HMA and are intended for use outside the U.S.

In the event that a requisitioned part is not utilized in a repair and returned to inventory, this fact must be documented. Dealers who utilize an electronic repair order system or a parts inventory control system must generate a monthly report which tracks all activity for parts returned to inventory. A copy of this adjustments to inventory report should be generated prior to the monthly close and retained in the Parts Department.

## 6.5 Sublet Repair Record Requirements

When sublet repairs are performed, the Dealer's repair order must contain the following sublet final invoice cross-reference information:

- Description of sublet repair
- Name of sublet vendor repair shop
- Date of sublet repair
- Purchase order number issued for sublet repair
- Sublet repair invoice number
- Sublet amount

The sublet repair final invoice must be itemized and contain the following repair order cross-reference information:

- Dealer's repair order number
- Vehicle Identification Number (VIN) or vehicle license plate number
- Date of sublet repair
- Mileage of vehicle
- Mileage vehicle towed (if applicable)
- Purchase order number issued for sublet repair
- Sublet amount
- Reasons and details of repair performed
- Detailed breakdown of part(s) and labor:
- Detailed part(s) itemized
- Detailed labor itemized

The original copy of the sublet vendor final invoice must be attached to the accounting copy of the repair order. A copy of the sublet vendor final invoice must be attached to the technician input/shop hard copy of the repair order which is filed in the service files. All sublets require an final invoice as well as any other pertinent information to be attached.

If the Dealer supplies the sublet vendor with the part(s) required to perform the sublet repair, the Dealer is to claim the part(s) on the warranty claim as a detail part(s) (enter part under Part Information section on WebDCS). The Dealer supplied part(s) is not to be shown or claimed on the vendor's sublet repair final invoice. If the vendor supplies the part(s), the vendor supplied part(s) cost is to be included on the vendor's sublet repair final invoice amount.

The amount of sublet requested on the claim for reimbursement must be the actual net sublet cost incurred by the Dealership. All sublet amounts claimed must be the actual sublet amount cost paid to the sublet vendor, less any discounts or rebates.

**Note:** Sublet amount over $100 will require Additional Comments to be entered in the warranty claim.

## 6.6 Supervision Responsibilities

Service management is responsible for verifying that the repair order contains accurate in/out mileage, open/ close dates, owner-described symptoms and clear legible instructions, before issuing the technician input/ shop hard copy of the repair order to the technician. Service management is also responsible for:

- Identifying on the technician input/shop hard copy of the repair order the specific employee name or number (supervision/salary/hourly) assigned to perform the warranty/customer satisfaction repair.
- Verifying that the Service Advisor enters the nature of the customer's complaint.
- Verifying that the repairing technician enters the cause of the customer's complaint and enters a description of the repair on the repair order technician input/shop hard copy (3 Cs).
- Verifying that the correct nature and cause codes are entered on the repair order processing copy and warranty claim.
- Entering on the repair order any additional repairs that are required but not discovered until after the repair order initial write-up. The additional repair entries must be signed by the Service Manager, next to each actual repair, to indicate approval of the additional repairs before the repairs are performed. (This signature is required even if the additional repairs are written-in by service management).
- Signing starting "on" and completion "off" clocking times for actual straight time repairs.
- Signing any hand written time recording entries.

## 6.7 Customer Service File

To administer the warranties, the Dealer must establish and maintain a customer/VIN service file. Maintaining appropriate records and supporting documents will enable the Dealer to service the owner better and minimize the possibility of comebacks and denied claims or charge-backs due to servicing ineligible vehicles. Files must be filed/organized by VIN.

### 6.7.1 Vehicle Identification Number File

- Indicate the vehicle identification number (VIN) on the file folder tab for each new vehicle received.
- Arrange folders in numerical sequence by the complete 17 digit VIN, the last six digits of the VIN, or the short VIN which is comprised of the 6th, 10th, and 12th through 17th digits of the complete 17 digit VIN.
- Insert copies of all repair orders, signed Pre-Delivery Inspection forms, claims, Warranty Vehicle Information screen printouts, and other required documents in the corresponding folders by date as prepared.
- Write the owner information and date of sale or date of first use on the folder tab as soon as available.

The Vehicle Identification Number filing system allows for a file to be started upon completion of a new vehicle Pre-Delivery Inspection. This type of filing also allows for new and/or multiple owners, thereby better recognizing comeback repairs and vehicle service history.

## 6.8 Warranty Audit Policy

HMA may conduct audits of Dealer claims and claim supporting records in accordance with provisions of the Dealer Sales and Service Agreement (refer to Section 1).

Records supporting wholesale parts purchases or parts incentives may also be examined during the audit. An audit does not imply that improper practices are being or have been engaged in, however, a chargeback will be made if the audit reveals that improper or unsubstantiated claims have been submitted by the Dealer and paid by HMA.

HMA may also conduct audits of Dealer's compliance of calibration and operation of shop tools and equipment in accordance with Manufacturer's required calibration schedule.

Improper and/or unsubstantiated claims include, but are not limited to, those claims involving:

- Unauthorized replacement of assemblies or parts.
- Misrepresentation of parts acquisition cost or sourcing of part.
- Unauthorized use of non-Hyundai Genuine Parts.
- Parts claimed at a rate in excess of parts purchased.
- Parts received from Dealer Parts Department inventory prior to performance of repair.
- Defective parts not returned to Parts Department by technician.
- Special ordered parts not documented or indicated.
- Incorrect labor operation.
- Unauthorized add-on, repeat, duplicate, comeback or improper repairs or over repairs.
- Unnecessary repairs performed which are not based on a customer complaint or repairs where no corrective action is taken, except as authorized by an HMA representative.
- Customer signed Early Bird envelope without an attached RO hard copy. Early Bird envelope does not replace RO requirements.
- Printed (or digitally captured using tablet) pre-workorders used for customer write-ups not attached to an RO hardcopy. Properly completed pre-workorders must be retained and attached to the RO hardcopy.
- Printed (or digitally captured using tablet) Multi-Point Inspection (MPI) sheets not attached to an RO hardcopy. Properly completed MPI sheet(s) must be retained and attached to the RO hardcopy.
- No customer signatures authorizing repair(s) or acknowledgement of repair completion.
- Reprinted lost or damaged repair orders without signed authorization from the Service Manager.
- Signed reprint without the original repair order. When utilizing reprints, the original repair order with customer signature at the time of original write up must be retained.
- No technician remarks or incomplete technician remarks, including required before and after measurements/readings.

• Unsubstantiated labor time.
• No supporting documentation or inadequate supporting documentation.
• Reconditioning of used vehicle inventory at HMA Warranty expense.
• Charging HMA for shop materials.
• Repairs not covered by warranty or campaign, repairs related to improper installation of an accessory, repairs related to an accident, to customer modification, neglect, abuse, or lack of maintenance, or any claims which are not Hyundai responsibility.
• Misrepresented VIN, in-service date, repair date, mileage, causal part, labor operation, sublet, freight, or towing.
• Misrepresented HMA authorization, deliberate claim splitting to avoid authorization or claims where payment received exceeds the amount authorized.
• Duplicate submission and payment for a repair.
• Related concerns for same repair on separate claims.
• Work not performed as claimed.
• Improper actual time recording to substantiate repair.
• Parts not available for inspection, improperly completed Warranty Tag, not defective as alleged, or not applicable to model, body style or trim level.
• Technician concurrently working on two or more vehicles or repair orders at one time.
• Payroll records which do not support technician payment or amount of payment to technician.
• Unauthorized mark-up of sublet, NPN parts, towing or freight.
• Any claim in which repairs and/or record retention policy and procedures were not properly adhered to.
• Any claim in which repairs and/or record retention policy and procedures were not properly adhered to.

The list of examples shown above is not all-inclusive.

The dealer has the responsibility to fully adhere to the Warranty Policy and Procedures provisions, including verifying that repairs are eligible and needed due to a warrantable defect, regardless of:

- Prior Approval (PA)
- On-site inspector approval
- Digital imaging approval
- Techline, Field Service Engineer involvement, etc.

Company involvement, including prior repair approvals, does not exempt the repair from warranty audits, review, or chargeback.

## 6.9 Warranty Audit Procedures

HMA highly encourages Dealers to establish, maintain and operate an effective system of internal controls to meet HMA reporting and record keeping requirements. These internal controls are critical components of a Dealer's parts & service management and can help Dealers achieve their goals and long-term profitability.

Warranty audits not only cover the warranty aspect of the Dealer's parts & service operation, but also provide an opportunity to assess the effectiveness of internal controls and evaluate any deficiencies and/ or discrepancies in a Dealer's Warranty Policy and Procedures compliance. At the completion of the audit, all noncompliant audit findings are documented in the audit report and may result in a chargeback to the Dealer. In addition, noncompliant audit findings resulting from irregularities and/or discrepancies are included in the audit report as formal requirements and recommendations designed to assist the Dealer in operating a more efficient, profitable, and properly controlled parts & service operation.

## 6.10 Warranty Claim Reconciliation

### 6.10.1 Warranty Claim Register

A Warranty Claim Register provides the Dealer with a summary of the status of the warranty accounts receivable from HMA. A properly maintained warranty claim register enables the Dealer to reconcile the Warranty Settlement Statement. Reconciliation of warranty claims to the Warranty Settlement Statement will indicate when credits for warranty adjustments are being received and whether or not there are any amount differences between amounts claimed and the amounts credited.

The Warranty Claim Register should be administered as follows:

• Post each warranty claim submitted to HMA to the Warranty Claim Register daily. The information posted should include at a minimum:

- Repair Order Number
- Claim Number assigned by Dealer
- Warranty claim amount
- Warranty claim initial submission date to HMA
- Warranty claim return date, if applicable
- Warranty claim return reason(s), if applicable
- Warranty claim resubmission date(s), if applicable
- Warranty claim payment date
- Warranty claim payment amount
- Warranty claim different appeal date(s), if applicable
- Warranty parts request date, if applicable
- Warranty parts return date, if applicable
- Warranty date to scrap
- Warranty date scrap initial
- Warranty claim chargeback date, if applicable

Posting to the Warranty Claim Register should be initiated when a warranty claim is submitted to HMA. Upon notification of claim status, such as payment or return, as per the Warranty Settlement Statement or by the DCS daily answerback (Claim Status Report), the claim's status should be posted to the Warranty Claim Register.

• Post the following data from the Warranty Settlement Statement to the Warranty Claim Register upon receipt of the Warranty Settlement Statement:

- Payment/Return date
- Claim credit amount

• Note any discrepancies between the requested input data per the claim submitted over WebDCS and the Warranty Settlement Statement and add remarks, if necessary, for the difference in the Warranty Claim Register. Examples of discrepancies include:

- Errors or differences in the amount credited.
- Claims returned for correction should have the date of return posted and the date of the corrected resubmission posted.
- If a returned claim is not to be resubmitted, note it in the remarks section.

The Warranty Claim Register and the Warranty Settlement Statement must be retained in the dealership accounting office files. If the Warranty Claim Register is automated, a copy must be printed monthly and retained. The Warranty Settlement Statement should be filed chronologically by statement date and month sequence.

Hyundai Warranty Claim Registers are available free through the Hyundai Non-Parts Warehouse. The part number is NP449-MV010. An order quantity of one (1) provides ten (10) register sheets.

## 6.11 Warranty Settlement Statement (HMA-4301 Report)

HMA issues a weekly Warranty Settlement Statement and a PDI Settlement Statement twice a month. These statements detail all the actions taken on each individual warranty, PDI, and transportation claim received and processed since the last Warranty Statement. This information must be reconciled with the Warranty Claim Register.

The Warranty Statement lists the claims in Repair Order Number sequence and groups the claims in several sections.

**Note:** You may reprint your Warranty Settlement Statement via Hyundaidealer.com under the Service tab / WebDCS / DCS Reports. The 'Report ID' for the Settlement Statement is HMA-4301. To view recent Settlement Statements, click on 'Search All Reports' and enter a date range.

The format for any dates listed on this report are YYMMDD (Year, Year, Month, Month, Day, Day), example: 23 01 31.

**The sections are as follows:**

**Section 1:** Warranty Claims Paid This Statement
This section lists warranty claims that have been paid since the last warranty statement was issued. These claims are sorted by repair order.

- The "Init Submit" field lists the date you initially submitted the warranty claim.
- The "Other Approved" field is the sum of SUBLET AMOUNT and TOWING AMOUNT.

**Section 2:** Claims Paid This Statement–Reprocessed/Credited
The claims in this section were originally accepted for payment and then either appealed, charged back via DCS or phone, resubmitted and paid within the same statement period.

- The "Other Amount" field is the sum of SUBLET AMOUNT and TOWING AMOUNT.
- "Trans Type" is defined as follows:
  ORIG – Original claim total approved for payment.
  DEBIT – Chargeback of original claim total approved for payment.
  PAY – Current claim amount approved for payment.

**Section 3:** Claims Paid Prior Statement–Reprocessed/Credited
The claims in this section were originally paid on a previous statement, then either appealed, charged back via DCS or phone charged back, resubmitted and paid.

- The "Other Amount" field is the sum of SUBLET AMOUNT and TOWING AMOUNT.
- TRANS TYPE relates to the TOTAL AMOUNT. The transaction types are as follows:
  ORIG – This amount is a reference for you and is NOT factored in the total amount on the summary page. The ORIG amount was paid to you on a previous

statement for this claim. It will NOT be charged back from your account–an adjustment is made to it on the current statement.
ADJ – This amount is NOT a chargeback – it is used to determine the "Net Adjusted" payment.
CRDT – This amount is NOT a credit – it is used to determine the "Net Adjusted" payment. The CRDT amount is the amount paid to you or the corrected, current claim.

- NET ADJUSTED is the net difference amount you will be paid from HMA for your corrected claim. The adjusted payment is calculated by subtracting the ADJ from the CRDT amount. This amount will be factored into the Total Amount at the end of the section and the end of the report.
- LAST STATEMENT DATE is the date the original claim was paid.
- RETURN REASON/S are listed under each claim to explain why the ADJ was made.

**Section 4:** Claims Paid This Statement– Charged Back
The claims in this section were originally accepted for payment on this statement, then either charged back at the request of the dealer or by HMA for reason(s) stated under the "Return Reason" field. The "Net Debit" amount for each claim in this section will always offset the original payment amount.

- The "Other Amount" field is the sum of SUBLET AMOUNT and TOWING AMOUNT.
- TRANS TYPE defines the TOTAL AMOUNT. The transaction types are as follows:
  ORIG – Total amount originally paid on the claim.
  DEBIT – Total amount your claim was charged back.
- RETURN REASON/S are listed under each claim to explain why the charge back was made.

**Section 5:** Claims Paid Prior Statement– Charged back
This section lists claims that were paid to the dealer on a previous statement, then charged back at the request of the dealer or by HMA for the reason(s) stated under the "Return Reason's" field.

- The "Other Amount" field is the sum of SUBLET AMOUNT and TOWING AMOUNT.
- TRANS TYPE defines the TOTAL AMOUNT. The transaction types are as follows:
  ORIG – Total amount originally paid on the claim.
  DEBIT – Total amount your claim was charged back.
- RETURN REASON/S are listed under each claim to explain why the chargeback was made.

**Section 6:** Claims Currently In Suspense
Claims are placed in suspense by HMA for a variety of reasons. The claims will only remain in suspense for a maximum of 48 hours, at which time they will either be paid, sent to Prior Approval Center or returned for more information. This section will list claims placed in suspense at the time the Warranty Statement is printed.

**Section 7:** Claims Currently Pending PA Center Review
Claims are placed in pending PA Center review by HMA for a variety of reasons. This section will list claims placed in pending PA Center review at the time the Warranty Settlement Statement is printed.

**Section 8:** Warranty Claims Returned This Statement
Claims in this section, were submitted to HMA and returned for correction or more information since the last issuance of the Warranty Statement. The claims should be corrected, re-entered, and resubmitted through DCS for payment.

- RETURN REASON/S are listed under each claim to explain why the claim was returned.

**Section 9:** Warranty Claims Previously Returned But Not Resubmitted
Claims in this section were submitted to HMA and returned for correction or more information, on a previous Warranty Statement and not resubmitted. This section contains claims returned within a 90 day period prior to the current statement. The claims should be corrected, re-entered, and resubmitted through DCS for payment.

- RETURN REASON/S are listed under each claim to explain why the claim was returned.

**Section 10:** Transportation Claims Paid This Statement
This section lists transportation claims that have been paid since the last warranty statement. The claims are sorted by repair order.

- The “Init Submit” field lists the date you initially submitted the transportation claim.
- The “Other Approved” field is the sum of additional expense(s) claimed (see Section 2.2.4).

**Section 11:** Transportation Claims Paid This Statement – Reprocessed/Credited
The transportation claims in this section were originally accepted for payment and then either appealed, charged back via DCS, or phone charged back, resubmitted and paid within the same statement period.

- The “Other Approved” field is the sum of additional expense(s) claimed (see Section 2.2.4).
- “Trans Type” is defined as follows:
  - ORIG – Original claim total approved for payment.
  - DEBIT – Chargeback of original claim total approved for payment.
  - PAY – Current claim amount approved for payment.

**Section 12:** Transportation Claims Paid Prior Statement – Reprocessed/Credited
The transportation claims in this section were originally paid on a previous statement, then either appealed, charged back via DCS, or phone charged back, resubmitted and paid.

- The “Other Amount” field is the sum of additional expense(s) claimed (see Section 2.2.4).
- TRANS TYPE relates to the TOTAL AMOUNT. The transaction types are as follows:

ORIG – This amount is a reference for you and is NOT factored in the total amount on the summary page. The ORIG amount was paid to you on a previous statement for this claim. It will NOT be charged back from your account – an adjustment is made to it on the current statement.
ADJ – This amount is NOT a chargeback – it is used to determine the "Net Adjusted" payment.
CRDT – This amount is NOT a credit – it is used to determine the "Net Adjusted" payment. The CRDT amount is the amount paid to you on the corrected, current claim.

- NET ADJUSTED is the net difference amount you will be paid from HMA for your corrected claim. The adjusted payment is calculated by subtracting the ADJ from the CRDT amount. This amount will be factored into the Total Amount at the end of the section and the end of the report.
- LAST STATEMENT DATE is the date the original claim was paid.

**Section 13**: Transportation Claims Paid This Statement– Charged back
The transportation claims in this section were originally accepted for payment on this statement, and have either been charged back at the request of the dealer or by HMA for reason stated under the "Return Reason" field. The "Net Debit" amount for each claim in this section will always be $0.00 as the chargeback amount will always offset the original payment amount.

- The "Other Amount" field is the sum of additional expense(s) claimed (see Section 2.2.4).
- TRANS TYPE defines the TOTAL AMOUNT. The transaction types are as follows:
  ORIG – Total amount originally paid on the claim.
  DEBIT – Total amount your claim was charged back.
- RETURN REASON/S are listed under each claim to explain why the chargeback was made.

**Section 14:** Transportation Claims Paid Prior Statement– Charged back
This section lists claims that were paid to you on a previous statement, then charged back at the request of the dealer or by HMA for the reason(s) stated under the "Return Reason/s" field.

- The "Other Amount" field is the sum of additional expense(s) claimed (see Section 2.2.4).
- TRANS TYPE defines the TOTAL AMOUNT. The transaction types are as follows:
  ORIG – Total amount originally paid on the claim.
  DEBIT – Total amount your claim was charged back.
- RETURN REASON/S are listed under each claim to explain why the chargeback was made.

**Section 15:** Transportation Claims Currently In Suspense
Transportation claims are placed in suspense by HMA for a variety of reasons. The claims will only remain in suspense for a maximum of 48 hours, at which time they will either be paid, sent

to Prior Approval Center or returned for more information. This section will list claims placed in suspense at the time the Warranty Statement is printed.

**Section 16:** Transportation Claims Currently Pending PA Center Review
Transportation claims are placed in pending PA Center review by HMA for a variety of reasons. This section will list claims placed in pending PA Center review at the time the Warranty Settlement Statement is printed.

**Section 17:** Transportation Claims Returned This Statement
Transportation claims in this section were submitted to HMA and returned for correction or more information since the last issuance of the Warranty Statement. The claims should be corrected, re-entered, and resubmitted through DCS for payment.

- RETURN REASONS are listed under each claim to explain why the claim was returned.

**Section 18:** Transportation Claims Previously Returned But Not Resubmitted
Transportation claims in this section were submitted to HMA and returned for correction or more information on a previous Warranty Statement and not resubmitted. This section contains claims returned within a 90 day period prior to the current statement. The transportation claims should be corrected, re-entered, and resubmitted through DCS for payment.

**Section 19:** Claims With Outstanding Part(s) Not Yet Received
This section lists claims with “Outstanding Parts Request Notices”. HMA’s policy is to chargeback warranty claims when a requested replaced part is not received by the Warranty Technical Center (WTC) within 20 days of the “Date Request”.

**Section 20:** Statement Summary
The last page of the report is a summary page.

The totals shown on the summary page are factored as follows:

1. The total of claims listed in Section 1 of this report.
2. The total of Section 2 + Section 3 of this report.
3. The total of claims in Section 4 + Section 5.
4. The total of claims in Section 6.
5. The total of claims in Section 7.
6. The total of claims in Section 8.
7. The total of claims in Section 9
8. The total of claims in Section 10 + Section 11 + Section 12 + Section 13 + Section 14 + Section 15 + Section 16.
9. The total of claims in Section 17.
10. The total of claims in Section 18.
11. The total of claims in Section 1 + Section 2 + Section 3 + Section 4 + Section 5 + Section 10 + Section 11 + Section 12 + Section 13 + Section 14.

### 6.11.1 Pre-Delivery Inspection Settlement Statement - HMA-4306

The Settlement Statement indicates all claims paid, credit adjusted, and chargeback adjusted since the last statement. This statement is sorted by claim number and contains the following information for each claim:

- Claim number
- Repair order number
- Vehicle identification number
- Total amount charged back
- Total amount claimed
- Date approved (payment date)

The last page of the PDI Settlement Statement is a summary of the statement totals that includes:

- Total amount charged back
- Total number charged back
- Total amount claimed
- Total number credited
- Net amount approved
- Total number processed

## Section 7: Warranty Parts Retention Requirements

### 7.0 Parts Retention Requirements

Parts replaced under HMA Warranty coverages, HMA Customer Satisfaction Funds (Goodwill Claims), Campaign/Recall, or Foreign Vehicle must be retained for 20 calendar days from the date of claim payment. In cases where claims are returned for additional information or correction, the Dealer must continue to retain these replaced parts until 20 days have elapsed from the date of claim payment.

**Exception: All 12V AGM batteries replaced under warranty must be tagged and held for 10 days from the date of claim payment. See TSB# 24-EE-009H for more details**. Please note that the TSB listed is subject to change; for the most up-to-date version, please visit www.HyundaiDealer.com under the Service Tab/Service Programs/Hyundai Tech Info/TSB.

**Note:** The claim payment date is indicated as the Acceptance Date on the DCS answerback (Claim Status Report) and on the Warranty Settlement Statement as the “Date Approved”.

**Core Policy**
Reman engines and transmission Assemblies will have a core charge that is a separate charge from the dealer net part price. Credit for the core value is issued on the dealership’s monthly parts statement.

All core assemblies, except radios and navigation units, are to be returned unless otherwise requested by the National Warranty Technical Center (WTC) as outlined in section 7.2.

MOBIS Parts America’s Dedicated Delivery Service carriers (MPA DDS) will arrange for pickup and delivery to the core return center where the core will be inspected, processed, and your credit authorized and electronically transmitted to HMA.

Dealers are not responsible for paying freight on these core returns.
Cores must be:

1. Fully Assembled
2. With a completed Warranty Parts Tag
3. Completely drained of all fluids (Automatic Transmission, Engine)
4. With a completed Core Return form
5. With a completed Transmission or Engine Diagnosis Worksheet
6. With a copy of the Repair Order (Repair Order must include detailed Condition, Cause and Correction information) or Final Invoice when over-the-counter sale
7. With all plastic/rubber plugs and straps

Go to **www.HyundaiDealer.com,** click on WebDCS, Parts tab, Core Returns to enter core returns and arrange for core pickup. For proper core and return credit, ALL information entered within the Core Returns portal needs to be accurate and pertaining to the Core being returned.

If you have any problems using the website, contact your Hyundai Parts Dealer Support Group at 1-800-545-4515 or MOBIS Parts Portal.

## 7.1 Parts Storage Requirements

The following procedures are required for all Warranty, Customer Satisfaction (Goodwill), or Campaign/Recall replacement parts retained:

- All parts replaced in performance of a Warranty repair, a Customer Satisfaction repair, or Campaign/ Recall are to be given to the Dealer's Parts Department at such time as the Parts Department issues the replacement part to the technician.
- Dealership Parts department personnel must note receipt of the replaced Warranty, Customer Satisfaction, or Campaign/Recall part(s) on the technician's shop hard copy of the repair order at the time the Dealer's Parts Department receives the part and issues the replacement part (this function can be performed electronically in a fully computerized system). This notification must be accomplished by a signature or initials on the repair order hard copy by the parts counter person, or by the stamping of such words such as "Parts Received" by use of a stamp on the hard copy of the repair order (digital stamp from DMS is acceptable).
- Prior to storage, each part should be externally cleaned and repackaged in the container in which the new replacement part was received.
- All parts containing lubricant or fluid must be drained thoroughly and wiped clean.
- Cap or plug parts according to instructions in parts bulletin or service bulletin, if applicable.
- Dealership Parts Department personnel must then complete a Warranty Parts Tag. The completed tag is to be attached to the replaced part(s).
- After the replaced part(s) is tagged, these parts should be temporarily stored in a secured area until it is feasible to transfer them to the Warranty Parts Retention area. This task should be performed at least weekly–more frequently in large volume dealerships.
- Dealership Parts Department personnel must place the replaced part(s) in a designated and secured warranty parts storage area (a 10 bin system). Refer to Section 7.4.

**Note:** If the replaced part(s) contain more than one piece, all parts must be kept together within the Warranty Parts storage area in a box, bag (preferably a clear plastic bag), or wired together.

- Warranty, Customer Satisfaction, and Campaign/Recall parts must be retained for 20 days from the date of claim payment. Warranty and Customer Satisfaction parts may be requested at any time within this 20 day period by HMA's Warranty Technical Center, the DPSM, Field Engineer, or other authorized HMA personnel. The DPSM, Field Engineer, or any other authorized HMA staff person may inspect these replaced parts at any time without notification. Therefore, these parts must be available at all times during this 20 day period.

Only the DPSM, Field Engineer, authorized Regional personnel, or HMA National Warranty personnel may dispose of these parts prior to the 20 day retention period. If the warranty parts

are not requested or disposed of by HMA personnel within the 20 day retention period, the Dealer is to destroy and scrap the warranty parts after 20 days.

**Exception: AGM Battery must be retained for 10 days according to TSB# 24-EE-009H**. Please note that the TSB listed above is subject to change; for the most up-to-date version, please visit www.HyundaiDealer.com under the Service Tab/Service Programs/Hyundai Tech Info/TSB.

• Warranty, Customer Satisfaction, and Campaign/Recall parts must not be installed on any vehicle, sold at retail, sold for remanufacturing/rebuilding or used in any other application.

• In the event that inspection of the warranty parts by HMA reveals that the parts are not defective, not defective as stated in the claim, defective due to improper installation, or removal, or the parts are not available for inspection, a chargeback will be issued.

## 7.2 Parts Return Notification

Notification of Warranty, Customer Satisfaction (Goodwill), or Campaign/Recall parts to be returned to HMA's Warranty Technical Center is performed by the following method:

• As part of HMA's Quality Analysis and claim validation program, Dealers will receive from a Warranty Part Return Notice from the HMA National Warranty Technical Center (WTC). These requests for parts will have various return locations. Refer to the destination within the Warranty Part Return Portal (WebDCS) for proper Ship-To address. The Warranty Parts Return Notices and corresponding Parts Return Labels are issued on a daily basis. The Parts Return Labels issued are to be affixed to the back side of the applicable Warranty Parts Tags, and the requested parts with the attached Parts Tags are to be returned to the respective WTC location. **Please pay special attention to the notice and label to ensure that parts are grouped and packaged correctly.** Dealers will also receive an automated email notification of their "WTC Part Return Status".

**Note:** Dealers must enter their email address when completing the "Ship from" dealer information on your initial use of the Web Based WTC Part Return System (See Section 7.6)

All parts listed on the WTC Parts Return Notice must be returned.

The Warranty Settlement Statement, which is issued twice a month, also contains an "outstanding part(s) not yet received" section. This section shows requested parts that have not yet been returned to HMA's WTC.

Occasionally, HMA personnel may inspect, retrieve or dispose of a part prior to the end of the 20 day parts retention period. In such cases, if a parts return notice appears for a part that was previously disposed of by HMA personnel, the Dealer must furnish the WTC with the Warranty Parts Receipt, signed by the DPSM, RWM, FSE, or other authorized individual. The Dealer should retain a photo copy of receipt that has been returned to the WTC.

• Replaced Parts or HMA processed signed Warranty Parts Receipt must be received by the WTC within 20 days from issuance of the Warranty Parts Return Notice. If not received, chargebacks will be issued on an automatic basis and will occur approximately 20 days after the issuance of the first request for the replaced part(s).
• Parts replaced under warranty coverages, HMA customer satisfaction (Goodwill) funds, or Campaign/ Recall must be retained for 20 days from the date of claim payment approval. In cases where claims are returned for additional clarification, the Dealer must continue to retain these parts until 20 days have elapsed from the date of claim payment. If the parts are not requested by HMA within the 20 day retention period, the Dealer is to destroy and scrap the parts.

*<u>Note</u>: **AGM Battery must be retained for 10 days according to TSB# 24-EE-009H. WTC must also** receive battery within 10 days of the initial request for parts. Please note that

the TSB listed above is subject to change; for the most up-to-date version, please visit www.HyundaiDealer.com under the Service Tab/Service Programs/Hyundai Tech Info/TSB.

**Note:** Your Warranty Settlement Statements include a Parts Scrap Report (HMA-4330). **The Parts Scrap Report includes all parts that were approved over 20 days prior to Settlement Statement date and that now may be scrapped.**

PARTS RETURN LABEL

FOUNTAIN VALLEY, CA 92708

ATTENTION: WTC COORDINATOR

## 7.3 Warranty Parts Tag

The Warranty Parts Tag (P/N NP445-00011) must be completed and attached to the replaced Warranty, Customer Satisfaction, or Campaign/Recall part upon receipt of the replaced parts by the Dealership's Parts Department personnel from the technician. The following information must be entered on the tag:

- Dealer Code (required)
- Repair Order Number (required)
- Claim Number (optional)
- Date of Repair (required)
- VIN (required)
- Mileage (required)
- Part Number (required)
- Reason Replaced? (required)

By filling out Dealer Code, repair order and part number, the Dealer can quickly locate a part requested by the WTC.

## 7.4 The Ten-Bin System

HMA requires that the Dealer utilize a 10-Bin Warranty parts retention system. In the 10-Bin system, each of the 10 bins is numbered from zero to nine and corresponds to the last digit of the repair order number. There are 10 separate bins, each of which is large enough to contain the volume of Warranty, Customer Satisfaction, and Campaign/Recall replaced parts required.

It is imperative that a Dealer employee (preferably a Dealer Parts Department employee) be given the responsibility for maintenance and security of the Warranty parts retention area. Twenty (20) days after the Dealer is notified of claim payment, the related parts are to be removed from the Warranty parts retention area, destroyed and scrapped, provided these parts are not requested to be returned by HMA. Determination of which parts are eligible for the over twenty (20) day scrap, can be accomplished by using the Parts Scrap Report (HMA-4330) section of your Warranty Settlement Statements or the acceptance date on the DCS claim answerback (claim status report).

**All 12V AGM batteries replaced under warranty must be tagged and held for 10 days from the date of claim payment. Please refer to TSB# 24-EE-009H* for 10-day AGM battery retention**. Regular security and maintenance of the warranty parts retention area assures that only those parts subject to retention, inspection, and possible return are in the Warranty parts retention area.

***Please note:** The TSB listed above is subject to change; for the most updated version, please visit www.HyundaiDealer.com under Service tab/Service Programs/Hyundai Tech Info/TSB.

## 7.5 Parts Shipping Procedures

When replaced Warranty, Customer Satisfaction (Goodwill), and Campaign/Recall parts are requested to be returned to HMA's Warranty Technical Center, the following procedures must be followed:

**PLEASE RETURN PARTS WITHIN 48 HOURS OF REQUEST DATE.**

• Each Warranty, Customer Satisfaction, or Campaign/Recall part returned must be tagged with an accurately completed Warranty Parts Tag.
• Affix the DCS Warranty Parts Request Return label to the back of the Warranty Parts Tag.
• Requested Warranty, Customer Satisfaction, or Campaign/Recall parts must be returned to HMA in the original packaging of the replacement part. Parts, such as air conditioning parts which are susceptible to moisture contamination or damage to thread fittings, must be properly capped. Caps removed from the new replacement part can be used to cap the return part.
• Use only one (1) box for returning parts for the same claim number since not all shipments are received on the same day.

**Note:** All parts replaced in performance of a Warranty, Customer Satisfaction, or Campaign/ Recall repair must be returned when one or more parts are requested as per the claim. All parts associated with the repair claimed must be returned in the same box.

• Should a part not be available for return (for example, a wheel cover fell off), the dealer is required to write a note on the part request, include a copy of the repair order, and mail them to the requesting location. The WTC will update the record and avoid a chargeback being issued to the dealer.
• Parts that are scrapped in error, misplaced, lost, or stolen are not acceptable reasons for a part not being returned to the WTC and may result in the claim being subject to chargeback.
• Include a copy of the DCS Warranty Parts Return Notice(s), including a check off in the column provided for each part contained in the box.

**Note:** Retain a copy of each DCS Warranty Parts Return Notice, identifying the parts shipped, along with the FedEx tracking number.

• A copy of your dealership's repair order is required. A complete and legible copy of the repair order front and back that includes the customer complaint, cause comments and technician's corrective action must be included with the required documentation and part(s). The repair order needs to arrive at the WTC in good condition and legible. **Attach the repair order to the Warranty Parts Tag.**

In cases that involve a special order part (SOP) a copy of the previous repair order will be required.

- Shipments to the WTC must be made using FedEx Ground or FedEx Freight. Refer to Section 7.6 Warranty Technical Center Shipping Policies.
- Package each shipment separately by claim number. Do this by combining all parts related to a specific claim number into one individual package.

### 7.5.1 Engine / Transmission Shipping Procedures

Part return requests related to Engine / Transmission:
-Warranty Part Return Request (section 7.2) – WTC Part Inspection
-Engine / Transmission Reman Program (section 5.6.4) – Core Return

Must adhere to:

A returned Engine main components must be re-assembled to hand-tight. All fluids must be completely drained prior to shipping. The engine core must be re-assembled. Shipping back with loose parts could possibly cause damage. Damage to the return core due to improper removal process or insufficient packaging may lead to chargeback of the core charge (if applicable) and warranty claim.

- If you are returning a Short block, re-assemble all of the parts to match the remanufactured unit
- If you are returning a Sub Assembly, re-assemble all of the parts to match the remanufactured unit

Include the following completed forms with the returned engine. Failure to adhere to these requirements will result in the chargeback of the core credit (if applicable) and warranty claim.

- Engine Diagnosis Worksheet (available in WebDCS) completely filled in with the engine serial number from the removed engine and the Service Manager’s signature
- Dealer’s Repair Order must include detailed condition, cause and correction information
- Warranty Parts Tag (part number NP445-00011). Sample in Section 7.3

If a warranty claim is submitted and the engine was not returned as requested by Warranty Parts Return Notice or in accordance with the Engine Reman Program, or if the returned engine core does not match the engine replaced per the Engine Diagnostic Worksheet (engine serial number), the warranty claim will be charged back to the dealer.

Dealers will be billed the freight pickup & recovery costs for all invalid returned engine cores.

## 7.6 Warranty Technical Center Shipping Policies

Processing parts returned to the WTC must be done online at www.HyundaiDealer.com. Click the WTC Part Return Icon on either the PARTS or SERVICE page. Dealers will not be responsible for paying freight charges, account or online fees.

A Starter Guide for using the WTC Web Based System is posted on the Hyundai Dealer Website. To access the guide:

1. Go to www.HyundaiDealer.com
2. Place cursor on 'Service', and listed under the "Dealer Resources" heading select "Documents Library".
3. Click on "Warranty" to expand the index.
4. Select "'WTC_WebPartReturnSystem".

It is the dealer's responsibility to properly prepare shipments for transport and that parts are accompanied by the necessary paperwork. For FedEx Customer Service contact FedEx's Customer Technology Support at 1-877-339-2774 or email FedEx's Premier Customer Service at:

**smffoc57@email.fedex.com.**

**In your email, please be sure to reference Hyundai's Part Return Program

**Hazardous Materials And Dangerous Goods**

If a part request is received for a part considered hazardous material, follow the instructions contained within the request and await for further instructions.

**Warranty Technical Center Mailing Addresses**

**Hyundai Motor America**
Warranty Technical Center
18335 Mt. Langley Street, Unit A
Fountain Valley, CA 92708
Fax: 1-714-378-5179
Email: wtc@hmausa.com

## 7.7 Warranty Technical Center Rejected Part

Any Warranty, Customer Satisfaction, or Campaign/Recall part returned to the HMA Warranty Technical Center that does not comply with HMA policy and procedures may be subject to chargeback. The following are examples of reasons that could qualify return parts for chargeback:

- Parts found not to be defective, or not defective as stated on claim.
- Supporting documentation missing.
- Parts found to be repairable or a repairable assembly.
- Parts damaged due to the use of improper tools, improper repair procedures or outside influence.
- Parts damaged in transit to HMA's Warranty Technical Center due to improper packaging.
- Wrong parts received compared to those requested and stated as replaced on the Warranty claim.
- Assembly received in disassembled or incomplete condition.
- Warranty Part Tag(s) received without the parts attached or other indication of HMA removal/scrapping.
- Parts found to be non-Genuine Hyundai parts or non-approved HMA parts or parts claimed as HMA parts which are not HMA parts.
- Parts received without a Warranty Parts Tag, Parts Return Notice, or Parts Return Label.
- Parts received without a required Repair Order (check the Parts Return Label).
- Parts stated as replaced on the claim which are not received.
- Parts received beyond 20 days from DCS request to return.

**Note:** Parts received beyond the deadline and electronic media documentation not submitted per TSB instructions may not result in the recredit of the charged back claim.

- Parts not received.
- Parts replaced due to ***TSB/Campaign*** repair procedure not followed.

***Note:** **ALL 12V Batteries must be retained for 10 days after each battery claim approval per TSB# 24-EE-009H. WTC must also receive batteries within 10 days after the initial request for parts.** Please note that the TSB listed above is subject to change; for the most up-to-date version, please visit www.HyundaiDealer.com under the Service Tab/Service Programs/Hyundai Tech Info/TSB.

HMA reserves the right to make the final decision as to the defectiveness of the part. Rejected returned parts will be held for 30 days from the date of chargeback pending any Dealer's request for return.

To request the return of a rejected part, contact your DPSM or the Regional Warranty Manager.

Rejected parts that are requested by the Dealership for return will be shipped back at dealer's expense. If you have information that reflects shipment of the part to HMA, please follow the procedure identified in Section 7.8 – Warranty Technical Center Appeals.

## 7.8 Warranty Technical Center Appeals

The chargeback appeal process has been automated. Appealing WTC chargebacks can be completed online at www.HyundaiDealer.com. The electronic Debit Appeal forms can be accessed on either the PARTS or SERVICE page. Under the PARTS tab, select 'Information' and then click on 'WTC Claim Debit Appeal'. Under the SERVICE tab click on 'WTC Claim Debit Appeal'. Appeals must be submitted within 30 days from the date of the WTC chargeback.

A detailed Step-By-Step Instruction manual is posted on the Hyundai Dealer Website. To access the manual:

1. Go to www.HyundaiDealer.com
2. Hover over the Resources Tab and click on "Documents Library".
3. Scroll down to "Warranty" and click on the arrow to expand the index.
4. Click on "WTC Claim Debit Appeal User Guide".

**Non-Receipt of Parts**

If parts are not received at the WTC within 20 days* of the initial request for parts from HMA request, your entire claim will be charged back. If your Dealership records confirm delivery of the part within 20 days, you may wish to appeal such a chargeback.

***Note: ALL 12V Batteries must be retained for 10 days after each battery claim approval per TSB# 24-EE-009H. WTC must also receive batteries within 10 days after the initial request for parts.** Please note that the TSB listed above is subject to change; for the most up-to-date version, please visit www.HyundaiDealer.com under the Service Tab/Service Programs/Hyundai Tech Info/TSB.

**Parts Determined to be Damaged or Not Defective (NTF)**

Claim chargebacks may result from parts received damaged, broken or missing components. Also, parts may be found to be "Not Defective as Claimed" or "No Trouble Found" (NTF) as a result of testing and technical evaluation at the WTC. To contest such a finding, adhere to the following procedures:

- Document your appeal on the electronic WTC Dealer Debit Appeal form, including a detailed explanation of the appeal.
- Attach any pertinent resource(s), such as a copy of your repair order to indicate customer comments and/or technician comments that relate to your appeal.

# Section 8: Service Campaign and Recall Procedures

## 8.0 Service Campaign and Recall Handling Procedure

When appropriate, Hyundai Motor America (HMA) may conduct Service Campaigns or Recalls to address any safety, emissions or customer satisfaction issues or conditions.

Dealers will perform an inspection and/or correction for all Service Campaigns and Recalls conducted by HMA in accordance with the Service Campaign and Recall Notification materials as outlined in this manual.

In the event of a Service Campaign or Recall to correct a safety-related condition or noncompliance with a Federal Motor Vehicle Safety Standard or an Emissions-related condition, all inspections and/or corrections will be provided on a “No Charge” basis to owners. Because of the importance to customer safety and satisfaction, all affected vehicles are to be inspected and/or corrected at the earliest possible opportunity. HMA will announce each Service Campaign or Recall directly to the Dealer. Service Campaign and Recall Notification materials (Technical Service Bulletins, VIN Listings, Owner Letters, and Dealer DCS Messages) will be made available to all dealers.

**Vehicles Involved**
Vehicle Identification Number (VIN) ranges or production date ranges and other specific data regarding body style, options, or accessories, where applicable. A select model year(s) and model(s) of certain Hyundai Vehicles according to the VIN listing to address the particular issue(s) or condition(s) of the Service Campaign or Recall.

**Parts**
Part numbers or replacement parts and instructions on shipment and invoicing. Reimbursement information on the applicable labor operation(s), time allowance(s), part number(s), part prices, and other information as required.

At the onset of a Service Campaign or Recall, MOBIS Parts America may ship a quantity of parts that HMA estimates will meet the Dealer’s requirements. However, HMA may also elect to rely on the Dealer’s use of normal parts ordering procedures.

**Service Campaign / Recall Completion**
The responsibility for completion of a Service Campaign or Recall is that of the selling dealer. However, all authorized Hyundai Motor America Dealers are also responsible for completing Service Campaigns or Recalls for visiting owners/lessees as well.

Each Dealer should review its sales records to determine if any vehicles have been transferred to other Dealers. They should also review their stock list for vehicles that may have been sold or traded subsequent to the date of issuance of the Service Campaign or Recall Notification.

Dealers must perform recall procedures on any affected stock vehicle (new and used) before it is delivered to the customer. United States Code Title 49, Subtitle VI, Part A, Chapter 301, Sub-Chapter II, Section 30120 prohibits retail sale of affected vehicles prior to correction. A civil penalty not to exceed $21,000.00 may be imposed for each violation. The maximum penalty for a series of violations is $105,000,000. In the event that a notice is received for a vehicle that is no longer in Dealer stock and the Dealer is unaware of the location of the vehicle, the Dealer must immediately notify HMA accordingly.

**8.0.1 Notification to Customers**

Notification letters will be sent by "First Class" mail from HMA to these customers including a letter of explanation and instructions to the customer to have their car inspected and/or corrected.

If, during routine servicing, a vehicle is found to be in need of modification, the customer should be asked for permission to perform the correction.

Dealers should take extra care in properly completing the RDR form prior to submission. If an owner moves, the Dealer can submit a change of address using the RDR CHANGE option on their DCS system or have the owner complete and mail the Owner Name and Address card enclosed with their Owner's Handbook.

Visiting owners may come to the Dealer in need of work under a Service Campaign or Recall. These owners, like all others, are entitled to prompt and courteous service.

**8.0.2 Service Campaign or Recall Follow-Up Notification**

A Dealer's initial vehicle list contains a complete listing of involved vehicles shipped to the Dealer, sold by the Dealer, or vehicles that are registered within the vicinity of the dealership, complete with names and addresses of owners. If completion rates are low, HMA may follow up with an additional mailing via "First Class" mail to those owners who have a vehicle with an open Service Campaign or Recall.

**8.0.3 Checking for Open Campaigns or Recalls**

WebDCS contains Information screens to include:

- **Warranty Vehicle Information Screen**
  Lists open Service Campaign(s) or Recall(s) that have not been performed on each vehicle, including vehicles reclassified as non-warrantable. WebDCS will now reflect the date the VIN effectively started being open for the campaign. All outstanding Service Campaign or Recall procedures are to be performed on all vehicles, including vehicles that have been reclassified as non-warrantable. Refer to Section 5 for instructions on how to access the WebDCS System.
- **Uncompleted Campaign VIN List - Retailed**
  Provides a list of open Service Campaigns or Recalls, as well as a search function by model/model year, or a 3-digit Campaign number (example: TC1).

- **Uncompleted Campaign VIN List - Dealer Stock (New and Used)**
  Allows a search by VIN or model/model year, with the ability to export to Microsoft Excel or print as a PDF.

**Note:** Dealers must review a vehicle's Warranty Vehicle Information Screen on every vehicle that enters its service area to ensure identification of currently open Service Campaigns or Recalls for the vehicle. Dealers must also review their uncompleted Campaign VIN list for dealer stock and complete the open campaign(s)/recall(s) as soon as possible.

A printout of the Vehicle's Warranty Vehicle Information Screen must be attached to each repair order.

**NOTE: If customer elects to postpone having open campaign/recall performed, open line on repair order with customer's reason(s) and have customer sign.**

### 8.0.4 Service Campaign or Recall Claim Preparation

Claim preparation requirements for Service Campaigns or Recalls will be provided and contained in the Service Campaign Notification or Recall materials (Technical Service Bulletins).

**Note:** If a previously completed Recall needs to be performed again and the vehicle is out of warranty, in order to ensure that the Recall is performed at no expense to the customer, please submit a Prior Approval Request for goodwill consideration prior to performing the work. See section 5.4.1 Prior Approval Requirements.

## Section 9: Warranty Resources

### 9.0 Warranty Resources

**Most, if not all Current Publications and Forms can be accessed at:**
